The title of your book, where are the yachts of customers? Refers to an old joke: a tourist is being shown all extravagant boats in the harbor, and it is said: Å ¢ Å ¢ ~ ~ Bankers yachts and these are stock yachts. When he asks, Innocently Å ¢ "Where are customer yachts?" He is informed that there was no (in other words, clients did not get rich in the actions market). Schwed is far from being a conk, however. He is not saying that investment is useless, or that private investors never make money. Instead, he is launching doubts on the capacity of the financial services sector. Provide any really valuable advice to your customers. In the last few days, large steps were made in the understanding understanding of financial markets, but Schwed wisdom, developed long before hedge hedge days and exotic derivatives, are still true. There is a humorous jewelry in almost every page reaching a very familiar chord, since the historia of the highly paid economist who struggles huge folders full of documents to conferences (but never open them), for the soft cavity to the tendency of analysts Å ¢ Å ¢ "Develop a prose style that would make a German metaphics of the xix cell with envy. Fred Schwed had Å ¢ " A stealthy affection for that miserable old lady, the capitalist system € Å ¢ ~ Å "e; In his opinion, it is much better than alternatives. Its central point is that markets are unpredictable. Who does not matter if you are investing for the long course, because all the main actions markets work well in the long run - it is trying to do better than the mother, says Schwed, which makes all the problem. The madones, the fraud, the fads and the scales of today are notably similar to the day of Fred Schwed. This should not come a huge surprise, when you read the way this charming and sophisticated writer deals with the questions of the 1930s and 40s, the truth of the axiom that people never seem to move from home. As Michael Lewis says, he says in his preface to the 1995 edition, "I like to think that when I stumbled through this little delicious book, the ghost of his author stumbled together with me, with a gin and Tonic in hand. " " Schwed's book reading is like meeting a friend, and it is a great feeling of realizing that not all in the markets, then or now, is a Bárbaro obsessed with money. Where are customer yachts? * * " " Once in the dear days of the recall, a visitor out of town was being shown to the wonders of New York's financial district. When The party arrived at the battery, one of her guides indicated some beautiful ships walking on the picture. "Look, these are the bankers' yachts and brokers." Where are all customer yachts? "Asked the visitor. of Naouna. - From the book. "Where are customer yachts?" By Fred Swed, Jr. - Originally published in 1940. The Hedge Background Regatta soon after the news s on Scheme Madoff Ponzi broke and the Total Commissions and US exchange began to obtain public abuse to never inspect the Madoff's asset management company, and for never having discovered his scheme, he concludes that a good reason for which Sec No had audited the books and records of Madoff's management company, was that Madoff, no doubt, declared his asset. The management company was a "hedge fund" and therefore out of the regulatory jurisdiction of the SEC. (Madoff Asset Management Money Collection Methods seem to have been designed to suit the structure of a hedge fund). As you can remember on December 10, 2004, under President William Donaldson, the SEC Mandated that after February 1, 2006 Hedge Funds must register (see, dates of conformity in> http: // www. SEC.GOV/RULES/FINA/IA-2333.PDF Also See, President Donaldso No July 24, 2004 Testimonies relating to the protection of the investor and the regulation of hedge fund consultants before From the US Senate Committee on Banks, Housing and Urban Affairs - in> . The Mandate of the SEC for the registration of hedge funds precipitated a long and turbulent debate on the legal jurisdiction of the SEC on Hedge Funds. And the rumor is that the renitence of President Donaldson of his president of the SEC was not voluntary, but was requested by the Executive Branch of the Government, mainly because of President Donaldson's position on participation The Hedge Fund Regulation (see, 1 June 2005 Article York Times, Donaldson announces the renitence as Second de President at sec.html? R = 1). Where are customer yachts? May 30, 2009 Page 1 of 2 I heard Madoff recorded his operation from of assets, as necessary, in the beginning of 2006. As you may know, on June 23, 2006 in the case of Goldstein vs. Sec the new hedge background. The registration mandate was by the Court of US District DC. Whereas, there were approximately 6,000 hedge (on-shore) funds in the US and considering that the registration rule was only in force for five months and twenty and three days, and considering Bernard Madoff's reputation as well-known and experienced the Broker / Total Reseller, seems strange to me that someone would expect Madoff's asset management company between the first candidates for an audit of the sec Office, inspections and exams (OCE). For the media not to mention prominently and repeatedly mention the history of the lack of jurisdiction on hedge funds, and treat Madoff's scanal as a failure of the SEC to investigate and audit a management company of assets (which was out of the second. s Jurisdiction) seems a significant lapse in the report and a great desservice to the public and the second. My questions: It seems that the media is unconscious from the details above or they choose not to include them in TV articles and relatives on Madoff's scanal. In your experience you heard, seen or read any relatives on Madoff's activities that discuss the problems I mentioned above? And, as you know, after Goldstein vs. Secover Many hedge funds stopped registering with SEC, but some continued to register. Have you seen any information that mentions if Madoff's hedge fund continued to register after the decision of the appeals court? If the history of the jurisdictional battle was more widely understood, the Public placed pressure on its elected representatives to change the legal limitations of the second? If the history of the Limited Jurisdiction of the SEC was more widely understood, the concept of "investor protection" has become more convincing (for Congress) than the interests of the Hedge Fund and the Special interests of Brokerage and hedge background advisory industrial? Note: 12-meter racing yachts in the hedge background racing photo in the first page are hedge fund property yachts. Many of the leading organizations of hedge funds also have pleasure yachts that are much more luxurious water of water. Where are customer yachts? May 30, 2009 Página 2 of 2 2
