Like playing paper. Fun Teams teams PeRio © a game for adventurers, yeah © a game that has different servers for all players, such as FFA mode (classical). Fast server and slower server, not forgetting small arena mode. Each of these servers allows the different players the ability to try different ways. THE FFA Mode © the default server that any player can play. The fastest server can be played by players who are the most advanced and have an idea © It was better than how to play the game, and survive. The slow server © most suitable for beginners as the game consists of other players playing in a slower movement. For last time, there's also © m the small way in which players can play more competitively, since there is less surface to cover and fight. This means that players will have to be more vigilant and aware of other competitors. It is a way for the most skilled players as you will be faced with other players like the PAPER game. Teams can be played: As well as Snake games or tower defense and multiplayer game, you can control your personal square cursor in different ways, first by using the keyboard controls like, W, A, S, D as well as keyboard arrow keys. You control your cursor with these controls. The goal of the game: You get your open square cursor, you have to keep away from the other cursors (players) otherwise you will die. The goal of the game is © take as close as possible to the arena of games. This is © the only way you will ensure that you will succeed in this game and come out as the winner. As the scores are added: Your own personal score © based o n your own personal time of play and the number of PaPeRio competitors you can defeat (kill). After a long time, we are back with you, we have made improvements on the game for a long time, but the further a game is © of the original, less popular it is ©. So we decided to go back, because you liked it very much, PaPeR io NLocked play PaPeR. o 2 o © one of the most popular games in the world, because this game is © safe, you can't provoke others in the game, the game alone © Designed to play. There are two main servers in the game, the US and Europe, whatever region we are close to, we recommend playing on these servers. The goal of the PeR Paio teams © simple. Try to get the maximum amount of space in the playing field with the arrow keys on your keyboard. Don't get caught by other players, because they will want to block you so that you don't take a lot of space and capture new territories. Don't forget to save your score when the game is over, when you save your score, take your place in the list with the flag of your country. © composed of four main groups: average, weekly, monthly and full-time. For example, the score you recorded today at 14.00 remains on the coffee table until now. © Tomorrow, at 14.00, unless you get more points than you... Formerly "PaPeR-io Space", the name of the game now "Paperio2.site", because it is © more memorable, paper 2. The site too © I have a Discord page where you can let us know your various requests, you can exchange ideas with other friends who play the game for discretion, if you still want to contact us. You can write to us in [email is NO; protected] PRIVACY POLICY WE use third party advertising companies to serve dwarfs when you visit our website. These companies may use information (not including your name, address, e-mail address or telephone number) about your visits to this and other Web uncles in order to provide information about goods and services of interest to you. If you want more information about this practice and know your options about not having this information used by these Read the privacy policies Theme preset POPSPPLIT HSLO v2 HSLO v3 HSLO v4 HSLO V4 Pastels Agarplus v2 Ogario v4 HKG Yin VNDOT OZYDOT Cursor Custom [0] Size of conversation source [0] Size of plate [0] Size of nimun [0] Skin frontier [0] Canon Transparency © Cell [0] Dog color © luminous luminous squid Width [0] Color of grid text grid [0] Size of grid text [0] Source of text from Ubuntu Raleway Grid Monospacial Cursive Oswald [0] Color Nick Tractor Color Nick Color Size Nick [0] Nick font Ubuntu Raleway Monospacial Curse Serif Sans serif Mass Traction Mass Oswald Food size [0] Virus color Virus border color virus width [0] Background color Commander color Indicator size [0] 1 Using any web browser, enter the URL of the game: Alternatively, you can search "Agar io" or "Agar.io" in search engines like Google, Yahoo!, Or Bing. If you're looking to play Agar's hand version, you can download the application from the app store (Google Play, Apple's App Store, Etc.) located on your smartphone. 2 Choose your username in the blank field. You can create a custom name or go with an associate with existing skins. The typing in certain user names will give you a certain dog © Deep squid or skin. Peles have no effect on their game as they are strictly for Cosmic purposes © Ethics. If you choose a custom name, you will not be able to get a skin unless you have logged on and obtained a "Premium Skin". Publicity 1 Learn how to move your dog © Squid. Move your dog © squid © which you must master first, since it will be the main aspect of your body © technical. To move your dog © squid, just move around the mouse/mouse-pad and its dog © Lula will follow the pointer on the screen. The bigger you are, the slower you move and the easier it is © for someone © I reach you. 2 Learn to fire "mass." This allows your dog © It shrinks so it can move faster, or share its mass with others. To fire a part of the "mass" of your dog © squid, just click W on your keyboard. The mass will fire in the direction in which your pointer is on the screen. The speed will be an incredible tactic to add to your data © Custom technique. 