

Horizon zero dawn guide pdf free

Sony has announced the next phase of this year's Play at Home program. It's giving away games to encourage people to maintain social distancing amid the pandemic during warmer months. Some great games will be up for grabs in the coming weeks. You don't need to be a PlayStation Plus subscriber to claim these games. They're completely free. Headlining the list is Horizon Zero Dawn. You can claim the Complete Edition of the blockbuster, which includes the Frozen Wilds expansion, for free between 11PM ET on April 19th and the same time on May 14th. This one's a no-brainer. The Horizon franchise is fast becoming important for Sony. This should give you plenty of time to check out the well-regarded game before the sequel, Horizon Forbidden West, arrives. All going well, that will emerge later this year. Before you get your hands on Horizon Zero Dawn at no cost, Sony will offer up many other excellent games. Starting on March 25th at 11PM ET, you can claim Abzû, Enter the Gungeon, Rez Infinite, Subnautica and there are some other PSVR games you can pick up: Astro Bot Rescue Mission, Moss, Thumper and Paper Beast. Even if you don't have a PSVR headset, there's no harm in grabbing them just in case you eventually buy one. These games will be in the Play at Home lineup until 11PM ET on April 22nd. There's still some time to grab 2016's Ratchet and Clank, which is the first game Sony offered through this year's edition of Play at Home. You have until 11PM ET on March 31st to snag it.WILMINGTON, Del., May 17, 2021 (GLOBE NEWSWIRE) -- Rigrodsky Law, P.A. announces that it is investigating Consonance-HFW Acquisition Corp. ("Consonance-HFW") (NYSE American: CHFW) regarding possible breaches of fiduciary duties and other violations of law related to Consonance-HFW's agreement to merge with Surrozen, Inc. The paper details positive findings from a preclinical study of lasofoxifene, a selective estrogen receptor modulator (SERM), in mouse models of endocrine therapy-resistant breast cancer. In this study, luciferase-GFP tagged MCF7 cells bearing wild-type, Y537S or D538G estrogen receptor alpha (ERα) mutations were injected into the mammary ducts of NSG mice, which were subsequently treated with lasofoxifene or fulvestrant as single agents or in combination with palbociclib, a CDK4/6 inhibitor that blocks cell-cycle progression. Tumor growth and metastasis were monitored with in vivo and ex vivo luminescence imaging, terminal tumor weight measurements and histological analysis. As a monotherapy, lasofoxifene was found to be more effective in this preclinical model than fulvestrant at inhibiting primary tumor growth and reducing metastases. Adding palbociclib improved the effectiveness of both lasofoxifene and fulvestrant for tumor suppression and metastasis prevention at four distal sites (lung, liver, bone and brain), with the combination of lasofoxifene/palbociclib showing more potency than that of fulvestrant/palbociclib. "The results of this study demonstrate, for the first time, the anti-tumor activity of lasofoxifene in mouse models of endocrine therapy-resistant breast cancer harboring ESR1 mutations, and its superiority to fulvestrant in this preclinical model," said Barry Komm, Ph.D., Sermonix chief scientific officer and co-author of the manuscript. "These findings support continued development of this promising compound in a clinical setting. I look forward to data from our ongoing ELAINE 1 Phase 2 clinical study, which is evaluating lasofoxifene versus fulvestrant, early next year." Endocrine therapy resistance, driven in part by more widespread use of aromatase inhibitors, represents a significant challenge in the treatment of ER+ metastatic breast cancer and highlights the urgent need for more effective interventions, according to Dr. Geoffrey Greene, the study's lead investigator. "The results of this study convincingly demonstrate that lasofoxifene suppresses tumor growth and metastases in human-derived xenograft models harboring the Y537S and D538G ESR1 mutations, the most commonly observed ERa mutations," said Dr. Greene, M.D., Ph.D., chair of the Ben May Department for Cancer Research at the University of Chicago. "I believe this compound, with notable activity on breast cancer models with ESR1 mutations, combined with a long half-life and high bioavailability, has the potential to present a differentiated profile to current hormonal treatments in overcoming the acquired resistance that limits their long-term effectiveness. I am eager to see results from in-human studies." The paper can be accessed online at: About SermonixSermonix