Creating Resonant Charts with Miro's Chart App: A Powerful Tool for Data Storytelling Miro's Canvas 25 event is coming on October 14, 2025, and we're excited to showcase our chart-making app as a key feature. With Miro apps like the Org chart builder and SmartDiagram, you can create editable organization charts from a CSV file and extract all charts from a single dashboard or just the ones you need. Our Chart app allows you to create a graph fast, with no previous experience needed. You can style your charts and make them yours by editing labels and titles in our built-in graph creator, or add multiple variables contrasting data more visibly. Save time with Miro's built-in chart maker and create a chart with just a few clicks. Miro's collaborative features make it easier to work with others. Tag team members directly on your board, get instant feedback, and invite them to co-create graphs with you. With our robust editing features and extensive Templates Library, you can master your data storytelling and get inspired by our Miroverse community. We offer a variety of graph types, including bar, line, and pie charts. You can input your data into the table or import it from a CSV file, and customize it by adjusting colors, labels, and dates. Share your graph with your team by inviting them to collaborate or exporting it as an image or PDF. Our graph maker is an incredibly powerful tool that allows you to create a wide variety of charts including pie, bar, line, area, scatter, Venn, box plot, histogram, Gantt, and 3D charts. With it, you can easily import data from Excel or CSV files for quick visualization and customize your graph with our extensive editor, which includes features like titles, legends, labels, colors, fonts, themes, styles, and even 3D chart settings.
