

CANDY 8059019011981 White The Candy Rapid Washing Machine offers a range of innovative features designed to simplify your laundry by simply snapping a photo. This feature sets the ideal temperature and spin speed automatically. Additionally, the machine includes nine rapid programmes, allowing you to complete washes in under an hour, saving you valuable time. You can also monitor your laundry remotely using the Candy simply-Fi App, giving you control even when you are away from home. What We Like Quick wash options under an hour Remote control via smartphone Automatic cycle selection Increased cleaning action Energy-efficient A+++ rating The Candy CSO696TWMBB6-80 washing machine can wash a full load in just under an hour, which might sound appealing if your laundry basket is constantly overflowing. It has an above-average spin speed, too, but does that mean it will do a good job of removing as much water as possible from your clean clothes? Read our full review to find out how good this washing machine is at cleaning, rinsing and spinning, plus how efficient it is with energy and water.prosconsWhat is it?How well does it clean, rinse and spin?How much does it clean and spin?How much does it clean, rinse and spin?How much does it clean and spin?How much does i cleaningEnergy efficiencyEase of useApr 2025Last checked by Which? Jul 2024First reviewed by Which? Apr 2024ReleasedThe overall Which? test score is made up of the following star ratings, all determined by our rigorous lab tests. 7 Nov 2024How we test overall which? for both the 40C cottons and 40C synthetics wash programmes. How we test water useWe measure the amount of water used by the machines on both their cottons and synthetics programmes when washing at 40C. How we test cotton washWe check how good each washing machine is at removing stains when washing cottons at 40C and when loaded to 80% of the machines capacity. How we test synthetic washThis star rating shows how well each machine removes stains when washing synthetics test, we load each machines to its listed capacity for synthetics. How we test rinsing efficiencyWe check how well each machine rinses detergent away from clothes by stopping the machines just after the rinse phase and then analysing the remaining water for signs of detergent. We use a spinning machine to extract the wash before and after the wash befor run more than 50 ease of use assessments as part of our tests. We look at how clear the instructions are, how easy the machine is to load and to unload, we check the clarity of markings on the control panel and how easy the controls are to use. We also take a look at how easy it is to use the detergent drawer. How we test program lengthDuring our tests we record how long both of the wash programmes and is relative to the capacity of the washing machine. How we test quietnessWe use an expert panel to listen to each machine as it fills, washes, spins and drains. Our panel listens for the normal operating noises as well as any annoying sounds the machine will be just about as quiet as a washing machine can be. A one star machine will make a lot of noise as it fills, washes and spins. How we test energy efficiency we record the amount of energy used by the machine sounds the machine will be just about as quiet as a washing machine will make a lot of noise as it fills, washes and spins. How we test energy efficiency we record the amount of energy used by the machine will be just about as quiet as a washing machine will make a lot of noise as it fills, washes and spins. How we test energy efficiency we record the amount of energy used by the machine will be just about as quiet as a washing 40C. Competitive running costs and excellent stain removal at low temperatures make the smart Candy Rapid ROW4964DWMCE a good washing machine in its own right. Having the tumble dryer is an added convenience, letting you quickly turn around lots of washing. Yet, as with all washer dryers, running costs for drying are comparatively expensive. A-rating (washer), D-rating (dryer) Special '39, Wool, Wash and Dry special cleaning modes Excellent stain removal Handy app Low washing costs [squirre] make=Candy model=ROW4964DWMCE]Although not the most efficient machines, washer dryers offer a convenient and time-saving way to wash and dry your clothes. The Candy Rapid ROW4964DWMCE does a good job of offering decent wash running costs and a sizeable capacity. If your clothes, washer dryers offer a convenient and time-saving way to wash and dry your clothes. of clothes, this Wi-Fi-connected machine is a decent choice. Candy Rapid ROW4964DWMCE design A futuristic-looking washer and dryerFiddly transport boltsLooks cool with the buttons from the front panel to around the top of the porthole. It completely changes the look of the Candy Rapid ROW4964DWMCE, making it look far more stylish than a bog-standard washer dryer. Theres a slight