keyboard or the Emoji inserter. Emoji are small digital images sent electronically, typically over mobile phone networks, to convey an emotion or sentiment. They are the most used word on social media or mobile phone networks, to convey an emotion or sentiment. They are the most used word on social media or mobile phone networks. Typing emojis on mobile is very easy since they are part of almost every phone's keyboard. However, when it comes to typing
  these symbols on the PC, especially in Microsoft Word, you may not know where to look because the App doesn't include the Emojis in Word. One of the simple ways to be able to insert Emojis in Microsoft Word is to leverage this free Emoji Keyboard add-in for
 Microsoft Office. This add-in will allow you to click and insert any Emoji symbol you want without any hassle. Below are the steps to take: Get online by connecting your computer to the Internet. Open and Log into Microsoft Word. Navigate to Insert > Get Add-ins. The Office Add-ins window should appear. Type Emoji Keyboard into the search box.
 Searching will bring up the Emoji keyboard add-in. Finally, click on the Add button to install the Add-in. After clicking the "Add" button, this plugin will be installed in MS Word immediately. Once you've installed in MS Word immediately.
 is to install the Emoji keyboard add-in, as shown above. Place your insertion pointer where you need to insert the Emoji task pane will appear on the Emoji you want to insert in your Word document. There are some keyboard shortcuts you can use in
 ALT code will allow you to insert any symbol, here are the steps you need to follow: Open the text editor in Microsoft Word using the Windows keyboard. This section contains the ALT codes for almost all the Emojis. To use this method to type any symbol, here are the steps you need to follow: Open the text editor in
 which you want to type the Emoji symbol. Place your cursor where you need to type the Emoji symbol. Hold down the Alt key. As you press down the Emoji symbol. Hold down t
 to use this method. If your laptop keyboard doesn't have this num pad, you can activate it by pressing Fn+NmLk or connecting an external keyboard. The following tables list a lot of ALT code shortcuts you can use to type any Symbol on Windows, following the steps outlined above. Emoji DescriptionEmoji SymbolEmoji Alt CodeFolded HandsAlt +

 The use of emoji has grown over the years with newer emojis being created to represent more people, objects, and activities. With this guide, you are not just limited to typing Emojis only on Mobile. You can now use the keyboard to do the same in Microsoft Word or use the Emoji keyboard add-in. Thanks so much for reading this guide. Joe Hindy / Android
  version of each company's app. See? It's all very weird and discombobulated. In any case, there are apps on Android that let you play with emoji, use custom ones, and let you post ones on other apps as stickers. Here are the best emoji apps for Android. The best emoji apps for Android Price: Free with in-app purchasesJoe Hindy / Android AuthorityBig
  Emoji is indicative of what you normally see with dedicated emoji apps. It contains over 5,000 emoji for use immediately in most apps. The app itself isn't an emoji keyboard. It sends the emoji as images, similar to stickers as part of the
  premium version of the app. The app isn't as convenient as an emoji keyboard, but it's a nice way to augment what you already have access to. Most people who use Snapchat are familiar with Bitmoji. The app creates a series of custom emoji based on how you look. These personalized emoji are mostly usable in Snapchat, but it's a neat way to express to.
  yourself through emoji. Plus, if you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together. This one is free to use, but you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together. This one is free to use, but you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together. This one is free to use, but you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together. This one is free to use, but you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together. This one is free to use, but you do use this in Snapchat, it unlocks Friendmoji where you and a friend can create emoji together.