Pharmaceuticals Inc. is a privately held biopharmaceutical company focused on the development of female-specific oncology products and is currently undertaking two Phase 2 clinical studies of lasofoxifene, its lead investigational drug. Sermonix Pharmaceuticals was founded in 2014 by David Portman, M.D., a leading clinical researcher and expert in women's health. menopause and selective estrogen receptor modulator (SERM) therapy. The Sermonix management team, led by Dr. Portman, has significant experience in all stages of the drug development and regulatory process. Paul Plourde, M.D., vice president of oncology clinical development, has many decades of experience in the oncology drug development arena. Barry Komm, Ph.D., chief scientific officer, is recognized for his expertise in SERM biology. Elizabeth Attias, M.M.Sc., Sc.D., chief strategy and development officer, has extensive experience in pharmaceutical drug commercialization. Simon Jenkins, Ph.D. vice president of operations, has over 30 years of experience in global drug development leadership. Sermonix non-executive chairman of the board is Anthony Wild, Ph.D., former president of both Parke-Davis Pharmaceuticals and Warner-Lambert's Pharmaceutical Division. Contact information:David Portman, MDCEO and Founder, Sermonix Pharmaceuticalsdportman@sermonixpharma.com614-582-6849* Chile's peso set for worst day in 3 months * Brazil's real down as COVID deaths cross new milestone By Ambar Warrick May 17 (Reuters) -Chilean stocks and the peso tumbled on Monday after a shock result to the vote over the drafting of a new constitution, while most other Latin American currencies dropped as new COVID restrictions in Asia dented risk appetite. The peso fell as much as 3.6% and was set for its worst day since February. after the country's ruling center-right coalition failed to secure a critical one-third of seats in the body that will draft a new constitution, increasing of more radical proposals. The vote was the result of fierce nationwide protests against inequality in 2019, with the current constitution being widely perceived to favor big businesses over the rights of ordinary citizens. (Bloomberg) -- Oil edged up as rising optimism around a demand recovery in regions such as the U.S. offset Covid-19 flare-ups in parts of Asia. Futures in New York climbed as much as 1% on Monday, reversing earlier losses. The U.S. and China, along with parts of Europe, are rapidly recovering from the pandemic as vaccinations accelerate. In the U.S., passengers at airports jumped to the highest since the pandemic began. However, Indian fuel demand continued to weaken in the first half of May. The oil market's structure is showing signs of strength. The premium for global benchmark Brent's nearest contract over the next one has started widening again in a bullish backwardation, signaling a tightening market. Despite some concern around demand in parts of Asia, "in the U.S., Memorial Day is approaching and people are getting out," said Bob Yawger, head of the futures division at Mizuho Securities. Crude is up about 3.8% so far this month, held back by a tepid recovery in Asia, where the coronavirus is crippling key importer India, and Singapore and Taiwan grapple with new outbreaks. Another wildcard is the prospect of more crude flows from Iran as the nation seeks to revive a nuclear deal and free itself of U.S. sanctions. Talks are ongoing, however, and progress on a solution remains uncertain. Meanwhile, the steady recovery in U.S. air travel continues. On Sunday, the number of people passing through Transportation Security Administration checkpoints at airports surged to 1.85 million, the highest since March 2020. United Airlines Holdings Inc. said it plans to operate 80% of its pre-pandemic U.S. schedule. There were some additional reasons for physical markets to be tentatively optimistic. Last week, India's biggest refiner was looking to buy crude for the first time in a month. Meanwhile, a unit of a giant Chinese refiner issued a purchase tender on Monday. The store offers repairs on smartphones, tablets, computers, and more to help the community stay connected. TORONTO, May 17, 2021 (GLOBE NEWSWIRE) -- Electronics repair shop uBreakiFix is now open in Downtown Toronto at 112 Cumberland St.. The store offers repairs on smartphones, tablets, computers, and more to help the community stay connected. uBreakiFix Toronto is owned by a private group called UBIF 786 Inc. This is the group's fourth store in Canada and first uBreakiFix Toronto. "uBreakiFix Toronto is situated right in the heart of Yorkville, next to the Village of Yorkville