practical benefit to this button layout, too: you can clearly see the buttons when youre standing up looking down at the washing machine. Otherwise, its largely business as usual, with a standard LCD showing the washing time and a programme dial for selecting the washing and drying options. Build quality here is also generally very good. It feels tough and robust. The appliance is a good size, only 580mm deep, and so will fit into a smaller space than many washing machines. Theres a large enough porthole that swings open wide to provide access to the 9kg drum, which can take 6kg of wet washing. Thats a decent amount for a washer dryer, although some way behind what a standalone tumble dryer could hold. A standard detergent drawer pulls out from the top left, providing space for detergent, fabric softener and pre-wash. It slightly obstructs the porthole, so it best to close it before opening the door to load in the washing. If I have one complaint about the build, its the transport bolts. I was able to remove the first three easily enough, but the plastic part of the bolts dropped inside the washing machine, so I had to take off the rear-access panel to get them out. The final bolt had been overtightened, with the soft bolt head becoming rounded while using a spanner on it, making it even more difficult to remove. This may be a one-off job that either you, or an installer has to do, but it proved unnecessarily fiddly. Elsewhere, set up was simple: cold water in and used water out. Since this is a washer dryer, water extracted during the drying process is flushed out of the same drain pipe.Candy Rapid ROW4964DWMCE features Plenty of programmes and theres Wi-Fi, tooFast washing programmes dial on the Candy Rapid ROW4964DWMCE allows you to choose your desired wash cycle. The icons denoting the various cycles arent always obvious, so youll want to keep the manual to hand whilst you become familiar. Fortunately, you get an English description of the wash cycle on the LCD, so you can more easily see what youve selected. All of the basics are covered, plus theres a wash option for wool clothes and dedicated drying programmes that include wool, too. Since this is a Rapid model, youll find several quick-washing programmes included on the menu. For regularly-soiled clothing, the Rapid 39 wash will complete a half-load wash in just 39 minutes. With each wash, you can override the default settings such as wash temperature, spin speed and level of soiling to fine-tune the wash cycle. You can also set the tumble dry options, which comprise cupboard, iron and extra dry. Just make sure that you dont exceed the maximum drying capacity of 6kg for the load. Still, this is where washer dryers come into their own: you can load them up and return to a completed wash thats dry, too, and ready to put away. Its great for towels and bedsheets, where you may want to reuse items straight away. Alongside the front panel controls, you can also hook up the Candy simply-Fi app. The app will display the current run-time, but if you want remote control then youll need to put the machine into Wi-Fi mode first. The app feels a touch under-designed, but it covers the basics well enough although it does have a quirk: add the washer dryer and you cant add any other Candy washing machines or tumble dryers, or you have a second property, youre out of luck. The app lets you select the wash programme you want but offers some extras, too, including special programmes for face masks, bedding and the Wash and dry them in under an hour. Thats really handy if you need a fast turnaround of lightly soiled items. Once the app is sorted, you can use Alexa or Google Assistant to control your machine. Its handy for receiving updates on how long the wash cycle will take to complete but trying to set the right programme via voice command isnt as easy as using the app or the control panel on the front of the appliance. Candy Rapid ROW4964DWMCE performance Excellent wash performance, but tumble drying can be expensiveGood stain removal at low temperaturesDecent running costs for washingDrying is quite expensiveI put the Candy Rapid ROW4964DWMCE through my standard set of tests to see how well it performs. I started out with a 30C wash, which used 0.48kWh of power and 36.4 litres of water. Thats very competitive.With a spin speed of 1400rpm, the washing came out 37.4% heavier than it went in, which is an excellent result. The less water there is in the clothes at the end of a cycle, the easier and faster it will be to dry. Stain removal was decent at this temperature, too, as you can see from the test strip of (left to right) red wine, olive oil, ketchup, orange juice and gravy stains. At 30C, there was a block of ketchup left behind and the faint outline of red wine, but its still impressive stain removal nonetheless. Upping to the 40-60 Eco programme, power usage and water consumption remained