All 2024 Neo QLED, Crystal UHD, Frame TV, and Smart Monitors. All 2024 Neo QLED, Crystal UHD, Frame TV, and Smart Monitors. All 2024 Neo QLED, Crystal UHD, Frame TV, and Smart Monitors. All 2024 Neo QLED, Crystal UHD, Frame TV, and Smart Monitors. All 2024 Neo QLED, Crystal UHD, Crystal UH TU8000 and above Crystal UHD, Frame TV, The Serif, The Sero, and The Terrace. The following TVs allow you to talk to Alexa hands free:Note: When talking to Alexa, you need to be within five feet (one and a half meters) of the remote. You can also talk to Alexa using the microphone button on your remote. 2023 models: QN800C, QN850C, QN85 QN95C(D), QN90C(D), QN85C(D), S95C(D), S95C(D), S95C(D), Q80C(D), Q70C(D) 2022 Models: QN900B, QN850B, QN95B(D), QN850B, QN95B(D), QN850B, QN950A, QN850A, QN8 Q850T, Q90T, Q80T, Q8DT, Q7DT, Q7DT Youll be able to select Alexa as your voice assistant when you set up your TV's Home screen. Make sure you have your Amazon account information handy before starting. If you do not have an Amazon account, you can create one for free during the setup process. First, you need to sign in to your Amazon account on a connected phone. There are two ways to do this: Scan the QR code displayed on your TV with the Camera app on your phone to be taken to Amazon. From there, you can sign in. Alternatively, you can, go to the Amazon sign-in page and enter the authorization code displayed on your TV. If your TV supports the Voice wake-up option, you can enable it and talk to Alexa hands-free compatible models. You can turn off Voice wake-up at any time by navigating to Settings, selecting General, and then selecting Voice Settings.Note: On some models, you will need to navigate to Settings, select General, and then select Voice. When everything is set up, you can talk to Alexa and giving voice commands. To use Alexa through another device such as an Echo speaker, download the Alexa app on your phone and enable the SmartThings skill. Now that Alexa is set up, you can begin talking and asking questions. To speak to Alexa, press and hold the Microphone button on your remote. If you have Voice wake-up enabled, just say "Alexa," and then ask a question. Alexa is set up, you can begin talking and asking questions. To speak to Alexa, press and hold the Microphone button on your remote. If you have Voice wake-up enabled, just say "Alexa," and then ask a question. play music, and more. Here are some things to try: Alexa, go to [channel number/name]. Alexa, open [app name]. Alexa, play [radio station name]." Alexa, play [radio station name]." Alexa, play [genre] music." "Alexa, play [radio station name]." Alexa, play [radio station name]." Alexa, play [radio station name]." Alexa, play [genre] music." "Alexa, play [radio station name]." Alexa, play [radio sta Alexa app on your TV. Amazon has designed Alexa with your privacy in mind, plus multiple layers of protection. Youll have transparency and control over your Alexa, youll need to alert your remote by saying the wake word, which is Alexa. Or, you can press and hold the Microphone button on your remote. Only then will your voice be recorded and transmitted to Amazon's secure cloud. All of your interactions with Alexa are encrypted in transit to Amazon's be able to tell when Alexa is listening to your recording because a blue indicator bar will appear on the bottom on your TV screen. You can view, hear, and delete your voice recordings using Alexa, tell me what you heard" are cording using your voice, just say, Alexa, delete everything I said today. "Ever wonder why Alexa app on your phone. To delete a recording using your voice, just say, a lexa, delete everything I said today." Ever wonder why Alexa, delete what I just said today. "Ever wonder why Alexa Alexa will read back your most recent voice request. You can also ask, "Alexa, why did you do that?" and Alexa on your TV, you can check out Alexa Privacy and Common Questions About Alexa Privacy. If youre experiencing issues when using Alexa on your TV, you can check out some of these helpful links. Alexa Account Preferences Additional information for download the Alexa app on your phone or PC to pair it with SmartThings. You can create Routines, manage devices, set up Alexa-enabled devices and Alexa Account is required for network-based smart services, including streaming apps and other smart features. A separate (connected) computer, mobile, or other device connections (e.g., via HDMI) and terrestrial/over-the-air TV (only for TVs with tuners) are available. If you do not have a Samsung Account, you can easily create one here: its free to sign up; terms apply. Samsung UN70TU700DBXZA 70" Class TU7000 Crystal UHD 4K Smart TV (2021) - Use Manual - Use Guide Smart TV (2021) - Use Manual - Use Guide Smart TV Gui Connections You can watch live broadcasts by connectors, you can also connect external devices to the Internet by using a LAN cable or wireless access point. Using various connected to the TV. > Source > Connection Guide It shows you how to connect various external devices, such as video devices, game consoles, and PCs using pictures. If you select the connection details appear. Audio Device: HDMI (eARC), Optical, Bluetooth, Wi-Fi, Wi-Fi