Buy all your ceilings and insulation products at Gypsum Ceiling board prices in Kenya. We also have roof heat insulation and products onboard Related Ceiling board prices in Kenya. ceiling boards you can use for your project ranging from the cheapest to the most luxurious. Your pocket and style remain supreme is the decision makers. Before we delve into it, Gypsum boards, you will need; gypsum accessories like; gypsum studs, gypsum channels, gypsum screws, gypsum fiber tape, gypsum fiber tape, gypsum filer. You can also accessorize the ceiling with crown mouldings like ceiling medallions, cornices, marble sheets, wainscoting panels, fluted panels etc. You can check our wide range of osum coffered ceiling design can cost approximately 3, 500 Shillings per square Metre. This design requires a large surface area - more than 30 square Metres to be specificGypsum Ceiling Designs with BulkheadsGypsum normal design is also modern but slightly costly due to the several gypsum ceiling materials used to craft. This design simple bulkheads with indirect lights and downlights combined. A modern Designer ceiling with bulkheads can cost approximately 2, 800 shillings per square Metre. To be able to actualize such a ceiling design, you need to consider adjusting the height of the interior rooms to at least 3 Metres. A two level bulkhead ceiling can take an average suspension of 250mm while a 3 level bulkhead ceiling can be suspended up to 350mm. The required ceiling height should be factored in the structural design of the house. Therefore architects, Engineers, builders and developers should take note of this important elementAs a gypsum designer, i usually say 'Simple is Gold if its build with the right builders 'Gypsum plain ceiling is very simple and stylish, in fact when installed, you can confuse it with concrete ceiling. Its advantage of installing a gypsum board ceiling is durability, beauty and simplicity. Gypsum ceiling also adds a sense of life within a room especially when blended well with other interior furnishings. If you are considering a gypsum ceiling, better find an expert installer otherwise you might get disappointed at the results if you choose an armature. A plain gypsum ceiling is one of the oldest type of ceiling in Kenya loved by many because of its rustic style. Tile and Groove (TnG) mahogany ceiling is a traditional type of ceiling is a traditional type of ceiling which is still very popular in Kenya and especially for the old age clientele. The ceiling is a traditional type of ceiling which is still very popular in Kenya and especially for the old age clientele. love the rustic style especially in visible sections like the verandah, sitting room and corridors. Mahogany TnG ceiling is also best for the exterior eves since the levels have to be perfect and the grooves should balance as required. If blended well with other interior decor furnishings, this type of ceiling looks very stylish, rustic and luxurious in farm houses, townhouses etc. Mahogany is expensive but long lasting. Are you thinking of installing this ceiling? Well it can cost you approximately 4, 800 shillings per square Metre. Note that buy wood with is completely dry and treated! Thank me laterCypress TnG Ceiling is another wood ceiling but it is called so because the panels are of cypress is an elegant wood grain, kuna wale wanaipenda vile ilivyo. Cypress is not as strong and good as mahogany but you can save some coins if you consider it other than mahogany. Wooden ceiling is not fire resistant, so think twice as you meditate over your ceiling choice. The cost of installing a TnG cypress ceiling in Kenya is approximately Ksh 3, 500 shillings per square Metre. Cheap board ceiling. We have the flowered and the plain type. Many people call it ceiling board. In the 1990s when i was a kid, any luxury house in my village used to have chipboard ceiling installed, This ceiling was very popular those days, now technology advancement is facing it out. The ceiling is cheaper to installing a chip board ceiling including supply and fix costs Ksh 1, 500 per Square MetrePVC Ceiling Panels heavy gauge is also another budget friendly plastic ceiling we import from China for the Kenyan market. These are large panels manufactured in wooden shades such us mahogany, cypress etc. The panels actually mimics wooden grains. I love the panels due to their strength an longevity. PVC Heavy gauge are water resistant, UV resistant and budget friendly. Why budget friendly? Because a single bundle of PVC Ceiling Heavy gauge in Kenya costs approximately Ksh1, 000 Shillings per square Metre. You can actually fix on the exterior eves or interior sections of a residential house finally, the cheapest ceiling in town is PVC light gauge, when it falls after 30 days, please don't blame me. The panels are very light and not quite durable. I have seen then installed in rental houses that are not complexly exposed to wind and excessive heat, If the panels are faced with such hostile temperatures, they fall off so easily. I advise you fix if you really have no choice or need temporary cover. A bundle of PVC Ceiling light gauge in Kenya costs Ksh 2, 500 Shillings. The cost of installing PVC Ceiling Light Gauge panels in Kenya costs approximately Ksh 1000 per square MetreWe have checked on almost all the residential ceilings available in the Kenyan Market. At Ebuild, we import