How to Create an Interactive Pop Music for Free We all know that variety is the spice of life, so why most quizzes are to the same multiple choice or open-end format throughout? There is so much you can do with a pop music quiz. Mix the questions with a spicy variety of multiple choice text, image, sound and some open-ended questions as well. Or you could get out of here. Here. Fully formatted pop music quizzes and indulge in some off-the-box types of rounds. Find out below how to use AhaSlidesÁ! a free software to do a creative and engaging quiz of pop music, both as a team and soloist, whichÁ! Á! 100% online! Quiz Type #1 "Multiple choice text The standard format for any pop music quiz is the multiple choice question. Simply write down your question, the correct answer, some wrong answers and let your players come up with their best guesses. Quiz Type #2 Multiple-choice image Are you doing a pop quiz on album covers or band members? Multiple choice image slides have gotten your back! Write the question, offer a correct image (or GIF) and a few wrong images, and see who gets it. You can upload images and GIFs directly from AhaSlides with its built-in image and GIF libraries. Quiz Type #3 Multiple Choice Sound At its heart, of course, music is not about text and image, but about sound. Fortunately, you can incorporate audio very easily into any slide on AhaSlides. Give your players an introduction to the song and a time limit within which to name the song. You can assign points for the fastest answers, too! Quiz Type #4 Open-Ended With any text, picture or pop music quiz, you can choose to make the question open rather than multiple choice. Removing multiple choice can make a question a lot harder, so it's a great idea to do it with questions that you think are too easy. Just ask the question and list the answers you accept on the slide. Any answer that matches exactly one of these will get points. Quiz Type #5 á Word Cloud A word cloud is one of those pre-packaged quizzes we talked about earlier. It works on the same principle as the British Pointless game. Just give your quiz players a category and ask them for the darkest answer in that category. Answers that are mentioned less get points and answers that are mentioned more get nothing. For example, you can create a word cloud slide and ask your players for one of the top 10 Billboard artists of all time. The answers that appear to be the biggest are the ones that have been proposed the most by your players. The smallest correct answer that appears is the one that brings home the points! Note that word clouds are not classified as quiz slides, so you'll need to write down the scores yourself. Want to do an interactive online pop music quiz for free? It's never been this easy.