similar at 0.46kWh and 39.6 litres; Id expect a heavier power reduction. Clothes came out weighing 36.6% more than at dry, which is another good result. Stain removal performance was pretty decent here, too, as you can see below. This time around, the oil stain is quite visible and theres a hint of red wine remaining but the context of performance for the price, the Candy impresses. Youd have to pay a fair bit more for better results. Next, I tested the drying capability. Running the Cupboard Dry setting on the test clothes fresh from the washing, I saw power usage of 1.44kWh and water consumption of 18.4 litres. Thats almost three times the power usage of a heat-pump tumble dryer. Here, the clothes came out weighing 0.04kg heavier than when dry, showing that the cycle didnt quite extract all of the water. As a result, I calculated that 95.65% of water was removed: not bad for a washer dryer, but youll get better results in a regular tumble dryer. To work out the average cost per full load. Then, to compare it across all washing machines, I start by calculating the total amount of washing (in kg) that the average UK household produces per year, assuming 274 loads and load amounts of 6kg (high), 4kg (medium) and 822kg (low) per year. Then, assuming full loads, I can work out how many loads the Candy Rapid ROW4964DWMCE would require to fulfil each load of washing. For example, here the large(ish) capacity of 9kg means that just 182.67 loads are required for high use, down from 274. As you can see, with larger-capacity machines, part of the efficiency is derived from using them at full load. With the Candy Rapid ROW4964DWMCE, this amounted to running costs of 34.39 per year for high usage, 25.79 for medium and 17.20 for low. This is an A-rated appliance, so those running costs for the tumble dryer, although the UK average is 160 loads per year. Here, then, it would take 160 cycles for high use (6kg loads), 120 for medium (4kg loads) and 80 cycles for low (3.5kg). This, combined with relatively high electricity costs and water costs (standalone tumble dryers dont need water) gives us running costs of 57.23 (high), 42.92 (medium) and 28.61 (low). These costs explain the D-class rating for drying. Buy a standalone tumble dryer, such as the Hoover H-Dry 500, and youll benefit from a larger 10kg capacity. This reduces the number of loads you have to run per year, thus electricity costs will go down. Expect running costs to be at least half. This isnt a criticism of the Candy Rapid ROW4964DWMCE as such, since high tumble drying costs are a trade-off for the convenience of an all-in-one appliance. On balance, the Candy Rapid ROW4964DWMCEs tumble drying costs are okay for a washer dryer. Candy Rapid ROW4964DWMCE is a good washing machine in its own right, as you can see by comparing it roundup of best buy washing machines. Having a tumble dryer built-in adds convenience, although running costs can be high. As such, this model is a good choice if you need occasional drying or a lack of space means you cant fit in one of our recommended tumble dryers side-by-side. [squirrel make=Cancel and solve a lack of space means you cant fit in one of our recommended tumble dryers side-by-side.] model=ROW4964DWMCE] Candy Rapid ROW4964DWMCE Reviewed Date 01/04/2021 Model Number Rapid ROW4964DWMCE Rated Efficiency A (washing), D (drying) Annual water consumption 13426 litres Annual electricity consumption 134 kWh Dryer type Condenser Sensor drying Yes Drying modes Wool Drum Capacity 6 kg Spin speed 1400 rpm Special vash modes Special vash modes Special vash modes Special vash 36.4 litres water remaining 30C wash 37.4 % Energy consumption 40C wash 0.46 kWh Water consumption 40C wash 39.6 litres Percentage water remaining 40C wash 36.59 % Yearly running cost low use (washer dryers) 100.06 Yearly running cost med use consumption cupboard dry 1.44 kWh Water consumption cupboard dry 18.4 litres Sound (spin) 53 dB Sound (normal) 76.5 dB Candy manufactures economy-class washing machines that are in no way inferior to much more expensive units in terms of functionality and quality of washing. temporary residence in a rented apartment: everyone will find an option that meets personal preferences. It is impossible to imagine that once people did without such a wonderful device as a washing machine, which significantly saves both strength and time. presented mainly budget and functional devices. Is it worth choosing this brand and how not to make a mistake when buying? Read about it in this article. Rating of the TOP 14 best Candy CST G270L/1 Narrow models #1Candy GVS34 126TC2/2 #2Candy CS4 421287WB3 #3Candy CSS4 1072D1/2 #3Candy CSS4 1071DB1/2 #3Candy GVF4 138LWHC3 What to look for when choosing a Candy washing machine? First of all, certainly, attention is drawn to the design of the device. It is worth noting! A washing machine is not a miniature gadget that, if necessary, can