Speaker Surround Setup Note: HDMI (aRC) is supported by some models. Check the HDMI port name of the purchased product's model. Video Device: HDMI Smartphone: Screen Sharing (Wireless), Apple AirPlay, Tap View PC: HDMI, Screen Sharing (Wireless), Apple AirPlay, Apple AirPlay Drive, Hard Disk Drive (HDD) Note: The connection method and available external devices may differ depending on the model. Using HDMI Troubleshooting, you can check the connection to HDMI cable and external devices (takes approximately 2 minutes). The image on your TV may differ from the image above depending on the model and geographical area. Connecting an Antenna You can connect a coaxial cable to your TV. Note: An antenna connection is not necessary if you connect a cable box or satellite box. Connecting to the Internet through your TV. > Settings > General > Network > Open Network Settings to connect to an available network. Establishing a wired network connection > Settings > General > Network Settings > Wired If you connect to the network, refer to "Network Issues" in "Troubleshooting." Use a CAT 7 (*STP type) cable for the connection. The TV will not be able to connect to the Internet if your network speed is below 10 Mbps. This function may not be supported depending on the model. Establishing a wireless network connection > Settings > General > Network > Open Network Settings > Wireless Make sure that you have the wireless access point's SSID (name) and password settings before attempting to connect. The network name (SSID) and security key are available on the wireless access point's user manual for more information. Note: The image on your TV may differ from the image above depending on the model and geographical area. If no wireless access point is found, select Add Network at the bottom of the list, and enter the network name (SSID). If your wireless access point has a WPS or PBC button, select Use WPS at the bottom of the list, and then push the WPS or PBC button. connected network names (SSIDs), move the focus to Manage Saved Networks, and then press the Select button. Checking the network and Internet status. Resetting Your Network > Network > Network > Network Restore the network settings to the factory default. Turning on the TV with a mobile device > Settings > General > Network > Expert Settings > power On with Mobile You can turn on the TV using a mobile device connected to the same network as the TV. Note: This function is available with a mobile device > Settings > General > Network > Expert Settings > Device Connected to the same network as the TV. Note: This function is available with a mobile device connected to the SmartThings app or the Apple AirPlay function. Connecting an IP control device to the TV > Settings > IP Remote You can connect an IP control device to the TV remotely to manage your IP device. Note: To use this function, Power On with Mobile must be turned on. Turning this feature on may allow other IP control devices to control your TV. We recommend turning this feature on only if an authorized third-party custom controller is installed and configured specifically for a Samsung TV and if your Wi-Fi network is password protected. This function may not be supported depending on the model. Changing the name of the TV > Settings > General > System Manager > Device Name You can change the name of the TV on the network. Select User Input at the bottom of the list and change the name. Connection cables for external devices that can be connected to the TV. Note: Available connection cables may differ depending on the model or geographical area. TV Viewing You can use convenient features while watching TV. Additionally, you can edit the channel lists. Using the Guide See an overview of each channel lists. Using the model and geographical area. In the Guide, you can see the daily program schedules for each station, see program information, choose a program to watch, and set up a schedule viewing. Note: To view the Guide while watching TV, press the (Channel) button on the standard remote control. To see information about analog channels and use the analog channel functions of the Guide, you must finish the service provider settings in initial setup. To view the focus to the program you want in the Guide, and then press and hold the Select button. You can use the following functions: Schedule Viewing You can schedule the viewing of a broadcast scheduled program. Cancel scheduled viewings. View DetailsSee other models: UN70TU6980FXZA UN70TU6980FXZA UN70TU6985FXZA NP950QDB-KB4US NP950QDB-KB3US You can see detailed information about the selected program. The information may differ or may not be provided depending on the broadcast signal. TV-Viewing Support Functions Use the functions that are available while watching TV. Changing the broadcast signal. TV-Viewing Support Functions Use the functions that are available while watching TV. press the Select button. Note: You do not need to use this function if your TV is connected to a cable box or satellite box. Scanning for available channels > Broadcasting > Auto Program Mote: Do not use this function if your TV is connected to a cable box or satellite