3 Split your dog © Squid when necessary. If you want to propel yourself to reach someone © m or eat someone © m smaller than you, you © able to share his cell. Divide your dog © squid will shoot half of itself forward in the direction of its pointer, thus eating any dog © Smaller squids in your direction. This requires a little practice and patience. Publicity 1 Understand that Agar. It's like a food chain. The lower you are in this food chain, the more likely you will lose the game/be eaten. The size of your cell © very important, you should pay close attention to who you try to choose a battle. Bread © Larger squids have the ability to eat the dogs © Squid smaller. Find a way to knock them down to size, o r figure out how to grow up fast enough to eat them first. If they are the same, or very close, to the size of another dog © Lula, you can't eat each other. 2 Drop the scoreboard! In Agar, io, spawning peaks all over the map. Use these peaks to knock down dog © Larger squids that are chasing you. Launch the mass on these peaks with the W key will make them grow until © certain point. Once they pass the point, the peak will split and play it in the direction you are aiming for. Successfully targeting the larger enemy and blowing it up will cause them to flee in fear of being eaten, thus saving themselves and giving them the opportunity to eat them and grow dramatically! 3 Protect yourself. If you © bigger than Virus and/or Green Spikes, in size, get into it will make you explode into mini-dog © squids, giving everyone around them the opportunity to eat even faster. [2] If you are inferior to or equal to the size of the peak, you will be able to hide inside it. Let's go. © Larger squids are able to eat it if they go into the peak, yeah © unlikely that they will, due to the fact that they will split into tons of small dogs © Cells, in last analysis, risking them to lose the game. 4 risks. If you find a prey to eat, go ahead and eat it, using so much © Basic techniques about this Make sure he is. © considerably smaller than you. Publicity 1 Consider joining, at least temporarily. The goal of the game can be to eat anyone and everyone to survive, but there are still people in the game who are willing to join you. Usually feed someone © with its mass pressing the "W" key will take to thank you by helping you grow as well © m. This too © m may result in helping you eat other dogs © Lula playing the game. Normally, an alliance won't last long. Many people who form alliances will only do s o temporarily: They'll wait till © that they want a different teammate or even © that they get big enough, and then they'll eat it. Permanent alliances are very rare, be careful. You can press the key to the space bar to give a large part of your cell to someone else. © m. I'm just sure you're not. © bigger than them. So, accidentally, eat them. 2 Investigate long-term and larger alliances. Forming an official alliance between several people requires much more work. There are a lot o f phones that people use to have conversations between Agar. community, share skins, and most importantly, form alliances. Use the forums at your advantage to create great allies by making topics about a team you created. Inform everyone which one © the name of your alliance when you have one. Certain names will attract more players to your clan. Avoid inappropriate, vulgar or allied names that reveal your personal information. Look around the internet and/or other topics, for Alias names that have already been used. Copying names from other allies will bring reputation to your ally. © Squid? You eat dog © calamari every day, like fruits and vegetables all contain © squids and so on © the meat. In grab. io; However, you have to be a bigger size than the opponent and get close enough to consume. If the adversary © less than half its size, it may be enough to approach the opponent and pressure room to share the consumption of the adversary. However, you will be two dogs © squid for a while if you do it right or wrong. Question: How do you shoot at the top of a big dog © Squid? Press W to get rid of some of his mass and fire on the direction of a large dog © Squid. When the dog © Pointy squid reach maximum growth, it will split in the direction of the dog © Big squid, making the dog © Big squid splits. Ask after you split up, how's it going? © that you get back together? Just wait a few seconds, your sections will naturally merge again on their own. While waiting to get back together, find a safe place to wait, and avoid bigger players, as you are going to be more vulnerable. Question which button do you press to split up? If you want to split into two (or more, if you do several times) balls, press the space bar. If you are too small, however, nothing will happen. Question: How can you eat a peak without splitting? The van, or spike, is not © like the dog © Squid. You can't eat one. Bread © Smaller squids can hide in them while dog © Larger squid will explode when the plane touches. A question I saw some dogs © Big squids eat a peak or move over one and don't explode. How do you do that? It's much bigger than the peak. To be immune or even © even eat the peak, you need to be very large. You ask how to get small to big? Much go from small to large, you have to eat the little points and the other players that are smaller. Ask a question ad. *145a; wikiHow © a =wiki' similar to Wikipedia © day, which means that many of our articles are co-written by several authors.