be put away in a closet or drawer. She is always in sight, so her future owners should like her appearance. But still one aesthetic component is not enough, therefore other characteristics are taken into account: Download type (front / vertical). Front-loading machines are chosen in most cases, but if the room is small (combined bathroom, dormitory, studio apartment), then the drum hatch may not even open. Therefore, top-loading washing machines help out, which usually have less compact dimensions and open from the top, but they cannot be built into furniture. Spaciousness. The drum of the washing machine can be loaded from 7-8 kg is suitable. For a bachelor's lair or a lonely pensioner, a 3-5 kg machine will be enough. Dimensions Regular sized cars are a good option if space permits. If the device interferes or barely enters the bathroom or kitchen, it is better to take a compact (narrow) machine up to 40-45 cm deep. True, the smaller the size, the smaller the size, the smaller the size, the smaller the size, the smaller the size of the size of the smaller the size washing machines are now found almost everywhere. Mechanical control allows you to create your own washing modes, manually setting the temperature and time, as well as choosing the material of the washed items. Housing material (stainless steel/durable plastic). Also You need to pay attention to the presence of additional functions: spin, dry, extra rinse, steam treatment, delayed start, etc.), the possibility of spinning (the number of revolutions can be up to 1400, respectively, things can be taken out of the machine almost dry), number of washing modes, price, noise level in operation and other characteristics that are important in each case. Overview of popular models Top loading Compact, inexpensive, reliable instruments, which are suitable for small bathrooms or kitchens, provide high-quality washing and are easy to load / unload laundry. We present the rating of the best models according to the ratings and reviews of buyers and specialists. For each device there is an overview, pluses and minuses are indicated. The characteristics of the models are taken from the official website of the company. #1 Candy CST G282DM/1 A device with a concise design, simple operation, large capacity and an economical energy class. The narrow Kandy CST G282DM/1 A device with a concise design, simple operation, large capacity and an economical energy class. laundry at a time. The control is fully electronic, there is a built-in protection against leaks and children, and the ability to add laundry during operation. Specifications: 40*63*88 cm; maximum spin speed: 1200 rpm; number of programs: 15; maximum noise level: 77 dB; additional functions: control from a smartphone, spin speed selection and spin cancellation, reloading laundry, delayed start (up to 24 hours), smooth opening of the flaps, washing temperature selection, imbalance control. Advantages very compact; large capacity; stable in operation even when placed on a tile; the ability to report linen if you forgot to put something before washing; simple touch control. Flaws when squeezing it is very noisy; high price; spinning at maximum speed is available only in several modes. #2 Candy CST G270L/1 Multifunctional, roomy, small washing machine CST G270L / 1 with all the main washing programs, low noise level and fully electronic control. More modest than the previous model, but the same miniature, roomy and reliable. High quality washing (A), careful power consumption, the function of reloading linen and delayed start and manually selecting the squeezing speed are good parameters for an appliance in an average family. Specifications: loading type: vertical; capacity: 7 kg; dimensions: 40*63*88 cm maximum spin speed: 1000 rpm; number of programs: 15; maximum noise level: 71 dB; additional functions: control from a smartphone, selection of work speed and cancellation of push-ups, additional loading of laundry, delayed start (up to 9 hours), smooth opening of the flaps, selection of washing temperature, imbalance control, foam level control Advantages quiet enough; saves water and electricity; a large selection of modes and programs; high-quality washing with both dry and liquid detergents; affordable price. Flaws it is advisable to cover the control panel with a towel or cloth if the machine is in the bathroom; does not rinse well, there are stains from the powder; dirt accumulates under the cover. Narrow models Models up to 40 cm deep - the most compact washing machines with front loading. They also fit well in small bathrooms and kitchens, and most importantly - they can be built into the kitchen set or cabinet under the sink and hide from prying eyes. #1 Candy GVS34 126TC2/2 Capacious, easy-to-operate washing machine Candy GVS34 126TC2/2 with several washing programs, good spin quality and economical consumption of water and