box. If the TV has saved channels, Auto Program Mote: Do not use this function if your TV is connected to a cable box or satellite box. and then saves the newly scanned channels. Using Program Rating Lock > Settings > Broadcasting > Program Rating Lock Settings This function is useful for controlling what programs children can watch on the TV based on their ratings. Program Rating Lock Settings does not, however, block programs originating from external sources, such as Blu-ray players, DVD players, or USB files. Every time you access Program Rating Lock Settings, you must enter the security PIN. You must also enter this PIN to watch a blocked program. The default PIN is "0000." To change the PIN, go to > Settings > General > System Manager > Change PIN. Note: Program Rating Lock Settings may not be supported depending on your input signal. For more information about how to set your password, refer to "Blocking programs based on their TV Rating." Watching blocked / restricted programs To watch a blocked program, enter the PIN when requested. When initially showing a restricted program or movie, the screen is blank because the Program Rating Lock Settings blocks it. Enter the PIN to unblock the program when a message appears requesting the code. Enable Data Service > Settings > Data Service > Settings > Data Service Access services from entertainment providers, online providers, and CE manufactures through Data Service. Note: This function may not be supported depending on the model or geographical area. Some channels may not include the Data Service. You can use the following functions: Data Service Enable or disable data services and service. Browsing Enable Private Browsing to stop the browser from saving your Internet history. Delete Browsing Data Delete all saved cookies. If you want this function enabled or disabled, use the Data Service menu item to turn it on or off. Note: An application on broadcast channel may malfunction temporarily depending on the circumstances of the broadcast station or application provider. Configuring advanced broadcasting > Broadcasting > Broadcasting > Broadcast signal. Multi-Track Sound You can select the multi-track sound function depending on broadcasting signal. Note: This function may not be supported depending on the model or geographical area. Checking digital channel signal info and strength > Settings > Support > Device Care > Self Diagnosis > Signal Information Note: If your TV is attached to a separate, over-the-air antenna, you can use the signal strength information to adjust the antenna for increased signal strength and improved HD channel reception. This function may not be supported depending on the geographical area. Picture and Sound Using the Sound Support Functions Configure the sound settings for your TV. Selecting speakers > Settings > Sound > Sound Output You can select which speakers the TV uses for audio output. Note: Refer to the sound bar's user manual when connecting it to the TV. External speakers may not be controlled with the Samsung Smart Remote. When an external speaker is enabled, some sound menus are not supported. Listening to the TV through Bluetooth devices > Settings > Sound > Sound Output > Bluetooth function. Refer to the user manual for your audio device such as Bluetooth speaker, sound bar, and headphones for detailed connection and usage. Note: If the TV fails to find a Bluetooth audio device, place the device closer to the TV, and then select Refresh. When you turn on a paired Bluetooth audio device, the TV detects it automatically, and then displays a pop-up window. Use this pop-up window to activate or deactivate the Bluetooth audio device. The sound quality may be affected by the condition of the Bluetooth connection. Before using a Bluetooth audio device, refer to "Read Before Using Bluetooth Devices." This function may not be supported depending on the model. Listening to the TV through a Samsung audio device that supports the Wi-Fi function For more information about how to connect and use a Samsung audio device that supports the Wi-Fi function, refer to its user manual. > Settings > Sound > Wi-Fi function to the TV, you can create an optimal sound set up by configuring the surround effect settings. You can select any of the surround sound configurations, with or without a sound bar. A surround sound configuration can be used if all of the following conditions are met: Two or more Samsung wireless network. The Samsung audio devices that support the Wi-Fi function must be connected to the same wireless network as the TV. Note: Surround sound configurations with a sound bar may not be supported depending on the product. If you activate the Screen Mirroring function, the Wi-Fi function, the Wi-Fi function, the Wi-Fi function will a sound bar may not be support the support of the su the device type. Troubleshooting If you have a problem with your TV, you can access various solutions while watching TV. If your problem is not addressed in the Troubleshooting section, view the FAQ section or contact the Samsung Call Center. Picture Issues When the TV has trouble with the picture, these steps may help resolve the problem. Testing