Esaote mylab 40 user manual

bioberlin.atwebpages.com › Esaote Mylab 40 Manual ▋▋▋The official user manual. Welcome page with all the instructions to obtain user- name and. Wireless image transfer to MyLabTwice and PC. Service Technicians Ultrasound Forum Esaote Mylab 40 Service Manual Antonio Pisciotta Microtherapeutics Hello, i need the service manual of ultrasonograph Esaote Mylab 40. Consult ESAOTE's entire MyLab™30 Gold Cardiovascular - Brochure catalogue on MedicalExpo.Esaote Mylab 40 UltrasoundEHD Technology: A New Era In Ultrasound. Enhanced Diagnostic Value. Maximizing Signal Information. Low Power Consumption.More Efficient Healthcare eHD is Esaote's technology to innovate ultrasound imaging and improve systems' use. It represents our attention to diagnostic value by optimizing all aspects of the chain a signal has to travel through, starting from the echo generated by the patient's body up to the arrival on the system's monitor. It maximizes the efficiency of ultrasound scanning, leaving the sonographer free to concentrate on the patient. EHD: the quality that improves your diagnostic confidence. IQProbes appleprobe: A Wide Range Of Broadband Transducers Esaote offers a wide choice of probes ranging from phased array to high frequency linear and convex transducers to meet every clinical need and user preference.The transducer is the first element, which connects with the patient's body. It delivers the ultrasound beam and receives the backscattered echo; its technology is extremely important to obtain a high signal to noise ratio and a sharp signal to optimize information regarding spatial, contrast and temporal resolution. Easy Review & Export MyLab™ Desk: MyLab™Desk installs the same software of your MyLab™ ultrasound system onto a standard PC. With this image management solution you can share your data between your ultrasound system and PC for comfortable reviewing and post-processing. MyLab™ App visualizes images and clips on mobile devices for point-of-care reviewing. MyLab™Desk 3 software suite is not intended or provided for an official diagnostic interpretation. The use of Contrast Agents in the USA is limited by FDA to the left ventricle opacification and to characterization of focal liver lesions.Windows® is a registered trademark of Microsoft Corporation. Technology and features are system/configuration dependent. Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries.Product images are for illustrative purposes only. For further details, please.Imaging Processing: Esaote offers many technologies for imaging enhancement. With TEI™, the harmonic signal is fully preserved without degradation of acoustic information. MView and XView improve the quality of ultrasound images by reducing the presence of artifacts, shadowing and speckle. CnTI™ - Contrast Tuned Imaging: Esaote's revolutionary technology, in combination with latest generation ultrasound contrast agents, provides impressive clinical results due to precise micro-bubble detection. The very low applied acoustic pressure, allows the bubbles life time to be increased, for a clear identification of arterial and late phase. The very high probe sensitivity and low level of noise and artifacts bring precise diagnosis, both for lesions detection and characterization.A contrast-dedicated quantification tool is also available. X4D/X3D: Esaote's volumetric technology takes full advantage of the touch panel to optimize workflow, ease of use, and represents a breakthrough in technology. RFQIMT - Innovation and Accuracy in Vascular Imaging: the measurements that are based on beyond state of the art RF-data technology, are real-time, accurate and provide measurement quality indicators overlaid on the B-mode ultrasound image. XStrain™: Strain-Strain Rate top analysis technique for myocardial function evaluation. XHF: very High-Frequency capability The use of Contrast Agents in the USA is limited by FDA to the left ventricle opacification and to characterization of focal liver lesions. Windows® is a registered trademark of Microsoft Corporation. Technology and features are system/configuration dependent.Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries. Product images are for illustrative purposes only. For further details, please.MyLab™Desk 3 software suite is not intended or provided for an official diagnostic interpretation. Technology and features are system/configuration dependent. Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries.Esaote Mylab 40 UltrasoundFor further details, please. Peripherals Esaote suggests a complete range of dedicated which can be connected to your ultrasound scanner to allow the best image quality printing and cover any specific need in diagnostic archiving. Choose your own commercial printer and get the best image quality you wonder. The Ultrasound Peripherals connectible to the echograph are system/configuration dependent.To receive more info about the specific characteristics and the compatibility with the present ultrasound system, please. Technology and features are system/configuration dependent. Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries. For further details, please.Certifications The MyLab™40 manufactured by Esaote, complies with the Medical Device Directive (MDD) 93 42 EEC. In accordance with this directive, Esaote has classified it as Class IIa devices. The MyLab™40 ultrasound imaging systems have been cleared by the Food and Drug Administration (FDA) via 510(k).Technology and features are system/configuration dependent. Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries. For further details, please.CFM, PWR D, CW and PW Doppler Imaging. Phased array, convex, linear, Doppler pencil and endocavity probes. Multi-frequency broadband transducers (up to 18 MHz). 200° endocavity transducer.CnTI - Contrast Tuned Imaging for contrast media procedures SPECIFICATIONS Cart Based 1 Clinical Applications Colorectal Image Display 17 in & 19.