electricity. The best option for a small family living in an ordinary apartment. In the machine, you can wash up to 6 kg of laundry at a time by choosing one of 15 programs. There are washing modes for real wool and silk. Specifications: loading type: front; capacity: 6 kg; dimensions: 60*34*85 cm; maximum noise level: 77 dB; additional functions: control from a smartphone, speed selection and spin cancellation, delayed start (up to 24 hours), washing temperature selection, imbalance control, foam level control, protection against children and leaks. Advantages fits even in a small bathroom; stable during operation; ro boil function; you can not report the linen after switching on; due to the location of the hose at the back, it is required to place the device no closer than 4 cm from the wall, otherwise the hose is pinched. #2 Candy CS4 1051D1/2 Budget, compact washing machine CS4 1051D1/2 for people. A good option for a rented apartment cottage, studio apartment or temporary use (for example, before moving to another city). Specifications: loading type: front; capacity: 5 kg; dimensions: 60*40*85 cm; maximum rotation speed when squeezing: 1000 rpm; number of programs: 16; maximum noise level: 77 dB; additional functions: speed selection and spin cancellation, delayed start (up to 9 hours), washing temperature selection, imbalance control, child protection and partial leakage protection, opening the drum hatch by 180 degrees. Advantages affordable cost; convenient to load and unload clothes; economical water consumption; compact. Flaws noisy; skips spinning after several washes in a row; very sensitive sensor, you can accidentally switch or change settings. #3 Candy CSS4 1072D1/2 Small, but roomy and easy to operate device at an affordable price. Washing machine CSS4 1072D1/2 Small, but roomy and easy to operate device at an affordable price. Washing machine CSS4 1072D1/2 Small, but roomy and easy to operate device at an affordable price. Washing machine CSS4 1072D1/2 Small, but roomy and easy to operate device at an affordable price. Washing machine CSS4 1072D1/2 Small, but roomy and easy to operate device at an affordable price. Specifications: loading type: front; capacity: 7 kg; dimensions: 60*40*85 cm; maximum rotation speed when squeezing: 1000 rpm; number of programs: 16; maximum noise level: 77 dB; additional functions: speed selection, imbalance control, foam level control, protection from children and from leaks. Advantages holds a lot of clothes; can be controlled from a smartphone; you can postpone the start; large selection of modes. Flaws heavy; does not wring out well (spin class - C); it is impossible to load linen; loud. #4 Candy CS34 1051D1/2 Budget, narrow, but roomy machine with all the necessary functions for high-quality washing, a delay start timer and a loading hatch that opens 180 degrees. Small unit CS34 1051D1/2 with a high washing class, economical consumption of water and electricity. It is possible to choose the appropriate washing mode from high-quality plastic. Specifications: loading type: front; capacity: 5 kg; dimensions: 60*34*85 cm maximum spin speed: 1000 rpm; number of programs: 15; maximum noise level: 75 dB; additional functions: spin speed selection, imbalance control, foam level control, protection against children and against leaks. Advantages good sensor sensitivity; affordable cost; economical use of detergents; miniature size. Flaws does not show the remaining wash time; does not rinse clothes well; when collecting water and spinning, it is noisy. Embedded Candy built-in washing machines good space saver, as they are specifically designed to be built into furniture. They can be easily placed in a cabinet under the sink or kitchen set. #1 Candy CBWM 914DW-07 Very capacious built-in washing machine CBWM 914DW-07 with touch control and spin speed of the drum up to 1400 rpm. Compact appliance with a build-in height of 83 cm, large drum and 15 washing programs. It is energy efficient and has a high washing efficiency class. Specifications: loading type: front; capacity: 9 kg; dimensions: 60*54*82 cm; maximum spin speed: 1400 rpm; number of programs: 15; maximum noise level: 76 dB; additional functions: spin speed selection, bio-enzymatic phase. Advantages capacious drum; squeezes well at maximum speed; convenient management; stylish design; consumes electricity economically. Flaws convex hatch of the drum, built into a fairly deep pedestal; noisy at work; there is no reloading function; high cost. #2 Candy CBWM 814DW Compact built-in device with good performance, high quality of work and economical power consumption. The CBWM 814DW is similar in performance to the previous model, but has a smaller loading type: front; capacity: 8 kg; dimensions: 60*54*82 cm; maximum rotation speed when squeezing: 1400 rpm; number of programs 15; maximum noise level: 76 dB; additional functions: speed selection, imbalance