

I'm not a bot

Directions: 1. Hold the blue rubber grip and white wringer. 2. Twist the wringer clockwise and push down to release the lock, then lower the mop head to the floor in mopping position. 3. To wring out excess water, pull up the plastic wringer (don't lock it), twist it clockwise, and then press down to release. Removing Refill: 1. Remove Magic Eraser Scrubber by simply popping off the pad. 2. Spread the mop head material near the top of the mop to expose the metal handle and c-pin, then pull out the c-pin from the pole. 3. Squeeze the 2 blue buttons at the base of the plastic handle and slide the mop head up and off the pole. Washing: Follow the instructions for removing the mop head. 2. Machine wash in cold water, either separately or with other non-linting articles in a garment bag. 3. Air dry. 4. Do not use fabric softener or bleach on this product. Description: Easy ratcheting twist action; removable and machine washable mop head; super absorbent microfiber; Magic Eraser handles tough scuffs, making your floor know what hit it! Customer Support: Toll-free 1-888-318-8521, Monday to Friday, 9 am - 5 pm EST. Warnings: Caution: Keep out of reach of children and pets to avoid accidental ingestion. May cause eye irritation. Avoid contact with eyes. Do not use on skin or other parts of the body for personal cleansing; using it will likely cause abrasions. The Mr Clean Super Mop with Scrubber offers a comprehensive cleaning solution for various floor types, making it an essential tool for maintaining a pristine home environment. Its innovative design features a dual-functionality sponge mop and integrated scrubber that work in tandem to provide effortless cleaning and effective scrubbing action. The advanced sponge is designed for maximum water retention and dirt lifting, while the heavy-duty scrubber targets tough, dried-on messes. This combination delivers a one-two punch to dirt and grime, simplifying the process without compromising on cleanliness. Component Material Benefit Rod Aluminum Lightweight & Durable Sponge Cellulose Highly Absorbent & Eco-friendly Scrubber Non-Abrasive Mesh Safe for All Surfaces Cleaning your floors just got a whole lot easier with the Mr. Clean Super Mop and Scrubber! To get started, simply follow these easy steps to assemble and prepare your mop. First, attach the scrubber pad to the Velcro-like strips on the mop head base by pressing it firmly into place. Then, ensure all sections of the telescoping handle are fully locked in place for ergonomic comfort during cleaning. Before diving into your cleaning task, do a quick check to guarantee mop readiness: tug on the scrubber pad and confirm that it's securely attached, and make sure the mop head has full range of motion. With these steps completed, you're ready to tackle dirt and spills effectively! Start by preparing the area you intend to clean: remove furniture and rugs, sweep or vacuum loose debris, and fill the mop bucket with water and your preferred floor cleaner. For effective mopping, use a figure-eight pattern starting from the farthest corner, dipping the mop into the cleaning solution and wring it thoroughly between strokes. Regularly rinse the mop in the bucket to prevent spreading dirt, and change the cleaning solution when it looks dirty for a sparkling finish. When you need to tackle tough spots, simply transition to scrubbing by moving the mop in circular motions over the area. Sometimes, a simple mop won't cut it when dealing with tough stains. To overcome this challenge, follow these steps: Find the built-in scrubber on your mop head and place it directly onto the stain. Apply gentle pressure while moving the mop back and forth to break down the residue. Rinse the mop as needed to remove lifted dirt. Finish by mopping over the area again to clean up any remaining grime. By following these instructions, you'll be able to effortlessly maintain clean floors with your Mr. Clean Super Mop With Scrubber. Regular cleaning is crucial for maintaining your mop's performance and extending its lifespan. To keep your mop in top condition, wash it thoroughly after each use by rinsing the sponge or microfiber pad with warm water. If the mop head is detachable, soak it in a gentle cleaning solution for a few minutes before rinsing and air-drying. For proper storage, ensure your mop is completely dry and store it in a cool, dry place. Hang the handle to keep the mop off the ground and allow for air circulation. Regular maintenance checks are also important: inspect the handle and scrubber for signs of wear and tear, tighten loose parts, and occasionally disinfect the mop head. Before disassembling the handle, try to fix the jam by lubricating the moving parts with silicone spray or WD-40. If this doesn't work, refer to the Mr. Clean manual for guidance on disassembly and reassembly. Over time, the scrubber on your Mr. Clean Super Mop may wear out, requiring replacement: grip the scrubber plate, press the release button, and slide out the old one; insert a new scrubber into its housing, ensuring it clicks into place. If you encounter persistent mechanism jams or unclear instructions, contact customer support for assistance with warranty issues, mop defects, or premature wear. For suede surfaces like Yeezy 500, use a suede-specific cleaner or consult a professional for delicate care. To clean floors, dip the Mr. Clean Super Mop in a bucket of cleaning solution, squeeze out excess water, and glide it across the floor in a back-and-forth motion. After cleaning, rinse the mop head and wring it dry; yes, you can machine wash the mop head separately using mild detergent and air-dry it before reuse. To assemble the mop, connect the handle to the base, ensuring a secure click. The Mr. Clean Super Mop is safe for use on hardwood floors, designed to clean gently without scratching. Regularly replace the mop head for optimal performance, making floor cleaning with this tool feel effortless and satisfying. Replacing Mop Heads on Mr. Clean Mops Given article text here Mr. Clean's mops have different maintenance requirements depending on their type. Sponge mops, such as those from Mr. Clean, come with a built-in wringer that allows for easy cleaning. In contrast, traditional cotton mops require manual wringing or use of a bucket to remove excess water. Moreover, sponge mops like Mr. Clean do not damage hardwood floors even without protective coatings. Replacement mop heads are available on the official Mr. Clean website and can be easily installed by removing old head from paddle and attaching new one. Additionally, replacement parts for both traditional cotton mops and sponge mops are offered by the company. For replacing mop head on Mr. Clean Super Mop, user needs to grasp pin under mop's head, push onto pointed end of the pin, lift connector upwards while pulling grip downwards, slide assembly downward from handle, insert new head into handle return connector, and finally push pin back into hole.