Park," said uBreakiFix Downtown Toronto Regional Manager Sam Fani." This is an ideal location because it is surrounded by affluent stores like Louis Vuitton, Hermès, Gucci, Burberry, and Versace where customers can shop while their device is being fixed. We chose to open in Downtown Toronto because of the contagious energy this area offers." uBreakiFix offers repair service on anything with a power button, from smartphones, tablets, and computers to drones, hoverboards, and game consoles. To date, uBreakiFix has completed more than 11 million repairs at its more than 600 locations across North America. While common fixes include shattered screens, software issues, and camera issues, the brand offers support for most technical problems on any electronic device, regardless of make or model. "At uBreakiFix, we strive for excellent customer service and expert advice for tech repair," Fani said. "In a world where technology is at the center of everything we do, we pride ourselves on providing assistance for those who may have lost connection to friends, family, and work due to device issues. From cracked screens to broken charging ports, our team at uBreakiFix can help ensure you're connected to those who matter most."uBreakiFix was founded in 2009 by millennial entrepreneurs Justin Wetherill and David Reiff to fill a gap in the market for affordable, high-quality phone repair. The duo soon partnered with Eddie Trujillo to transition their Internet-based repair brand to a brick-and-mortar model. uBreakiFix began franchising in 2013 and currently operates more than 600 locations across the U.S. and Canada. "At uBreakiFix, our story has been shaped by an unwavering commitment to continually improving the repair experience for customers," Wetherill said. "We founded this company to fill a need for high-quality, convenient repair with great service at a fair price. We always say we're a customer service company first, and a tech company second. As we begin serving Toronto and the surrounding communities, we look forward to sharing the care and credibility that define the uBreakiFix experience." For more information and to view a service menu, visit ubreakifix.com/ca/locations/downtowntoronto. uBreakiFix Toronto is located at: uBreakiFix112 Cumberland St, Toronto, ON M5R 1A6(416) 927-1792 About uBreakiFixFounded in 2009, uBreakiFix specializes in the repair of small electronics, ranging from smartphones, game consoles, tablets, computers, and everything in between. Cracked screens, software issues, camera issues, and most other problems can be repaired by visiting uBreakiFix stores across the U.S. and Canada. Since 2016, uBreakiFix has served as the exclusive walk-in repair partner for Google Pixel customers. In 2018, uBreakiFix became a Samsung Care authorized service provider offering same-day, in-person support for Samsung Galaxy customers across the U.S. In 2019, uBreakiFix joined the Asurion family and now operates as a subsidiary of the tech care company while still maintaining the uBreakiFix leadership team and franchise model. For more information, visit ubreakifix.com, For more information, contact: Natalie Chapo@seesparkgo.com A photo accompanying this announcement is available at Dollar inches higher, commodity currencies drop * Yuan falls after mixed Chinese data * Graphic: World FX rates (Updates to U.S. stock market open, changes dateline (previously: LONDON), changes byline) By Stephen Culp NEW YORK, May 17 (Reuters) - The dollar on Monday held steady near recent lows as new restrictions in Asia to contain COVID-19 and mixed economic signals from China supported safe-haven currencies, while bitcoin extended its slide. The steady U.S. 10-year Treasury yield, along with new outbreaks in Singapore and Taiwan provided some support the dollar against a basket of rival currencies. The dollar index was last down 0.04% at 90.247.(Bloomberg) -- U.S. equities snapped a two-day rally as investors weighed risks to the outlook including inflation and a spike in Covid-19 cases in parts of the world. Technology, industrials and financials led the benchmark S&P 500 lower. Apple, Microsoft and Tesla weighed on the Nasdag 100. Discovery Inc. shares jumped on a deal with AT&T Inc. to merge media assets. Coinbase Global Inc. fell as much as 7.8% to \$238.25, a record low and below the reference price used in its April direct listing. The Stoxx Europe 600 Index was in the green and stocks in Asia were mixed. "The U.S. economy and stocks continue to show remarkable resilience in the face of challenges that are typical of an exit from a major crisis," John Stoltzfus, chief investment strategist