control, leakage protection. Advantages well washes and wringes out linen; capacious drum, you can wash bed linen, outerwear, blankets; can be controlled from a smartphone; simple and clear control. Flaws very noisy; only compatible with Android phones; high price. With inverter motor Washing machines with inverter motor Washing machines with inverter motor - quieter and more reliable, and also differ from the usual ones in some other advantages: economically consume electricity; durable engine; less noise and vibration even during operation; better distribution of laundry in the drum; smoother start; almost dry laundry at the exit due to efficient spinning at high speeds. #1 Candy GVS44 138TWHC Capacious Candy GVS44 138TWHC with high spin speed, full leak protection at an affordable price. A simple, multifunctional device with an inverter motor. There is a timer to delay the start of washing, a hatch that opens 180 degrees, a silk washing program and the ability to control from a smartphone. Specifications: loading type: front; capacity: 8 kg; dimensions: 60*44*85 cm; maximum rotation speed selection and spin cancellation, delayed start (up to 24 hours), washing temperature selection, imbalance control, foam level control, full protection, silk washing program, control from a smartphone, opening the hatch on 180 degrees. Advantages very well washes; favorable cost; wring out clothes with high quality; there is steam treatment; can be controlled from a smartphone; Easy to load and unload clothes. Flaws draws water noisily; low stability during operation; over time, the top coating of the case peels off. #2 Candy GVF44 138LWHC3 A stylish appliance for a large family at an affordable price with a wide selection of programs and washing modes. A machine with a modern design, a spacious drum, good spin speed and convenient touch controls. You can control it from your smartphone, set a timer to delay the start of washing and use steam mode. Specifications: loading type: front; capacity: 8 kg; dimensions: 60*44*85 cm; maximum spin speed: 1300 rpm; number of programs: 17; maximum noise levels 76 dB; additional functions: speed selection and spin cancellation, delayed start (up to 24 hours), washing temperature selection, imbalance control, foam level control, leakage protection, and rinsing; affordable cost; you can turn on the squeezing program with your own settings; bright and legible display with good backlighting. Flaws low sensor sensitivity; short hose; strong vibration when spinning. #3 Candy GVF4 137LWHC/2 Easy-to-operate, small but spacious washing machine with economy energy class, reload function and bio-enzyme phase. An ideal device in terms of price-quality ratio: small dimensions, a capacious drum, many washing modes and programs. There is the possibility of control from a smartphone and energy class A +++. Specifications: 104/40*85 cm; maximum rotation speed when squeezing: 1300 rpm; number of programs: 16; maximum noise level: 76 dB; additional functions: spin speed selection, control, child protection, control from a smartphone, reloading laundry, bio-enzymatic phase, washing wool and silk. Advantages qualitatively washes any pollution can be controlled from any smartphone with Wi-Fi; very quiet operation; there is steam treatment; affordable cost. Flaws no boiling mode; the remaining time; if placed on an uneven surface, it will "jump" when working. With a large load of laundry In a large family, it is regularly required to wash children's things, bed linen, towels, work and casual clothes.. In this case, it would be appropriate to look at washing modes at a reasonable price. The striking modern design pairs well with the bass drum. The device can be controlled from a smartphone, and its cost makes it affordable for all segments of the population. Specifications: loading type: front; capacity: 7 kg; dimensions: 60*40*85 cm; maximum spin speed: 1000 rpm; number of programs: 15; maximum noise level: 76 dB; additional functions: speed selection and spin cancellation, delayed star (up to 9 hours), washing temperature selection, imbalance control, foam level control, from a smartphone. Advantages inexpensive; large capacity with small dimensions; beautiful design, you can put even in the kitchen; washes well. Flaws does not spin well (spin class C); there is no function of reloading linen; no child protection. #2 Candy SGV 44128TWB3 A device in which design, performance, touch control and a roomy drum converge well. Powerful machine with an attractive design and durable plastic housing. You can control the unit from your smartphone, use the steam function, adjust the water temperature during washing. Economical use of electricity. Specifications: loading type: front; capacity: 8 kg; dimensions: 60*44*85 cm; maximum spin speed: 1200 rpm; number of programs: 16; maximum noise level: 78 dB; additional functions: speed