and produce building materials for the ceiling systems and East Africa. Some of the ceiling system and baffle ceilings. Before we delve into it, Gypsum ceiling is a combination of gypsum boards, you will need; gypsum deards, you will need; gypsum studs, gypsum studs, gypsum fiber tape, gypsum fiber tape, gypsum corner tape, steel nails, sandpaper, paint and gypsum filler. You can also accessorize the ceiling with crown mouldings like ceiling medallions, cornices, marble sheets, wainscoting panels, fluted panels etc. You can check our wide range of gypsum boards and order online on 0743665665Gypsum coffered ceiling medallions, cornices, marble sheets, wainscoting panels, fluted panels etc. bulkheads and crown mouldings involved in crafting it. Besides, the multiple materials used to craft the ceiling, gypsum technicians usually charge higher installation prices because the design is time consuming and messy. A gypsum technicians usually charge higher installation prices because the design requires a large surface area - more than 30 square Metres to be specificGypsum Ceiling Designs with BulkheadsGypsum normal design is also modern but slightly costly due to the several gypsum ceiling with bulkheads can cost approximately 2, 800 shillings per square Metre. To be able to actualize such a ceiling design, you need to consider adjusting the height should be a suspension of 250mm while a 3 level bulkhead ceiling can be suspended up to 350mm. The required ceiling height should be able to actualize such a ceiling design, you need to consider adjusting the height should be able to actualize such a ceiling can be suspended up to 350mm. The required ceiling height should be able to actualize such a ceiling can be suspended up to 350mm. be factored in the structural design of the house. Therefore architects, Engineers, builders and developers should take note of this important elementAs a gypsum designer, i usually say 'Simple is Gold if its build with the right builders 'Gypsum designer, i usually say 'Simple and stylish, in fact when installed, you can confuse it with concrete ceiling. Its advantage is that you can easily install downlights, speakers and panel lights easily. Overall, the advantage of installing a gypsum board ceiling is durability, beauty and simplicity. Bypsum ceiling a gypsum board ceiling is durability, beauty and simplicity. expert installer otherwise you might get disappointed at the results if you choose an armature. A plain gypsum ceiling is one of the oldest type of ceiling in Kenya loved by many because of its rustic style. Tile and Groove (TnG) mahogany ceiling is a traditional type of ceiling which is still very popular in Kenya and especially for the old age clientele. The ceiling is also most expensive due to governing reinforcements of go-green around the World. Modern builders and house owners love the rustic style especially in visible sections like the verandah, sitting room and corridors. Mahogany TnG ceiling is also best for the exterior eves since gypsum is not suitable for such sections. Mahogany ceiling requires specialty since the levels have to be perfect and the grooves should balance as required. If blended well with other interior decor furnishings, this type of ceiling looks very stylish, rustic and luxurious in farm houses, townhouses etc. Mahogany is expensive but long lasting. Are you thinking of installing this ceiling? Well it can cost you approximately 4, 800 shillings per square Metre. Note that buy wood with is completely dry and treated! Thank me laterCypress TnG Ceiling is another wood ceiling but it is called so because the panels are of cypress wood. Cypress is an elegant wood grain, kuna wale wanaipenda vile ilivyo. Cypress is not as strong and good as mahogany but you can save some coins if you consider it other than mahogany. Wooden ceiling is not fire resistant, so think twice as you meditate over your ceiling choice. The cost of installing a TnG cypress ceiling in Kenya is approximately Ksh 3, 500 shillings per square Metre. Cheap board ceiling is another old school type of ceiling. We have the flowered and the plain type. Many people call it ceiling installed, This ceiling was very popular those days, now technology advancement is facing it out. The ceiling is cheaper to install because you only need the panels that costs Ksh 900 and 2'x2'. So if you are on a tight budget, then this is your ideal ceiling including supply and fix costs Ksh 1, 500 per Square MetrePVC Ceiling Panels heavy gauge is also another budget friendly plastic ceiling we import from China for the Kenyan market. These are large panels manufactured in wooden shades such us mahogany, cypress etc. The panels actually mimics wooden grains. I love the panels due to their strength an longevity. PVC Heavy gauge are water resistant, UV resistant and budget friendly. Why budget friendly? Because a single bundle of PVC Ceiling Heavy Gauge covers 11 square metres and costs Ksh 5, 000 shillings per square Metre. You can actually fix on the exterior eves or interior sections of a residential houseFinally, the cheapest ceiling in town is PVC light gauge. Guys, i mean light gauge, when it falls after 30 days, please don't blame me. The panels are very light and not quite durable. I have seen then installed in rental houses or houses that are not complexly exposed to wind and excessive heat, If the panels