at Oppenheimer, wrote to clients. "Near term, markets may find themselves with 'no particular place to go' until Q2 earnings season provides clarity on corporate results and guidance."The dollar was little changed while gold climbed to the highest in more than three months. Bitcoin steadied after Elon Musk said Tesla Inc. hasn't sold from its holdings of the token. The largest cryptocurrency had dropped as low as \$42,185, the least since February. Concerns that policy makers may have to pull back support sooner than expected to quell rising inflation have weighed on global equities. Investors this week will parse the minutes from the Federal Open Market Committee's latest meeting for any discussion about accelerating price pressures, and hints of a timeline for reducing asset purchases. Fed Vice Chair Richard Clarida and Atlanta Fed President Raphael Bostic are also due to speak this volatility to continue as the market searches for direction," said Mike Loukas, chief executive officer at TrueMark Investments. "The release of the Fed minutes on Wednesday will be interesting. With earnings season almost over, inflation will continue to hold center stage." Click here for MLIV's Question of the Day: How Far Can East-West Stocks Divergence Go?Here are some key events this week: Reserve Bank of Australia publishes minutes of its latest meeting TuesdayFed Vice Chair Richard Clarida and Atlanta Fed President Raphael Bostic are among policy makers speaking this weekThe Fed publishes minutes from its April meeting Wednesday, which may provide clues to officials' views on the recovery and how they define "transitory" when it comes to inflationThese are some of the main moves in markets: StocksThe S&P 500 fell 0.5% The Stoxx Europe 600 was little changedThe MSCI World index fell 0.3% Currencies The Bloomberg Dollar Spot Index was little changed at \$1.4093 The Japanese yen rose 0.1% to 109.23 per dollar Bonds The yield on 10-year Treasuries advanced one basis point to 1.64% Germany's 10-year yield advanced two basis points to the highest in about two yearsBritain's 10-year yield advanced two basis points to 0.87%CommoditiesWest Texas Intermediate crude rose 0.6% to \$66 a barrelGold futures rose 0.9% to the highest since Feb. 10For more articles like this, please visit us at bloomberg.comSubscribe now to stay ahead with the most trusted business news source. ©2021 Bloomberg L.P.A Twitter (NYSE: TWTR) paid subscription service is guickly approaching. App researcher Jane Manchun Won tweeted on Saturday that the social media service is preparing to roll out a \$3 per month subscription model called Twitter Blue that would offer users exclusive services such as saving and organizing favorite tweets. CEO Jack Dorsey said last year that Twitter was exploring the idea of a subscription model. And following its acquisition of Scroll earlier this month, product vice president Mike Park wrote on the company's blog that Scroll, an ad-clearing publishing outlet, "will become a meaningful addition to our subscription service on Twitter,"Major players in the totalizing fluid meter and counting device market are Honeywell International Inc., Emerson Electric Co., General Electric, Siemens, Emerson Electric Co, and ABB Group.New York, May 17, 2021 (GLOBE NEWSWIRE) -- Reportlinker.com announces the release of the report "Totalizing Fluid Meter And Counting Device Global Market Report 2021: COVID 19 Impact and Recovery to 2030" - The global totalizing fluid meter and counting device market is expected to grow from \$18,28 billion in 2020 to \$19,17 billion in 2021 at a compound annual growth rate (CAGR) of 4.9%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$23.62 billion in 2025 at a CAGR of 5%. The totalizing fluid meter and counting device market consists of sales of totalizing fluid meters and counting devices such as, measuring linear, nonlinear, mass or volumetric flow rate of a liquid or a gas. Totalizing flow meter and counting devices are the instruments used to measure the volume or mass of a gas or liquid. Some examples of the totalling fluid meters, and counting devices are gas consumption meters, and gauges for motor vehicles and equipment for collecting fare. The increasing demand from automotive manufacturing companies contributed to the market growth of flow meter and counting devices manufacturers. Emerging market growth for automotive manufacturing companies was aided by growing popularity of public transportation and rapid growth in number of vehicles. According to a study in 2019, the total global vehicle population stood at 1.432 billion cars and trucksand is projected