selection, imbalance control, foam level control, smartphone control, protection from children and from leaks. Advantages very quiet; high quality washing; low price; many necessary modes; large drum. Flaws control from a smartphone is possible only with the NFC function; strong vibration when squeezing; no short rinse cycle. #3 Candy MCSS4 1272D3/2-07 A simple but multifunctional machine with a large capacity, economical energy consumption and a spin speed of up to 1200 rpm. A good, reliable, inexpensive washing machine with a spacious drum, all the necessary washing temperature. Specifications: loading type: front; capacity: 7 kg; dimensions: 60*40*85 cm; maximum spin speed: 1200 rpm; number of programs: 16; maximum noise level: 79 dB; additional functions: speed selection, imbalance control, foam level control, speed selection. Advantages consumes electricity very economically; there is a supply of steam; washes well; small price. Flaws there is no reloading function; controlled only by smartphones with NFC; Quite noisy when spinning. Reviews Total reviews. {{{ review.rating replies.length}}} This review has no replies yet. conclusions In this way, when choosing a washing machine from the manufacturer Candy, it is worth considering a number of features: all units are low cost, in any case, they are not inferior in functionality to more expensive companies (LG, BOSCH, Samsung); when measuring sizes please note that due to the location of the hose at the back, you will need to step back a few centimeters from the wall, and in front there will be a convex hatch of the drum; among models machines Candy you can find those that combine spaciousness and compactness. Useful video This video provides an overview of the Candy Smart Pro CSO 16105DC3 is a 10kg machine with plenty of better than basic functions and an A+++ energy rating that keeps running costs in check. Its build quality is more basic and theres a few quirks to work around, but the respectable wash performance and range of programmes comes as a pleasant surprise at this price point. Affordable Seven quick wash cycles Reasonable stain removal Countdown timer not accurate Detergent drawer and door clash Daily 49, Spot Plus 39, Hygiene Plus 59, Rapid 14, 30, 44 minutes, Mixed and Coloured 59 special wash cycles While a quick wash option has been a staple programme for the last few years, its usually only a one-size-fits-all cycle, prizing speed over all other considerations. Where the Candy Smart Pro CSO 16105DC3 differs is that its packed with quick wash programmes theres seven of them all tailored to different needs. As well as quick wash cotton, theres also more besides, such as a generous 10kg capacity and three levels of stain removal to ensure that the grubbiest gear doesn't receive the same kind of light scrubbing that slightly soiled items would. A little flimsy in places, this shows that this is a budget machine Decent porthole with plenty of room to shove in your washing While it does not completely function over form, theres little in the way of style details on the Smart Pro. A silver-effect finish around the door scooped handle and an LED display are about as flashy as it gets. Given the price, this isnt entirely unexpected, just a little out of keeping with its more hi-tech features. Its pretty simple to load, the porthole being large enough to fill the 10kg drum, but unfortunately, the door does clash quite badly with the detergent drawer. I found that the door could actually swing open with enough momentum to yank the detergent drawer completely out the clip to hold it in not being particularly effective. The drawer itself is also thin plastic and prone to being broken. Advertisement The draw for a being broken and prone to being broken and prone to be a being broken. decipher, making choosing the right programme choice hard A decent selection of 16 programmes that cover most clothes types A smart app lets you control this washing machine, both for convenience and ease of use. Sadly, the control panel on the Smart Pro is symbol heavy meaning that you might be able to remember which is cotton and which the mixed load but if youre washing anything out of the ordinary, youll need the instructions, which has a useful programme table in it, to hand, or spend time scrolling through the dial one by one waiting for the display to tell you what it is. There actually a good selection of 16 programmes, which can be toggled in temperature and spin speed within set parameters using a pair of buttons below the display screen and includes handy settings such as Hygiene Plus (which maintains a high temperature to sanitise the load). Beyond programmes, the options offer good washing flexibility as well as pre-wash, youll find a 24-hour delay timer and steam (to make ironing easier). Its KG detector can also be used to weigh the laundry and then adjust the cycles length and water and energy