  unique places for emoji. You can create your own emoji and then upload them to Discord and use them in place of the standard emoji. There are whole Discord server in any other server whenever you want. It's a bit of a
 closed garden since you can't use them elsewhere. However, as a Discord user, I've seen some pretty unique stuff. Discord is also an excellent group chat app and it's usable for more than just video games. Emoticon Pack is a simple app, but you can do some cool stuff with it. The app has the usual emoji that you can find almost anywhere. This one made
  the list for the extras it gives you. The best extra are those goofy text-based emoticons that people use all the time. Simply tap on them and it'll copy it to the clipboard. You then post it wherever you want. The database is pretty extensive for emoticons so you should be able to find what you're looking for. See also: Best Android keyboards for all kinds of
 typists Joe Hindy / Android AuthorityFleksy is one of the better third-party keyboards on Android. It also has a pretty standard, but solid emoji keyboard along with a massive number of sticker packs for further customization. Between those features, the free themes, and the functionality, Fleksy is a decent choice for emoji lovers. The app even
  recommends emoji substitutions when you type words. It doesn't really add too much new stuff unless you count the stickers. However, it'll help you get your emoji game going a lot easier than most. Plus, it just works really well. Gboard is one of the top two most popular keyboards on Android and for good reason. It comes pre-installed on Pixel devices
  feature effectively extends Gboard's emoji game far beyond any other keyboard. Kaomoji is an emoticon app and not really an emoji app. However, we thought it would be apropos for a list like this. It has a large database of emoticons, many of which you've probably seen online. Simply find the one you want, copy it to your clipboard, and paste it wherever
 you want. Most of these should work in most apps and social networks. The various emoticons are categorized for easy browsing as well. The ads in the free version are a bit annoying, but otherwise Kaomoji works really well. Joe Hindy / Android AuthorityMemoji is similar to Bitmoji but without individual customization. It lets you choose a set of emoji
   based that looks somewhat sort of like you. Each set has a bunch of moods and conveys a bunch of emotions. They are also quickly transportable to WhatsApp in the form of a sticker pack. It doesn't have every eye and hair color combination, but it does have enough that it should suit most people. The biggest complaint is that some people can't find a pack
  that looks like them, which kind of defeats the purpose. SwiftKey is here for much the same reason as Fleksy. It has an emoji keyboard like most third party keyboards. The app also learns the emoji you like most third party keyboard like most third party keyboards. The app also learns the emoji you like most third party keyboard like most and recommends them to you as part of its auto-correct and predictive text. As a keyboard, SwiftKey is one of the greats. It has excellent
 predictive text, plenty of themes, and some extras like a number row. As an emoji keyboard, it's perfectly serviceable and it's nice to see big names like Microsoft support things like predictive emoji. Text Converter Encoder Decoder is here for much the same reason as Kaomoji and Emotion Pack. It gives you access to a bunch of neat emoticon options
 That includes decorative text that you really can't get in a lot of other places. In addition, you can type words into the app and it'll convert it into alternate-looking text that you can actually use almost anywhere. It's not quite emoji, but it augments the emoji experience very well. Plus, who doesn't like having a binary-to-text converter on them all the time?
  Emojis are more than just fun little symbols we use in texts and social media, they've become a way to express emotions and add personality to our digital communications. But did you know that you can also use emojis in Microsoft Word? It's a fun and easy way to add some pizzazz to your documents. Here's how to do it. Step by Step Tutorial: How to Put
  Emojis in Word Before we jump into the steps, let's talk about why you might want to add emojis to your Word documents. Emojis can help convey tone, add emphasis, and even make your document! Step 1: Open the Emoji Keyboard Press the 'Windows' key and the
     ;' (semicolon) key at the same time to open the emoji keyboard without having to navigate through menus. Step 2: Choose Your Emoji Click on the emoji you want to use, and it will appear in your Word document. The emoji keyboard is
  divided into categories like smileys, animals, food, etc., so you can easily find the emoji you're looking for. You can also use the search bar at the top of the keyboard to find a specific emoji, it will be inserted at the location of your cursor in the Word document. You can insert as
  many emojis as you want, and you can also mix them with text. Just remember to place your cursor where you want the emoji to go before clicking on it. After you've inserted your emojis, they'll appear in your document just like any other character. You can change their size, color, and formatting just like you would with text. Tips for Using Emojis in Word
