How do i get the old version of instagram on my iphone

You are browsing old versions of Instagram. Here you will find APK files of all the versions of Instagram available on our website published so far. Latest Version: ProMotion display a major draw for 'iPhone 13,' says survey 41 minutes ago iPad revenue is up, but are sales down because of the M1? 1 hour ago How to delete an Apple ID account 2 hours ago Bringing you closer to the people and things you love - Instagram from FacebookConnect with friends, share what you're up to or see what's new from others all over the world. Explore our community where you can feel free to be yourself and share everything from your daily moments to life's highlights.Express yourself and connect with friends* Add photos and videos to your story that disappear after 24 hours, and bring them to life with fun creative tools.* Message your friends with Messenger. Share and connect over what you see on feed and Stories.* Create and discover short, entertaining videos on Instagram with Reels.* Post photos and videos to your feed that you want to show on your profile.Learn more about your interests* Go to IGTV for longer videos from your favourite creators.* Get inspired by photos and videos from new accounts in Explore.* Discover brands and small businesses, and shop products that are relevant to your personal style.Some Instagram features may not be available in your country or region. The latest version contains bug fixes and performance improvements. I get the fact that Instagram wants to expand its user base remarkably and grab all the traffic of tiktok. But then you can't disrespect your old people who have been following your old algorithm and have grown at a snails pace in last two years. We have invested so much money and energy to reach where we are today. I am still struggling to get my 2000 followers to reach 30k since one month. And new accounts are touching 100 in a week. Are you trying to mock at us Instagram? What are you up to? Sorry but we can simply shift to reels like that. It works on a different algorithm plus we can't droop to that level and create mindless videos which doesn't impart any value other than fun. Had we loved tiktok why would we have remained so consistent with you. Plz do something for your old accounts as well. Or else we might leave your platform and go elsewhere. Many have started leaving as well. Instagram has become nothing less than a garbage now with stupid jokes and vulgar dances etc... Please respect your old and basic work ethics. Thanks. These is 4th time happen in last few days and your team didn't support.I'm a very regular and a very fond user of Instagram. I never really had any complaints but from yesterday my Instagram account faces problem regarding action block and I didn't logged off but your app msg shows that I logged off when I logged in through the app but it said that the account has been compromised as I have shared my account details with a third party which was not the case by the way . I was asked to change my password and I change it then my all action was blocked like I can't like any picture of my followers and unable to send requests, accept the request and comment it has been block for 7 days . This is very frustrating I reported so many times but didn't get any solution and I mailed also but didn't get reply . I have never violations any community guidelines of social media playform. I'm not involved in third party app . I request you to review my account again and recify this issue as soon as possible. It happens two times I reported so many time but didn't get any solution from your team. If this happens more than you will be losing your users soon. Thank you Hi there , Instagram has introduced reels and that's very appreciative for us but something is wrong with my instareels . I m not able to record 30 sec videos as I m not having option for that only 15 sec is given to my reel . And this is like a fool of me bec everyone is having all functions all features so why not me ?? Most of the times I wanted to make videos of 30 sec but I can't bec I m not having that why this happens to me ?? Why this inequality?? If u want to launch things then launch them properly so that everyone will get proper functions and features . And m adjusting always on 15 sec but some videos , some sounds can't be done in 15 sec and tell me one thing why to adjust ?? If insta reels is for everyone , everyone is having proper arrangements so why not me ?? If m having adjustments what is the benifit of ur being ur big name INSTAGRAM kindly help me out of this and offer 30 sec option on reels of mine now this is really become trouble . Help me out Instagram. The developer, Instagram, Inc., indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The following data may be used to track you across apps and websites owned by other companies: Contact Info Identifiers Other Data The following data may be collected and linked to your identity: Health & Fitness Purchases Financial Info Location Contact Info Contacts User Content Search History Browsing History Identifiers Usage Data Sensitive Info Diagnostics Other Data Privacy practices may vary based on, for example, the features you use or your age. Learn More Developer Website App Support Privacy Policy Instagram is one of the very popular social media platforms that people use nowadays, as it lets its users do more than just take and share photos and