the picture > Settings > Support > Device Care > Self Diagnosis > Start Picture Test Before you review the list of problems and solutions below, use Start Picture Test to determine if the problem is caused by the TV. Picture Test displays a high definition picture you can examine for flaws or faults. Flickering and Dimming If your TV is flickering or dimming sporadically, you may need to disable some of the energy eficiency features. Disable Ambient Light Detection > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Settings > General > Eco Solution > Ambient Light Detection, Power Saving Mode > Setting Solution > Motion Lighting > Settings > General > Eco Solution > Contrast Enhancer Run Picture Test. When the tested image quality is normal, check the signal of the connected device. > Settings > Support > Device Care > Set Diagnosis > Start Picture Test. or the black and white colors are off, run Start Picture Test. > Settings > Support > Device Care > Self Diagnosis > Start Picture Test If the test results indicate that the problem is not caused by the TV, do the following: When using the component cable, confirm that the green (Y), blue (Pb), and red (Pr) jacks are plugged into their proper connectors. For more information about how to connect an external device, run Connection Guide. > Source > Connection Guide Screen Brightness If the colors on your TV are correct but just a little too dark or bright, try adjusting the following settings first. > Settings > Picture > Expert Settings > Direct Settings > Brightness Picture > Expert Settings > Sharpness > Settings > Picture > Expert Settings > Picture > Picture > Picture > Pictu Unwanted Powering Off If your TV appears to turn off by itself, try disabling some of the TV's energy eficiency functions. See if Sleep Timer has been enabled. The Sleep Timer has not been enabled, see if Auto Power Off or Off Timer has been enabled and disable it. > Settings > General > Eco Solution > Auto Power Off > Settings > General > Eco Solution > Auto Power Off > Settings > General > System Manager > Time > Off Timer Problems Powering On If you are having problems powering on your TV, there are a number of things to check before calling the service department. Confirm that the TV's power cord is connected correctly at both ends and that the remote control is operating normally. Make sure that the antenna cable or cable box or satellite box, run Auto Program. > Settings > Broadcasting > Auto Program When using a broadcast receiver such as set-top box and IPTV, check the connection to the TV. > Source > Connection Guide When the symptom persists, contact your service provider. The TV image does not look as good as it did in the store Store displays are tuned to a digital UHD channel or service provider. HD channel. Change the output resolution of your devices, such as digital broadcast receiver, IPTV, and set-top box to UHD or HD. Be sure to use an HDMI To connect the TV with your PC, make sure that your PC's graphic card supports UHD resolutions. For more information about the supported UHD resolutions, refer to "Supported Resolutions for UHD Input Signals." Note: Make sure that the set-top box or cable box supports the content or broadcast for UHD and set the resolution. For more information, contact your service provider. When using a Samsung TV Plus channel, check the network connection. When the network speed is slow, the app may not work or the image quality may be poor. The picture is distorted The compression of video content may cause picture is distorted to may be visible but it is not a malfunction. Mobile phones used close to the TV (within 3.2 ft) may cause noise on analog and digital channels. The color is wrong or missing If youre using a Component cables are connected to the correct jacks. Incorrect or loose connections may cause color problems or a blank screen. The color is poor or the picture is not bright enough Go to Picture and then adjust the Picture Mode, Brightness, Sharpness, and Color settings > Picture > Expert Settings > Picture > been enabled. > Settings > General > Eco Solution > Power Saving Mode Try resettings > Picture > Expert Settings > Picture > Expert Settings > Picture > Pic composite cable when you connect AV equipment to the TV. If you are using the composite cable, connect the video cable (Yellow) to the VIDEO (Yellow) to t either side of the screen when displaying upscaled SD (4:3) content. Black bars will appear at the top and bottom of the screen when your attend to full screen. > Settings > Picture Size Settings > Caption function in the TV menu is deactivated When an external device is connected with an HDMI or Component cable, the Caption function in Caption function in Caption Settings > General > Accessibility > Caption Settings > Caption Settings > General > Accessibility > Caption Settings > Caption Settings > General > Accessibility > Caption Settings > Ca Caption The HDR of the connected external device turns off Expand the reception range of the corresponding HDMI input signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > Settings > General > External Device Manager > Input Signal Plus. > Settings > General > Settings