  Here are some additional tips to keep in mind when adding emojis to your Word documents: Emojis can look different depending on the font you're using. Try different fonts to see which one displays your chosen emojis best. Keep in mind that not all emojis may be available in Word, especially if you're using an older version. If you're sharing your
  document with others, make sure they have the right software to view emojis properly. Use emojis in moderation. While they can be fun and helpful, too many can be distracting. Consider your audience. Emojis may not be appropriate for all types of documents or recipients. Frequently Asked Questions Can I use emojis in older versions of Word? Yes, you
 can still insert emojis in older versions of Word, but you may need to copy and paste them from a website or use a character map tool. Can I resize emojis in Word? Yes, just like text, you can change the font size of an emoji to make it bigger or smaller. Are emojis available in Word for Mac? Yes, Mac users can access emojis by pressing 'Control' +
 keyboard by pressing 'Windows' + ';'. Click on the emoji you want to use. Insert the emoji into your Word document. Conclusion Emojis have become an integral part of our online communication, add emphasis, or simply make our content more
 engaging. With the steps outlined above, you'll be able to spruce up your Microsoft Word documents with a variety of emojis, no matter the occasion. Whether it's a casual message to a friend or a creative project, emojis can provide that extra flair that your document needs. So go ahead, give it a try, and watch as your words come to life with the addition
 of a few well-placed emojis. Remember, the key to effective emoji use is moderation and relevance. Keep it fun and appropriate, and you'll be sure to leave a smile on your reader's face. Matt Jacobs has been working as an IT consultant for small businesses since receiving his Master's degree in 2003. While he still does some consulting work, his primary
  focus now is on creating technology support content for SupportYourTech.com. His work can be found on many websites and focuses on topics such as Microsoft Office, Apple devices, Photoshop, and more. Certainly! Here's a comprehensive, detailed article on "How to Add Emojis in Word to Enhance Your Text," aimed at providing all the
  used word processing tool, recognizes the importance of emojis in modern communication and provides several methods to incorporate emojis into your documents. This article explores how to add emojis in Word effectively, covering various techniques, tips, and best practices to enhance your text with visual flair. Understanding the Role of Emojis in Your
  Documents Before diving into the how-to, it's crucial to understand why emojis matter in your Word documents: Adds Emotional Context: Emojis help clarify tone and intent, reducing misunderstandings. Engages Readers: Visual elements like emojis can capture attention and make content more relatable. Simplifies Communication: Certain concepts or
  reactions are easier conveyed through an emoji than lengthy explanation. Supports Informal Content: Emojis are suited for newsletters, invitations, or presentations with a casual tone. However, it's essential to know when and where to use emojis to maintain formal professionalism in official documents. The optimal use depends on your audience and
 purpose. Methods to Insert Emojis in Microsoft Word offers multiple approaches to insert emojis, including built-in features, Unicode shortcuts, clipboard pasting, and even inserting images. Below, we explain each method comprehensively. 1. Using the Windows Emojis in Microsoft Word offers multiple approaches to insert emojis, including built-in features, Unicode shortcuts, clipboard pasting, and even inserting images. Below, we explain each method comprehensively.
 in Word is utilizing the Windows built-in emoji picker, available in Windows 10 and later versions. Step-by-Step Guide: Open Your Word Document: Launch Microsoft Word and navigate to the location where you wish to insert the emoji. Invoke the Emoji Keyboard:
 Press Windows Key + . (period) or Windows Key + ; (semicolon). Both shortcut combinations summon the emoji panel will appear, displaying a variety of emojis. Insert the Emoji: Clicking on an emoji will insert it directly at
 your cursor position. Continue Editing: You can add multiple emojis by repeating the process. Advantages of This Method: Fast and convenient No need to remember Unicode codes Supports recent and frequently used emojis Tips: Customize skin tones or variants (by right-clicking or long-pressing emojis in the panel). Use the search feature for specific
  emojis like "thumbs up" or "rocket." 2. Using Unicode Characters and Keyboard Shortcuts Another effective method involves typing the Unicode character for an emoji or symbol followed by a shortcut to convert it into an emoji. Note: This method works best with Unicode-supported emojis and may depend on your font and system configuration. Using
  Unicode Hex Codes: Some emojis have specific Unicode hex code (e.g., 1F600 for (). Highlight the code. Press Alt + X (hold Alt, then press X). Result: The Unicode will convert into the emoji. Caveats: Not all emojis will display properly with this