required. Fortunately, you dont have to just rely on the controls to find your ideal wash the Smart Pro connects to the Simply Fi Wi-Fi app, which can work out what programme you need based on the type of fabric and level of soiling, before starting the programme remotely. Advertisement The app itself is fairly simple compared to more expensive machines, the Smart Pro also has a countdown timer but its worse than useless as its inaccurate. On both washes, the estimated time left was far longer than shown after five minutes into the cycle, and a 10-minute spin on the cotton wash took 30 minutes longer than stated on the screen for example, the synthetics wash took at a 10-minute spin on the cotton wash took 30 minutes longer than shown after five minutes into the cycle, and a 10-minute spin on the cotton wash took twice as long. Even taking into account adjustment by the KG detector, this makes the feature more of a loose guideline than something useful. Wrings out an impressive amount of water Washes better at higher temperatures, removing more of our test stains Average running costs, but the cheap purchase price helps As its rated A+++, with an A-rated spin, the Candy Smart Pro should be efficient on most cycles. I started with a cotton wash at 30C to test this. This cycle used 0.58kWh of power and a minimal 26.6l of water. While the maximum spin speed was only 1400rpm, it still managed to wring out an impressive amount of water only 1.02kg remained, which equals 37.23% of the loads original weight. The stain strip featured, left to right red wine, vegetable oil, tomato sauce, orange juice and gravy, all left to dry into the fabric. At the end of the cycle, the red wine remained, though fainter, and there was a trace of ketchup in the fabric. Cleaning test 30C:Dirty test strip (left) vs Clean test strip (right) move slider to compare Advertisement A quick cotton wash used less energy (0.45kWh) but more water (37.361) and left considerably more water in the clothes (1.34kg). The second wash was a 40C synthetics cycle, which used more power at 0.69kWh, most likely because of the higher temperature and differing drum motion. Water consumption doubled to 52.51, too. A lower spin speed of 1000rpm resulted in increased water retention of 1.48kg 54.01% of the dry weight of the load, which was reasonable for a synthetics cycle. Stain removal appeared to be better thanks to the higher temperature, with the ketchup being barely visible, although some red wine still remained. Cleaning test 30C:Dirty test strip (left) vs Clean test strip (right) move slider to compare As the Smart Pro is a more affordable machine, I expected that it would make more noise than a more expensive model, although it actually wasnt that bad. Normal washing recorded a level of just over 60dB, while the spin was noisier at 72.7dB. Both readings were taken from 30cm from the middle of the door Advertisement Both figures were about average for a more affordable washing machine and roughly matched up with the figure stated on the EU energy label; 60dB wash and 81dB spin. For in-depth running costs, I used the figures stated on the EU energy label; which assume 220 washes per year. using average electricity and water costs. To work out yearly figures, I used the average number of washing machine loads in the UK (274 per year), and multiplied by three different load amounts (6kg for high, 4.5kg for medium and 3kg for low) to get a total amount of washing per year in kg. I then worked out how many full loads it would take the Candy Smart Pro to complete all the washing and it showed that the CSO 16105DC3 would cost 49.98 per year for high users, 37.49 per year for high users, it would be significantly cheaper if youre upgrading to the Smart Pro from an older, less efficient washer. If your washing machine wishlist includes extra capacity to reduce the amount of weekly loads, programmes to tackle everything from a muddy football kit to delicates and speedy settings that make life easier, the Candy Smart Pro should tick a lot of your boxes. The fact that its also affordable, without too many compromises on functionality, makes it ideal for families on a budget. Its design and controls could use some improvement, and how much use the app might be is debatable, but it still offers plenty for the price. If you can get by with a slightly lower load and dont need the app, the Hisense WFGA9014V costs a similar amount but is slightly cheaper to run and performed better in our stain test, while our choice of the best washing machines has lots of alternatives. Our washing machine reviews are based on our own independent tests. We test harder in the lab so you can choose the right washing machine reviews are based on our own independent tests. RO16106DWHC7 Cheapest PriceProductPrice CheckOriginal PriceDiscounted PriceCandy RO16106DWHC7 is a high-performing and advanced washing machine.
