Sir , I want to setup samsung webcam software Model NP300e5Z-A0U IN.But I cannot support any samsung download side.Please help me How to shut out this Problem. Page 2 Aug 21, 2012 1 0 10,510 0 i've a pinaacle system callisto rev7.1 pci card bu it does not work in windows 7 64 bit Page 3 I have a new dell laptop with cd dvd player the dvd want lock in to drive the center want mess down what do I need to do. 0 Do you mean the CD or DVD won't click into place when you try to insert it? Or, do you mean that the DVD drive won't close after you insert a disk? 0 0 If you can't insert into the DVD/CD drive, it may indicate a defective drive. Have you tried any other disks? 0 I got it working thanks 0 This article was created for Samsung laptops. In case the camera is not recognized when starting or joining a meeting in RemoteMeeting, follow the steps below. Pre-check First, the camera needs to be checked to make sure the video is displayed correctly. Click the link below and follow the instructions to check. My camera is not recognized (pre-check) If you still do not see the video, refer to the instruction below. Troubleshooting   1. Check OS settings   Camera is not recognized on Windows 10   2. Check Samsung settings If the privacy settings are set to high, the video feed of the webcam is blocked. To solve this, lower the [Recording / Recording prevention] setting in the Privacy menu or uninstall the program. 1) Press 'Windows key + F1'.2) Click Security from the Settings window on the left menu.3) If the [Recording / Recording prevention] setting is set to high, then press Reset to lower it.4) If the problem persists after following the steps above, then try uninstalling the program from Programs and Features in the Control Panel.   3. Check Samsung settings Webcam from a laptop or all-in-one PC can be enabled by disabling the Prevent recording option from Samsung Security(not Samsung Settings). 1) Type "Samsung Security" on the search box (taskbar on the Windows 10 desktop) and launch it (shortcut : Fn + F11) 2) Turn Prevent recording to OFF. If the problem persists after following the 3 steps above, then contact the manufacturer's customer support for further assistance. X Home › Knowledge Base › Driver Download Wendy Mai Last Updated: 3 years ago If you want to keep your Samsung laptop in tip-top shape, you should keep your Samsung laptop drivers up-to-date.There are two ways to update your Samsung laptop drivers:Option 1: Download and update Samsung laptop drivers manuallyYou can follow these steps to download drivers for your Samsung laptop manually:Go to the Samsung Download page.Select COMPUTING > Windows Laptops.Choose your device.Select your device model, then click CONFIRM.Click DOWNLOAD, then open the downloaded file to install the driver software on your Samsung laptop.Note: For some specific devices on your laptop, you may need to go to the device manufacturer's website to search for and download the latest drivers. If you're not confident playing around with drivers manually, you can try Option 2, below.Option 2: Download and update Samsung laptop drivers automatically (Recommended)If you don't have the time, patience or computer skills to update your drivers manually, you can, instead, do it automatically with Driver Easy. You don't need to know exactly what system your computer is running, you don't need to risk downloading and installing the wrong driver, and you don't need to worry about making a mistake when installing. Driver Easy handles it all.Download and install Driver Easy.Run Driver Easy and click Scan Now. Driver Easy will then scan your computer and detect any problem drivers.Click Update next to any flagged devices to automatically download the correct version of their drivers, then you can install them manually. Or click Update All to automatically download and install them all automatically. (This requires the Pro version – you'll be prompted to upgrade when you click Update All. You get full support and a 30-day money back guarantee.) 1212 people found this helpful Text is blocky or fuzzy on Samsung PC LCD and OLED screens support ClearType, a method of removing sharp edges from symbols to increase readability. ClearType can be adjusted to suit your particular screen and preferences. No sounds from HDMI device connected to Samsung PC HDMI is a common connector for video. Monitors, TVs, and projectors all use this standard. TVs usually have built-in speakers, but this may not be the case for any other devices, so make sure it has speakers before continuing. Entire display is blocky, fuzzy, or does not fill screen on Samsung PC If your display is not sharp and clear, or it doesn't fill the screen the resolution is most likely not optimized for the screen. It can be fixed with just a few easy steps. Samsung PC speakers are not working If you don't hear any sound from the internal speakers, there's a few things you can do to get the music playing again. Make sure no other audio devices are plugged in while troubleshooting. Blue or green screen error on Samsung PC The sudden appearance of a full screen error can be a disconcerting experience, but thankfully these are usually isolated occurrences. Most of the time your PC will simply reboot and that's all it really needed.