to reach 2.8 billion vehicles by 2036. Therefore, the increasing demand from automotive manufacturers is expected to drive the market for flow meters and counting devices such as parking meters, taxi meters, and gauges for motor vehicles and equipment for collecting fare. Rising geopolitical tensions and trade protectionism are expected to have a negative impact on the totalizing fluid meter and counting device market during the forecast period. Repercussions of geopolitical tensions included sanctions on Russia trade protectionism and heightened military tensions in the Middle East. Many countries placed trade restrictions, especially on imports, to boost local production. For instance, Brexit is likely to lead to more trade restrictions between the UK and other countries in Europe. The US is also implementing several trade restrictions, especially with China, to boost its local production. For instance, the US imposed 25% tariff on steel and 10% tariff on steel and counting device. Continued violence and terrorism in the Middle East and other parts globally are also expected to have a negative impact on the market. The totalizing fluid meter and counting device market covered in this report is segmented by type into differential pressure flow meters, positive displacement flow meters, velocity flow meters, and open channel meters. It is also segmented by end-use industry into water & waste water, refining & petrochemicals, oil & gas, chemicals, power generation, pulp & paper and metals & mining. Major companies in the totalizing fluid meter and counting device industry are using smart technology to enhance decisions making abilities and thus drive profits. The companies in this industry use technology in order to optimize the payment methods, subscription management, optimizes enforcement and allows the end-user companies to analyze the usage. Counting devices such as parking meters have been revolutionized with the advent of smart technologies. Companies such as IPS Group, a US based company, announced its latest app called Park Smarter . The app allows drivers to connect directly to a physical parking meter with their smartphone and pay through cashless transactions. Other companies such as ParkiFi are also investing in making parking meters ""smarter"" through the use of big data and sensors. In December 2019, Honeywell, a publicly-traded conglomerate that products, engineering services and aerospace systems has acquired Rebellion Photonics for an undisclosed amount. Rebellion Photonics will join Honeywell's Safety and Productivity Solutions business, which offers gas detection technologies, safety equipment, mobility solutions and software. This acquisition complements Honeywell's portfolio of process technology, automation and gas detection systems and speeds up our transformation into software industrial company. Rebellion Photonics, a US based company is involved in manufacturing monitoring solutions for oil, gas, petrochemical and power industries. Reportlinker finds and organizes the latest industry data so you get all the market research you need - instantly, in one place. CONTACT: Clare: clare@reportlinker.com US: (339)-368-6001 Intl: +1 339-368-6001The "Rise of Amazon - How it became a Global Conglomerate and what its Future may hold" company profile has been added to ResearchAndMarkets.com's offering. Riunite, America's beloved Italian wine for over seven decades, today announced the launch of its newest innovation, Lambrusco available in cans. Lambrusco, the varietal many associate with the heritage brand, is a semi-sweet and slightly-bubbly wine that has been given new life in its on-the-go format. Lambrusco joins the existing line of Riunite wines in a can, including both Red and White Sangria. The newest addition will be available across the U.S. in June.Satori Fund founder Dan Niles is warning that inflation might force the Fed's hand into sparking a 20% market collapse. Electronic Arts (NASDAQ: EA) reported strong earnings results last week, with record revenue, bookings, and operating cash flow for fiscal 2021 (which ended in March). EA had a big year with its EA Sports titles. During the earnings call, CEO Andrew Wilson spoke to the momentum in EA Sports: "We continue to see the consumption of sports move from linear to interactive, representing a major growth opportunity for us spanning more sports and more platforms, especially mobile."Comments came during another night of violence in the Israel-Gaza conflictThe Moulin Rouge in Paris will be high-kicking its way back on stage in September, it announced with a flourish on Monday, after the longest