are faced with such hostile temperatures, they fall off so easily. I advise you fix if you really have no choice or need temporary cover. A bundle of PVC Ceiling Light Gauge panels in Kenya costs approximately Ksh 1000 per square MetreWe have checked on almost all the residential ceilings available in the Kenyan Market. They not only add to the aesthetics of a space but also provide protection from the elements. In Kenya, there are several types of ceilings to choose from, each with its own advantages and disadvantages. In this article, we will provide a comprehensive guide to ceiling types and prices in Kenya. They are easy to install, fire-resistant, and have good thermal and acoustic insulation properties. They are also flexible, meaning that they can be shaped into various designs and patterns. Gypsum ceilings are relatively affordable, with prices ranging from Ksh. 2,000 to Ksh. 3,500 per square meter. PVC Ceilings are made of lightweight plastic and are easy to clean, and come in a wide range of colors and designs. PVC ceilings are a cost-effective option, with prices ranging from Ksh. 2,000 to Ksh. 3,000 per square meter. Wood Ceilings are a classic and timeless option that adds warmth and character to any space. They are available in different types of wood, such as cedar, mahogany, and pine. Wood ceilings are a classic and timeless option that adds warmth and character to any space. are relatively expensive, with prices ranging from Ksh. 4,000 to Ksh. 6,000 per square meter. Metal ceilings are made of aluminum or steel and are a durable and long-lasting option. They are fire-resistant, easy to clean, and can be painted to match any decor. Metal ceilings are relatively expensive, with prices ranging from Ksh. 4,500 to Ksh.6,000 per square meter. Mineral Fiber Ceilings are made of a combination of mineral insulation properties. They are a popular choice for commercial spaces, as they have good acoustic and thermal insulation properties. ranging from Ksh. 3,500 to Ksh. 5,000 per square meter. Polystyrene Ceiling Polystyrene ceilings are made of lightweight polystyrene foam and are easy to install. They are a cost-effective option, with prices ranging from Ksh. 1,500 to Ksh. 2,500 per square meter. They are also good thermal and acoustic insulators, but they are not fire-resistant and can be easily damaged. In addition to the types of ceilings, there are also different styles and designs to choose from, such as plain, textured, or patterned. The price of a ceiling will also depend on factors such as the size of the space, the complexity of the design, and the quality of materials used. How to Choose the Best Types of Ceiling in Kenya Choosing the right type of ceiling for your space is an important decision that requires careful consideration. Each type of ceiling has its own advantages and disadvantages, as well as a different price range. It is important to weigh the pros and cons of each option before making a decision. With this guide to ceiling types and prices in Kenya, you should be well-informed and able to make a confident decision that will suit your needs and budget. When it comes to the installation of ceilings, it is important to hire a professional contractor who has experience and experise in the specific type of ceiling you want. The installation process requires skill and precision to ensure that the ceiling is properly aligned, and there are no gaps or uneven surfaces. It is also important to consider the maintenance than others. For example, wood ceilings may require regular polishing or varnishing to maintain their appearance, while PVC ceilings are easy to clean and require little maintenance. In addition to the cost of the ceiling itself, it is important to factor in the cost of installation, as well as any additional expenses such as lighting fixtures, vents, or insulation. These costs can add up, so it is important to have a clear budget in mind before starting any work. Creating a gypsum ceiling can add a sophisticated touch to your home or office space. Here's a general price list for gypsum ceiling materials, though prices can vary based on location, quality and supplier: Gypsum Boards: These are the primary materials used for the ceiling. The price typically ranges from Ksh500 to 2900 per 4×8 foot sheet, depending on the thickness, type and brand. Metal Framework: To support the gypsum boards, you'll need a metal framework. Prices for metal study and tracks usually range from Ksh140 to Ksh250 per 2.5m. Drywall Screws: Essential for attaching the gypsum boards to the metal framework. A box of 1,000 screws costs Ksh350 to Ksh800 depending with gualityjoint Compound: This is used to fill the gaps and seams between gypsum boards. A 25Kg bag typically costs between 1200 and 1900 depending with size. Corner Beads: For finishing the edges and corners, these usually range from 100 to 250 per 8-foot piece.Primer and Paint: Once the ceiling is installed, it will need to be primed and painted. A 20L of primer costs around Ksh4500, and finishing paint can range from Ksh 10000 to Ksh4500, and finishing paint can range from Ksh4500 to Ksh4500 to Ksh4500, and finishing paint can range from Ksh4500 to 500 to 1100 per square metre depending with professionalism, finishing and quantity of workAlways check with Gypsum Ceing Supplies for the best rates and best quality materials for your project.
