Cos'À Botox? Botox is a natural protein that is used by doctors for therapeutic purposes, such as excessive sweating, chronic pain and cervical dystonia, for years. When Botox is applied to the muscles in the face, it prevents wrinkles from appearing. The usually wrinkles appear around the eyes, mouth and forehead during facial expressions such as frowning or smiling. How does Botox? During a Botox procedure, Botox is injected into facial muscles. This relaxes the muscles to be targeted and blocks nerve impulses. As a result of this, the targeted muscles can no longer contract to cause the rough softening and becoming less noticeable. Where it Used Botox? Botox is most effective in three main areas ... The front lines frog frog lines between the eyebrows, the area around the eyes (commonly known as "foot of the feet") How long Boto? Botox It can last from three to six months. If the muscle that is treated is treated regularly, the benefits of treatment can increase dramatically over time. 1A Canary Wharf Tube Station, London E14 4HJ 4.8 192 reviews Based on Sarah ouis 11:44 29 Oct 21 I come here regularly (almost weekly) and I deal with Carlo and always does an amazing job with .... have a fun personality the whole team is good, they take the appointment on time and do a great job!
