How to make puzzle template for instagram.

An Instagram Puzzle Feed is one of our favorite Instagram feed layouts. It looks complicated to create, but it's actually super simple. And to make it even simpler, we created 6 beautiful Instagram Puzzle Feed templates for you. You don't need Adobe Photoshop or Illustrator You can fully customize the templates Your can choose your own colors All you need is: A free tool called "Canva" Your photos, and Preview app Please read the tutorial very carefully. We are making the templates free for everyone, all around the world. We want to make sure nobody breaks the templates. So please, follow this tutorial carefully. The tutorial is super easy. Just follow these steps: Canva is a simple design tool. It has a website and an app. To keep things super simple, I recommend you use Canva on your computer (not the app). It will be easier to create your puzzle feed on your computer. If you don't have an account with Canva yet, click here to create one. If you already have one, login now. Then, go to step 2. I will give you the link below. Please read the full tutorial first to make sure you understand exactly how to use the template and how to split your images perfectly. Once you have made a copy of the templates, you can edit your copy. It's yours! Choose one of the 6 templates. Feel free to: Upload your own images Change the colors of the background Write your own text The sky is the limit! Once you are happy with the look of your Puzzle Feed, it's time to save it. To download your Puzzle Feed, press on the "Download" button, on the top right corner of your screen. You can download it in PNG or JPG. Any will work. Tip: Check what page your Instagram Puzzle Feed is on. For example, "Template 6: Arty" is on page 18. Select the exact page you need to download. Now send your big Puzzle Feed image to your phone. You can: Message the image to yourself Email it to yourself Airdrop it to your phone Or any other way you can think of. Preview is the most used Instagram Planner in the world. It has an image splitter tool. You can use Preview on your computer and on the phone app. Let's use the phone app to split your big image. Here is how to split your big image into perfect Instagram posts: Open your Preview app Press on the "+" button Press on "Split image" Choose your big image from your camera roll / gallery Choose the second last grid split option Done You're done! Each individual image will appear in your Preview feed, ready to be posted on Instagram. If you need, you can move the order of the individual images within the grid. This is handy if you want to add more posts in your Preview feed, or if the images are not in the right order. Preview allows you to see how your feed will exactly look like before you post on Instagram. So if you need to, you can move the posts around. Drag and Drop: Hold your finger on a post and drag it somewhere else in your feed Swap: Select 2 posts and press on the "arrow" button You have two options: Post manually, or Auto-post To post manually: Press on the post you want to post Press on the "Share" button What is auto-post? Set a day and time and Preview will automatically post your image and caption on Instagram. To auto-post: Press on the post you want to schedule Press on the "Notes" button Write your caption and hashtags Turn on "Schedule Post" Turn on "Auto-Post" Done! Tip: Post in the right order or schedule your posts in the right order. Start posting / scheduling the first post that is on the bottom right corner first. Then move your way left and up as you continue posting. This will make sure your Puzzle Feed gets re-created on Instagram perfectly. It literally takes me 10 minutes to create a puzzle feed from start to finish using the template and then uploading the posts in Preview. So easy and fast! We would love to see your creations! Tag us @preview.app in your posts or Insta Story so we can re-share your beautiful Puzzle Feed. Have fun! Instagram templates are increasingly popular, particularly for brands and businesses keen to achieve a stylish, consistent look and feel quickly and easily (these free fonts will help, too).Instagram Stories in particular have rocketed in popularity in 2018. As Mark Zuckerberg put it in Facebook's Q1 earnings report: "Stories are on track to overtake posts in feeds as the most common way people share across all social apps."Over a third of Instagram's billion-plus active monthly users make regular use of Instagram Stories. Considering more than 70 per cent of Instagram users watch them with the sound on (compared with the sound being off for around 85 per cent of Facebook users), the potential is clear.The best Instagram Stories templates come in sets, and are often animated. It has beautiful templates. However, I really disappointed every time I need to create content, I need to go scroll down, look for my template and start from scratch. The "drafts" option does not save anything. We are sad to know that your experience with the app was not satisfactory. Please share your issue with us on Instagram @puzzlestar.app and we will look into it at the earliest. I am unable to save the edited text for the template that I chose. The only option given is the arrow to return back to template, not option to save the edited text The app crashes every time I try to save the photos!!!! I deleted it &re-downloaded it again & the problem is still the same!!!! It's a waste of time!