videos. Unlike Facebook and Twitter, Instagram makes sure that your photos are the center of attention, with its simple and straightforward interface. It also features different filters and effects that users can use to improve their photos.Express yourself betterInstagram's functions are no longer limited to posting, sharing, liking, and commenting on photos and videos. It is now also capable of showing daily and by-the-minute updates through Stories, which can either be a photo, video, or a simple text poster. The app also took in face filters and added it to their fat list of features. There are other special effects that users can enjoy when posting stories, such as dramatic zoom-ins, geo-tags, and background music. Instagram may not have the same noisy feed that Twitter and Facebook have, but expressing yourself through your photos and videos is also a great way for you to share your thoughts, hobbies, and other interests with others.Discover and exploreAs mentioned, while it is not the perfect tool for expressing yourself through words, Instagram still has a Facebook-style feed, where you can view all the uploaded media from both your own personal photo collection and the people you follow. It is a great way to get acquainted with other users' interests, which might also help you develop a passion for new things. With that said, Instagram is equipped with an Explore feature, where you can find posts and stories that are somehow related to your own interests. The content you will find in this tab are based on your commonly-liked posts. However, if you have a specific idea in mind, you can always just look it up using the search bar. The results are sorted according to Instagram users, tagged places, and hashtags used in the post to make it easier for you to find what you are looking for—whether it is the profile of a famous actor, a good vacation spot for the coming holidays, or delicious and mouth-watering desserts. Instagram TVInstagram TV works just like YouTube except it specializes on featuring vertical or portrait videos. Instagram also lets its users upload videos of longer length, compared to the 1-minute limit of regular timeline posts and 15-second limit of Instagram Stories. With Instagram TV (IGTV), users are allowed to upload videos with a minimum of 15 seconds and a maximum of 10 minutes. It is dedicated completely to lengthy vertical videos that you cannot upload as a Story or a regular post. This is actually another really good way to be able to share more of your interests to your followers and other users. IGTV is often used by influencers, famous celebrities, and travel bloggers. Of course, whatever you want to do with your channel is completely up to you.Record your ReelsHowever, for something that can compete with the likes of TikTok, you can try out Reels. This feature is similar to Stories and IGTV but is permanent by default and can be found in the Explore tab for browsing. You can create and edit 15-second multi-clip videos with it, using editing tools like Audio, Speed, Effects, and Timer. These can easily be found on the left side of the screen.Simply open your IG camera and choose it at the bottom to start recording. The audio for a reel can either be chosen from the IG music library or from another reel. It has access to other features, as well, such as stickers, text option, drawing tool, augmented-reality effects, and more. It can be shared either publicly or privately, and can even behave like a Story and disappear after 24 hours.Experience InstagramInstagram is an app that has a lot to offer besides posting and sharing. Many artists use this social media site as a portfolio or tool where they could influence and inspire others through images. A picture is worth more than a thousand words and Instagram's basic function as photo-sharing platform is a testament to this. By letting you apply filters and do simple adjustments to your pictures, Instagram is allowing you to add your own personal touches. You can create and share wonderful content, discover the simple pleasures in life, and preserve unforgettable memories through your uploaded photos and clips. Transform your everyday photos and videos into works of art and share them with your family and friends.See the world through somebody else's eyes by following not only the people you know, but inspirational Instagrammers, photographers, athletes, celebrities and fashion icons. Every time you open Instagram, you'll see new photos and videos from your closest friends, plus breathtaking moments shared by creative people across the globe.Use Instagram to:* Edit photos and videos with free, custom-designed filters.* Improve photos with 10 advanced creative tools to change brightness, contrast and saturation as well as shadows, highlights and perspective.* Find people to follow based on the accounts and photos they already love.* Make videos look cinematic with Instagram's custom-built stabilization.* Instantly share photos and videos on Facebook, Twitter, Tumblr and other social networks.* Connect with Instagrammers all over the world and keep up with their photos and videos.* Send private photo and video messages directly to friends.* Use Handoff to switch between your Apple Watch and your iPhone Go to the App Library (All versions you've backed up would show up here) > choose the old version of Messenger you prefer > click the Install button to install Messenger old version to your iPhone.