  method. Make sure your font supports emoji characters (e.g., Segoe UI Emoji). 3. Copy and Paste from Emoji Websites or Character Map and paste them into your Word document. Using the Windows Character Map: Steps: Open Character Map: Press Windows Key + R, type
 charmap, and press Enter. Find the Emoji: Scroll through or filter fonts that support emojis like Segoe UI Emoji. Select and Copy: Click on the emoji to select it, then click Copy. Paste into Word: Return to your document and press Ctrl + V to paste. Using Emojis from Websites: Websites like Emojipedia offer a vast library of emojis. Steps: Visit Emojipedia
  Search and find your desired emoji. Click on it to view details. Click the Copy button. Paste it into your Word document using Ctrl + V. Advantages: Access to a wide variety of emojis and symbols Easy to copy and paste Support for detailed emoji descriptions and variations 4. Using Insert Symbol Feature While primarily used for special characters and
 symbols, Insert Symbol can sometimes be used for emojis supported in your font set. Steps: Go to the Insert tab on the Ribbon. Click Symbol (on the right side) - More Symbols. In the Font dropdown, select Segoe UI Emoji or similar. Find your emoji in the symbol grid. Click Insert. Note: This method has limited emoji selection but can be useful for
  specific symbols. 5. Inserting Emojis as Images If you want full control over your emoji's appearance, or if you wish to add decorative or custom emojis, inserting Emojis as Images If you want full control over your emoji image and click Insert. Resize and
  position as needed. Advantages: Customization of size and position Compatibility with any version of Word Tips for Using Emojis Effectively in Word Adding emojis can enhance your document, but mindful application ensures professionalism and clarity. Consider Your Audience Casual vs. Formal: Emojis are generally inappropriate in official reports or
  business proposals. Cultural Sensitivity: Some emojis can carry different meanings across cultures; ensure appropriateness. Maintain Consistency Use consistent emojis to avoid clutter. Use Emojis to Highlight Key Points Perfect for bullet points or summaries. Break
 up dense text blocks with relevant emojis for visual interest. Ensure Compatibility Test emojis on different devices and fonts to ensure they display correctly. Save documents in formats (like PDF) that preserve emoji appearance. Be Mindful of Accessibility Complement emojis with descriptive text for screen readers. Use alt text or descriptive labels where
  possible. Advanced Tips and Tricks Creating Emoji Shortcuts with AutoCorrect You can set up AutoCorrect entries to insert emojis quickly. Steps: Go to File \rightarrow Options \rightarrow Proofing \rightarrow AutoCorrect Options. In the Replace box, enter the emoji you want (copy from somewhere). Click Add \rightarrow OK. Now, typing
   smile: will automatically replace with the emoji when you hit space or punctuation. But if you are using a touch screen device in tablet mode, you cannot use the keyboard to input text.
down to the System Tray Icons section and find the Touch Keyboard option. Check whether the tough keyboard option. Check whether the tough keyboard will appear on the taskbar. Click on it to launch the touch keyboard. Go to
the top-left area of the touch keyboard. You will notice an emoji icon next to the settings icon. Tap on the emoji keyboard area to close the emoji section. 3. Using Keyboard Only
You can even insert emojis without using your trackpad or mouse. Using either of these breaks the writing flow. You will need to move around using the keyboard only, repeat the following steps: Open any text editor of your choice and position the cursor where you want to input the emojis. Press Win
+ . to launch the emoji keyboard. It will open the recently used emoji, press the enter key. Now, use the arrow keys to move in any direction. After reaching the apt emoji, press the enter key. Now, use the arrow keys to navigate the
emoji list. Press enter key after you find the emoji you like. Then use Alt + Tab to switch to the text editor to close the emoji keyboard. Windows 11 emoji keyboard eliminates the need to copy emojis from other sources. It offers an elaborate emoji, GIFs, symbols, and kaomoji set, all in one keyboard. You can bring up the emoji keyboard and add more
emotions to your posts, emails, and messages. If you want to create custom emojis in Become. With the widespread use of mobile devices In business, peer-to-peer communication has had to evolve to include various forms
of abbreviated languages conducive to chat applications and users with limited thumb dexterity. One of the most common forms of abbreviated communication developed for the mobile era is icon-based vocabulary known as emojis. However, when it comes to Microsoft Office, and Word in particular, using emojis is much more difficult because the app
isn't designed with image-based icons. But with a little know-how, you can install a full set of over 1300 emojis in Excel. 4 Ways to Insert Them and How to Use Them What is an emoji? Emoji is the actual little image that makes text so interesting. The word "emoji"
comes from Japanese e (絵, "picture") + moji (文字, "character"). The original emojis in Word Here are 6 methods to insert emojis in Word trust your Windows,