shut down in more than a century. Euro zone banks face potential climate hazards such as floods and droughts on up to a third of their loans to companies, with lenders in Greece, Portugal and Spain among the most exposed, the European Central Bank said on Monday. The ECB study is part of a broader analysis of the risks that climate change poses to the financial sector, ranging from physical damage to changes in regulation or in consumer preferences. It found that around 30% of euro area banks' corporate loan book is exposed to businesses located in areas where the risk of floods, droughts, extreme heat, wildfires or a rise in sea levels is high or rising. Major players in the electricity and signal testing instruments market are Fortive Corporation, Rohde & Schwarz GmbH & Co, Anritsu Corporation, Advantest Corp, Teradyne Inc, and Good Will Instruments. New York, May 17, 2021 (GLOBE NEWSWIRE) -- Reportlinker.com announces the release of the report "Electricity And Signal Testing" Instruments Global Market Report 2021: COVID 19 Impact and Recovery to 2030" - The global electricity and signal testing instruments market is expected to grow from \$54.59 billion in 2020 to \$58.33 billion in 2021 at a compound annual growth rate (CAGR) of 6.9%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$74.62 billion in 2025 at a CAGR of 6%. The electricity and signal testing instruments market consist of sales of electricity and signal testing instruments and related services such as detecting faults in the operation of electronic devices, capturing responses from electronic devices for the usage of measuring and testing the characteristics of electronic and electrical signals. The electricity and signal testing instruments are necessary to find and maintenance in various industries. Some of the products manufactured by these instruments include circuit and continuity testers, volt meters, watt meters, mustimeters, and semiconductor test equipment. The increasing demand from construction industries drove the market for electricity and signal testing instruments. The electricity and signal testing instruments manufacturing market is registering a strong growth due to rise in construction activity. The increasing demand in construction activity was aided by rising disposable income, strong economic growth, stable political environment and increasing foreign investments. According to the global information, global construction market is expected to grow to \$18,775.3 billion at a compound annual growth rate (CAGR) of 10.6% through 2022. Therefore, the increasing demand from construction activities is expected to drive the market for electricity and signal testing instruments. Trade protectionism pertaining to construction industry are expected to increase in most of the markets, this is expected to restrain the electricity and signal testing instruments manufacturing market. Many countries have imposed trade restrictions, especially on imports, to boost local wood and metal products which are widely used in the construction industry. The US also imposes many trade restrictions, especially with China, to improve its local production. For example, the US placed a tariff of 10% on aluminium. The increasing trade protectionism in construction industry has a negative impact on electricity and signal testing instruments market. Therefore, the increasing trade protectionism limits the growth of electricity and signal testing instruments market covered in this report is segmented by type into electricity testing instruments, other testing and measuring instruments, semiconductor and signal testing instruments. The companies in the electricity and signal testing instruments are increasingly investing in miniaturization of the instruments. The fast growth in the electronics industry is leading to the development of small-sized electronic devices for which miniaturised test and measurement equipment are required. Miniaturised test and measurement equipment is flexible and easy to use. For example, Advantest is currently offering miniaturised electricity and signal testing equipment in order to keep up with the growing end user demand. In January 2019, Teradyne, an American developer and supplier of automatic test equipment acquired Lemsys for an undisclosed amount. The acquisition includes change of ownership and enhances Lemsys's growth through Teradyne's global distribution and financial strength. This acquisition will allow Teradyne to expand product development and market growth. Lemsys is a Switzerland based company which produces test equipment for the semiconductor industrial applications.
