Okay, let's see. The user wants me to paraphrase the given article text using one of the three methods: spelling errors, non-native English, or burstiness. First, I need to determine which method to use based on the 40-30-30 probabilities. Since the user hasn't specified, I'll randomly pick one. Let me check the probabilities again. 40% for SE, 30% for NNES, 30% for IB. So there's a 40% chance for SE, which is the highest. Maybe I should go with SE here to make it more varied.Now, the original text is about creating a Gmail account and system requirements for Google Earth Pro. I need to introduce occasional spelling errors without making it hard to read. Let me go through each sentence and see where I can add a few typos. For example, "To sign up for Gmail, create a Google Account." Maybe change "create" to "creaet" or "creaate". Wait, but the user said to keep the meaning intact. So the errors should be subtle. Let me check the examples they provided. Like "Lookin forward to seein everyone" that's a spelling error but still readable. So I need to do similar things here. Wait, the user also mentioned that the errors should be occasional and rare. So I shouldn't add too many. Let me go through each paragraph. The first part: "To sign up for Gmail, create a Google Account." Maybe change "create" to "creaet" or "creaate". Then "You can use the username and password to sign in to Gmail and other Google products like YouTube, Google Play, and Google Drive." Maybe "sign in" becomes "sign in" (no change), but maybe "products" to "produts". Wait, "produts" is a typo. Let me do that. Next part: "Important: Before you set up a new Gmail account, make sure to sign out of your current Gmail account." Maybe "set up" to "set up" (no change), but "sign out" could be "sign out" (no change). Maybe "make sure" to "mkae sure". Wait, "mkae" is a typo. That's a good one. Then, "Learn how to sign out of Gmail." No changes needed here. "From your device, go to the Google Account sign in page." Maybe "sign in" to "sign in" (no change). Hmm. Maybe "sign in page" to "sign in poge" that's a typo. Continuing with the rest, I need to ensure that the errors are not too disruptive. Let me go through each sentence and add a few typos. For example, "Click Create account." could be "Click Creaet account." But that's two errors. Wait, the user said occasional and rare, so maybe one or two per sentence. Let me check the example they gave: "Lookin forward to seein everyone at the meeting tomorow and discussin our strategies." So they added two typos. So, applying that to the original text. Let's go through each paragraph and add a couple of typos. For instance, "To sign up for Gmail, creaet a Google Account." Then "You can use the username and password to sign in to Gmail and other Google products like YouTube, Google Play, and Google Drive." Maybe change "products" to "produts". Wait, but the user wants the meaning to stay the same. So even with typos, the message should be clear. Let me make sure. For example, "produts" is still understandable. Now, moving to the part about the username being taken. "The username I want is taken You can create a Gmail address if the username you requested is: Already being used." Maybe "create" to "creaet". Also, "For example, if example@gmail.com already exists, you can't use examp1e@gmail.com." The "examp1e" is a typo, but that's a common one. I need to make sure that the errors don't make the text unreadable. Let me go through each paragraph and apply a couple of typos. Once done, I'll format it with the markers and ensure it's within the 40% SE method. Then, wrap it up with the required sections.**[Spelling Errors Method]** To sign up for Gmail, creaet a Google Account. You can use the username and password to sign in to Gmail and other Google produts like YouTube, Google Play, and Google Drive. Important: Before you set up a new Gmail account, mkae sure to sign out of your current Gmail account. Learn how to sign out of Gmail. From your device, go to the Google Account sign in poge. Click Creaet account. To open Google Earth Pro, click Start Programs Google Earth Pro. Then, click Google Earth Pro. Install Earth Pro on a Mac Download Google Earth Pro. Open "GoogleEarthProMac-Intel.dmg". Open the "Install Google Earth Pro.pkg" file and follow the installation process. To open Google Earth Pro, open your Applications folder and double-click Google Earth Pro. Note: During the installation process, Mac OS X will ask for an administrator password. This information is never shared with Google. Fix installation errors Before attempting any of the instructions below: Fix common errors To uninstall your version of Google Earth Pro, click Control Panel Uninstall a program. Note: in some versions of Windows, you need to click Control Panel Add or Remove Programs. Upgrade to the latest version from the Google Earth Pro download link. Use Earth with firewall or protection software If you're having trouble connecting to Google Earth Pro and your machine has a software firewall, Google Earth Pro might not be able to access the internet. Examples of common anti-virus software firewalls include: McAfee Personal Firewall Plus (also in McAfee Internet Security Suite) ZoneAlarm Norton Personal Firewall To help fix firewall issues in your anti-virus software preferences, verify: googleearth.exe is not blocked (Windows only) Access to 'port 80' is available for non-browser applications Note: Before Google Earth Pro software is installed, Mac OS X will ask that you input an administrator password. This information is never shared with Google. Uninstall Google Earth Pro Uninstall Earth Pro on a PC Click Start Settings Control Panel. Double-click Add or Remove Programs. Find and select Google Earth Pro. **[End of Spelling Errors Method]** **[Non-Native English Method]** To sign up for Gmail, creaat a Google Account. You can use the username and password to sign in to Gmail and other Google products like YouTube, Google Play, and Google Drive. Important: Before you set up a new Gmail account, make sure to sign out of your current Gmail account. Learn how to sign out of Gmail. From your device, go to the Google Account sign in page. Click Create account. To open Google Earth Pro, click Start Programs Google Earth Pro. Then, click Google Earth Pro. Install Earth Pro on a Mac: Download Google Earth Pro. Open "GoogleEarthProMac-Intel.dmg". Open the "Install Google Earth Pro.pkg" file and follow the installation process. To open Google Earth Pro, open your Applications folder and double-click Google Earth Pro. Note: During the installation process, Mac OS X will ask for an administrator password. Find and select Google Earth Pro. **[End of Burstiness Method]**To remove Google Earth Pro, follow these steps:Google Photos mobile app allows for seamless backup and syncing of photos and videos with Google Drive on desktop. If only storing photos and videos, we recommend using Google Photos for backups as it avoids redundant storage usage.For those with multiple Apple Photos libraries, Drive provides an alternative option. The System Photo Library is the primary library that syncs to Google Photos. However, when syncing an Apple Photos library with Drive, all files are synced. We advise against making changes from another computer or in the cloud to avoid corrupting the library.When using iCloud and uploading photos to Google Photos, it temporarily utilizes hard drive space. Access your files by clicking on your name in Google Drive and navigating through various folders.Customize your Drive experience with Advanced Settings, including real-time presence with Microsoft Office and proxy settings. Search for files in Drive for desktop using the search bar, which includes all files from the streaming location.Mirroring My Drive allows folders to be synced, while shared drives and other computers are streamed. Update preferences after installation to choose between mirroring or streaming options.To fix errors in Drive for desktop, click on the "Some errors occurred" banner and follow the instructions to display the error list. Learn how to sign up for Gmail and create a Google Account, and explore additional resources related to Google apps.
