How to use dualshock 4 on remote play

use remote play ps to access ps5tm or ps4tm via Wi-Fi wherever you go. with ps remote play you can:• view ps5 or ps4 screen on your mobile device.• use the controller on the screen on the mobile device to control ps5 or PS4.• connect the dualsensetm wireless controller to mobile devices with ipados 14.5 or ipados 14.5 or later.• connect the DUALSHOCK®4 wireless controller to mobile devices with ipados 13 or ipados 13 or later versions.• join your voice chat to use this app, you must:• a mobile device with ios 12.1 or later installed• a Playtation 5 or Playtation 4 console with the latest version of system software• an account for playstation Network• high-speed internet access (Wi-Fi at home) using dualshock 4: For mobile devices with ipados 13 or ipados 13 installed, use the on-screen controller to use the ps button and touch pad function. Note:• This application may not be compatible with some games.• This application cannot be used via a mobile network.• If you use a mobile device with ipados 14 or ipados 14 installed, you must enable local network access for this application so that ps5 or ps4 can be found.• The controller can vibrate differently from when playing on the playstation console. 10 May 2021 version 4.0.0 • You can now use the dualsense wireless controller on devices with iOS14.5/iPadOS 14.5 installed • we have made some performance improvements. the thing that is missing is the buttons since the buttons are super great because I have an iphone 6s plus buttons are great that accidentally touches the other buttons while I'm playing need for speed refund I accidentally put the tune the car or when game provided (I am lazy and I don't want to download the game on my phone because it is a waste of battery and memory space on my phonePlayStation on my phone witch is fun and add an option in the setting where you can customize the buttons where you can put them somewhere else on the screen and make them smaller and another thing you need is that you can use the daulshock and play on the phone without the only thing that one thing happens and the two things I'm asking for please because someone tv or monitor might break so that they can play on their phone or admin, password: password , it could be different for other people) once in the settings enable DMZ mode and put in the private IP address that is on the mobile phone app) PlayStation that is in REST MODE home from work , this will require 2-4 failed if your PS4 is not on Ethernet n is less than 60% of Wifi signal power, but it should work later as if the PlayStation is in front of you at work.app has a lot of potential for the future. After trying to do a test with Apex Legends, I came to the realization that I simply cannot press all the necessary buttons at the same time when under combat. The controls disappeared after a few seconds and I ended up pressing outside the button limits. I haven't tested an external BT controller yet, so I could see if it has this feature later. But how to use it to control applications and services. It works very well. The chat function works great, but it would be a nice added function to use it just to chat without play audio or video. The quality and framerate is amazing if you have a 100mbps+ internet connection from both host and target networks. Since this application has just been released this morning, I'm sure there are many more features and features planned as technology evolves. Overall, this application works great as a way to play simple arcade games or basic controlled games and is a nice remote, but not ideal to play FPS or more robust games where you need a better hand eye coordination. We'll see what time it has to offer. The developer, PlayStation Mobile Inc., indicated that the app's privacy practices may include data management as described below. For more information, see the developer's privacy policy.