for assistance. If the test picture is displayed properly, there may be a problem with an external device. Please check the Signal Information or refer to the external devices user manual. Sound and Noise Issues When the TV has difficulties with sound, these steps may help resolve the problem. Testing the sound > Settings > Support > Device Care > Self Diagnosis > Sound Test If the TV plays the Sound Test melody without distortion, there may be a problem with an external device or the broadcast signal's strength. How can I connect an audio device to the TV? The connection method may differ depending on the audio device, such as HDMI (eARC), Optical, Bluetooth, and Wi-Fi. Note: HDMI (ARC) is supported by some models. Check the HDMI port name of the purchased product's model. For more information Guide > Audio Device, run Connection Guide. > Source > Connection Guide > Audio Device, run Connection Guide. > Source > Connection Guide. > the volume control of your TV, and then check the volume control of the external device (cable box or satellite box, DVD, Blu-ray, etc.) connected to your TV. When using a set-top box or cable box, check the broadcast signals or the PC and TV. When the Symptom to the external device. The PC and then reconnect the HDMI cable between the PC and TV. When the symptom persists, check that the PC is in Sleep mode. When the set resolution is not matched, the screen may flickers For the PC supported resolutions).' Network Issues When the TV has difficulties connecting to the network, these steps may help resolve the problem. > Settings > Support > Device Care > Self Diagnosis > Smart Hub Connection Test If the TV has trouble with network connection or TV services, check the Smart Hub connection failed. Unable to connect to a wireless access point. Make sure that no items that can generate electromagnetic interferences are placed between the TV and the wireless/wired access point. Check if the access point is turned on. If it is on, turn it off, wait 1 or 2 minutes, and then turn it on. Enter the correct password if required. If the wireless connection fails, connect the TV to the access point via a LAN cable. If the TV can connect to the Internet normally via the wired connection, there might be a problem with the access point. In this case, try using a different access point. Wired network connection failed. Unable to connect to the network. Check if the LAN cable is plugged in on both ends. If it is plugged in, check if the access point is on, turn it off, wait 1 or 2 minutes, and then turn it off, wait 1 or 2 minutes, and then turn it off, wait 1 or 2 minutes. Internet LAN cable is connected to the access point's external LAN port. Check the DNS settings > General > Network Status > IP Settings > General > Network setup is completed, but unable to connect to the Internet. If the problem persists, contact your Internet service provider. Note: Wired networks are not supported by some models. Anynet+ (HDMI-CEC) isn't working, these steps may help resolve the problem. What is Anynet+? You can use the TV's remote control to control external devices that support Anynet+ (HDMI-CEC) and that are connected to the TV via an HDMI cable. For example, if a connected external device supports Anynet+, you can have the connected device turn on or off when you turn the TV on or off. Anynet+ device is an Anynet+ device is properly connected. Check the cable connections of the Anynet+ device. Go to Anynet+ (HDMI-CEC) and see if Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > General > External Device Manager > Anynet+ (HDMI-CEC) has been set to On. > Settings > General > devices again or turn your TV off and on. I want to start Anynet+. I also want the connected devices to turn on when the TV is turned on. Move the Anynet+ device at > Source, press the up directional button to move to the TV, and then select Anynet+ (HDMI-CEC) is set to On. > Settings > General > External Device Manager > Anynet+. It is inconvenient to turn on other devices because the TV also turns on. It is inconvenient to turn on other devices (e.g. set-top box) turn off together. To turn off the Anynet+ function of a device connected to the TV, turn off the Anynet+ (HDMI-CEC) function of the device. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) is turned off, the sound bar connected via the HDMI (eARC) port does not turn off and on together with the TV. To prevent a specific device connected to the TV from turning off automatically, turn off the HDMI-CEC function on a specific device connected to the TV. Note: HDMI (ARC) is supported by some models. Check the HDMI port name of the purchased product's model. The message "Connecting to Anynet+ device" appears on the screen. You cannot use the remote control when the TV is configuring Anynet+ or switching to the TV viewing screen. Use the remote control after the TV viewing screen. Use the remote control after the TV is configuration or has switched to the TV viewing screen. device is not displayed. Check whether the device supports Anynet+. Anynet+ devices must be connected to the TV using an HDMI cable. Some HDMI Anynet+ (HDMI-CEC) has been set to On. > Settings > General > External Device Manager > Anynet+ (HDMI-CEC) Scan for Anynet+ devices again. If the connection is terminated because there has been a power failure or the HDMI cable has been disconnected, please scan for the device again. Remote Control Issues When the remote control isn't working, these steps may help resolve the problem. The remote control does not work. The connection between the Samsung Smart Remote and the TV may be lost. Also, if the remote control is not working or slow, the batteries are recommended for longer battery life. External devices cannot be operated with the TV remote control. Check the cable connection between the TV and external devices. When apps aren't working, these steps may help resolve the problem. I launched an app, but it's in a different language. How can I change the language? Languages supported by an app may be different from the TV Language set in the menu. The ability to change the language depends on the app may not work or its image quality may be poor. The services of your application are not provided by the TV but by the application service provider. Refer to the Help section on the application service provider. Some files are interrupted during playback. This problem may occur with unsupported files or highbitrate files. Most files can be played back, but some files may not play smoothly. Some files can't be played. Some files that use an unsupported codec is supported codec may not be played back. Make sure that the codec is supported by the TV. For more information about the support of the Issues When the Voice Assistant isn't working, these steps may help resolve the problem. The voice commands do not work well. Voice Assistant. Bixby: > Explore Now Amazon Alexa: > Settings > General > Voice > Amazon Alexa Settings Google Assistant: > Settings > General > Voice > Google Assistant Settings With Samsung Smart Remote, the following features are available except for voice recognition. There is no response even if the voice entry button is pressed. Try pairing the remote control with the TV. During voice recognition, the heavy load message appears and the function does not work. Unplug and then plug the TV power cable and then try again after 1 minute and 30 seconds. It may take a while if the voice recognition server is being inspected. I want to see weather information of the desired area. Say with the area name included. Other issues that may occur in relation to the product. The TV is hot. Watching TV for an extended period of time causes the panel to generate heat. The heat from the panel is dissipated through internal vents running along the top of the TV. The bottom, however, may feel hot to the touch after extended use. the TV. This heat, however, is not a defect and does not affect the TV's functionality. The TV smells like plastic. This smell is normal and will dissipate over time. The settings are lost after 5 minutes. Change Usage Mode to Home Mode. > Settings > General > System Manager > Usage Mode The TV is tilted to the side. Remove the base stand from the TV and reassemble it. The stand is assembled correctly. PIP is not available. PIP is available only when an external device is connected with an HDMI or Component cable. Note that the function is unavailable when Smart Hub is active. Note: This function may not be supported depending on the screen. Change Usage Mode to Home Mode. > Settings > General > System Manager > Usage Mode The TV is making a popping noise. The expansion and contraction of the TV's outer casing may cause a popping noise. Your TV utilizes high-speed switching circuits and high levels of electrical current. Depending on the TV's brightness level, the TV may seem slightly noisier than a conventional TV. Your TV has undergone strict quality control procedures that meet our demanding performance and reliability requirements. Some noise coming from the TV is considered normal and is not an acceptable cause for an exchange or refund. The software update over the Internet has failed. Check the network connection status. > Settings > General > Network > Network Status If the TV is not connected to a network, connect it to a network, connect it to a network. The upgrade stops if you already have the latest software version. The TV narrates the screen events in voice-over. To turn off Voice Guide, move the focus from Accessibility Shortcuts to Voice Guide and then press the Select button. You can turn on or off Voice Guide. To run Accessibility Shortcuts, see the following: Press and hold the (Volume) button or press and hold the MUTE button on your standard remote control. > Settings > General > Accessibility > Voice Guide Settings > Voice Guide Diagnosing TV operational issues You can diagnose issues with your TV and Smart Hub and run reset functions. > Settings > Support > Self Diagnose issues and the Sound Test to help diagnose video issues and the Sound Test to help diagnose video issues and the Sound Test to help diagnose issues and the Sound Test to help diagnose video issues and the Sound signals, test the Smart Hub network connection, and run the Smart Hub and TV factory reset functions. In 2023, connecting Alexa to your Samsung smart TV is easier than ever. It really just takes a few seconds and you should be all set. That said, setting up Alexa to your Samsung smart TV will be harder if you're using an older TV. While the best Samsung TVs made between 2020 and 2023 shipped with the option built-in, for access either via the remote or hands-free, older Samsung smart TVs require a bit more work to connect Amazon's smart assistant. While you certainly can connect Alexa to older Samsung smart TVs, the functionality on offer will also vary depending on your model: newer TVs have a wider selection of capabilities, while older models will be more limited. That means for those older TVs, Samsung smart TV? Check out our picks of the best Alexa compatible devices for inspiration. As we've mentioned, if you've got a newer Samsung TV model, like the one from our list of the best TVs, the likelihood is it will already have Alexa built-in. If you're unsure if your TV is included, this is the list of compatible TVs:2023 Smart TVs, Odyssey Ark, and OLED G8All 2021 Smart TV models2020 8k and 4k QLED TVs2020 The Frame, The Serif, The Sero, and the Terrace TVs2020 TU8000 and above Crystal UHD TVsWith these TVs, there's no need to use a paired smart speaker, because you can use the microphone in the remote control to access all of the same Alexa skills and voice interactions you're used to Get instant access to breaking news, the hottest reviews, great deals and helpful tips. This includes checking the weather or asking questions, as well as more TV-centric actions, like changing the channel or searching for movies. To learn how to set up the Amazon voice assistant on your newer Samsung smart TVs, check out our guide How to connect your Samsung TV to Alexa. (And if you're more of a Google fan, check out How to connect your Samsung TV to Google Assistant.) The advice below is strictly for older Samsung smart TVs that didn't have this capability built-in, but could still be connected to an Amazon smart speaker for very basic voice control. How to connect your Samsung smart TV to AlexaStep 1: Set up your devices. First, make sure that both your Samsung TV and your Amazon Alexa device are set up and workings. Once you complete the initial setup on the TV as a Thing (Samsung's Amazon Alexa device, you'll also need to set up the TV as a Thing (Samsung's Amazon Alexa device) are connected to the same Wi-Fi network. If you haven't yet, download both the Samsung SmartThings app (available for iOS and Android) and the Amazon Alexa app (also for iOS or Android). And if you're unsure of how to use Amazon's voice assistant app, check out our handy guides for using Alexa on your TV is Samsung account information you used for your TV is Samsung account and your Echo's Amazon account. Step 3: Discover your TV in the SmartThings app.First, you'll need to discover your Samsung TV in the Samsung SmartThings app, which lets you treat it as a basic connected smart device when connecting it to your Alexa speaker. To do this, go to the Devices menu, found on the bottom menu of the app.On the Devices menu, found on the Samsung TV in the Samsung SmartThings app. Which lets you treat it as a basic connected smart device when connecting it to your Alexa speaker. To do this, go to the Devices menu, found on the bottom menu of the app.On the Devices menu, found on the bottom menu of the app. Context app. The Devices menu, found on the Devices menu of the app. Context app. The Devices menu of the app. Context app. Co it should be easy to find your device in the list. Once you've found the device and paired your phone to the TV, select the Samsung Smart TV and use the toggle button next to its name to enable its use as a smart device. Step 4: Discover your smart speaker in the Alexa app. Second, you'll need to be sure that your Amazon Echo, Echo Dot or other Amazon device has been discovered in the Amazon Alexa app. If it hasn't, or if the device is set up through someone else's phone, you'll need to do the following. (Skip to the next step if this doesn't apply to you.) In the app, select the Devices button from the menu at the bottom of the home screen. If the Echo (or similar Alexa device) shows up in this menu, then you're all set. If not, open the All Devices menu option and find your Alexa app. Once you've enabled the Samsung SmartThings skill, and sign in with your Samsung account to link the accounts. Step 6: Select your TV in the Alexa app. Once you've enabled the Samsung SmartThings skill which should automatically pair Alexa to the TV you're all set. Congratulations, you have just connected your Samsung smart TV to Alexa!What Alexa commands can I use?Now you're all set up, the only thing that's left to know is what exactly you can get Alexa to do. In the list below are the basic commands that you can use via Alexa with older Samsung smart TVs:Alexa, turn [on/off] the TV.Alexa, channel [up/down] on the TV.Alexa, go to [channel number] on the TV.Alexa, channel [up/down] on the TV.Alexa, channel [up/down] on the TV.Alexa, play/pause/rewind/fast forward] on the TV.Alexa, turn [on/off] the TV.Alexa, channel [up/down] on the TV.Alexa, play/pause/rewind/fast forward] on the TV.Alexa, Alexa.
