The revelation of last week that Facebook shared what you do on the site with other companies like Microsoft and Amazon has brought some of us to start considering (perhaps not for the first time) the cancellation of Facebook and other proprieto apps of the company as Instagram and whatsapp. If you use Instagram, it is likely that you have already started to see your friends post collage of [A «Learn more](#) [Elimini Instagram](#), your photos go hand in hand. Unless you do it before the backup. Excerpt your photos on Instagram and create a backup somewhere is a good idea in general. even if you're not thinking of leaving the platform. Having said that, if you're thinking about going, then it's something you would definitely do. Here's how to make it happen: First, start the Instagram app on your phone and then touch the profile button at the bottom right of the page. From here, it touches the Menu button (the three overlapping lines) at the top right of the screen and select [A «SettingsA»](#) from the drop-down menu (it is at the bottom) .Verso the half of the next menu, you will see a list of [A «Date Download.A € »Request the download. A «The download will not be instantly. Instead, Instagram will send you an e-mail when your photos are officially ready for download and will include a link to take them. The process can take up to 48 hours, so make sure you are ready to wait. Once you have backed up, you can delete your account freely without fearing to lose a favorite photo. But when these are not around, here's how to view photos online. Many people are not realized that they can access all the photos and videos that stored in iCloud's photographic library from any desktop computer, provided you have access to iCloud.com. It's a feature that Apple has not done a good job of sharing with people, which is a pity because it can be very useful. To start, everything you need is a connection to iCloud.com, your Apple ID and your password, and your two-factor authentication code. You have a two-factor authentication active, right? To start, open safari \[A «or any other web browser if Safari is not available»\]\(#\) and go to iCloud.com and log in with your Apple ID and your password. When you are authenticated, click on the photo icon. Once the page is loaded, you will see something similar to photos on a Mac, even if a little less capable. If it's the first time you use iCloud.com to view your library, you may want some time to put everything together. Not Having the same editing tools would expect on an iOS device or a Mac, but the IL It will give you access to view all the photos or videos you have stored in iCloud Photo Library. Clicking on a photo opens completely. If you want to upload a new photo or video, click the icon with a cloud and an upward arrow, as shown below. To switch between the Moments and Photos views, click the desired option at the top of the screen. The ability to view your photos and videos online is great if you're using a Windows PC, for example. If you want a smoother Windows experience, with faster control over your photos and videos, you can download and install Apple iCloud Photos for Windows. A free download, this app gives you access to your iCloud photo library without using a web browser. They will appear in a special folder "iCloud Photos" in File Explorer. "Publish some photos on Instagram!" he said, "It'll be fun!"", he said. The truth is, Instagram is fun, rewarding too, as long as people love your photos. Still, sometimes it's easier said than done. We were all there, sitting nicely with a new Instagram account, getting less than 3 likes per post, wondering, "How the hell do I know what other people want to see? "Never be afraid.Take a look at 5 of the most popular types of Instagram photos we could find. 1. Quotivational Instagram PhotosEveryone has seen them at some point or another "These kinds of posts, although they sometimes seem trivial, can be motivating and inspiring. They are simple, easily digestible, catchy and applicable. If you're looking for a good way to quickly transmit small pieces of information, this might be a good type of post to review. Keep your message short and recognizable, and those of the calibre will come out. An impressive example of Instagram influencer using these posts can be found in the British top model Cara Delevigne. Instagram fitness and business accounts tend to favor this kind of photos as well, embracing a wide range of demographics, showing its versatility.2. A Instagram Organizational PhotosNobody knows why, but perfectly crafted images of neat objects filling the screen have always been a popular tactic among many influencers. Instagramcer. Perhaps it is the smallest of Type A present in each of us, but the premise is simple "appeal" to the human desire to order.If Herschel Supply can seize the opportunity to promote the capacity of its line of backpacks imagine the possibilities which you could tap into with smarter thinking and strategic research. It involves sending seasonal-themed photos around big parties. Christmas, Thanksgiving, Easter, Valentine's Day, etc. Everyone's attention will already be fixed for the day ahead, so give them more than they want! Instead of one of your dog A"try a photo of your renderer.A" Spice things up with some milk art snowflakes. Valentine's Day? The heart. Hearts everywhere. Everywhere. Text Messages Photo ScreenHave you ever felt the need to snoop through your neighbor's text conversation? Don't lie, we all did. Who doesn't want to take a look at the forbidden knowledge? Try to capture that addictive quality with fun screenshots of text conversations. They don't even have to be real conversations. A fun account displayed messages only between a dog and its owner! Even true stories are great, although some encounters can't be made up. Some of the most popular Instagram accounts are made up entirely of photos like these.This is a bit more tailor-made for people with a product or service and a captive audience. Getting your followers actively involved is a great way to increase sales or increase your followers. For example, when Calvin Klein launched the \[#MyCalvinsA'\]\(#\) promotion on Instagram, he encouraged users to capture interesting moments by promising the ability to be shared by Calvin Kleinâs main account. Not only has it become very popular, but it has triggered viral sharing. Create your own ideasIf you're trying to create your own kind of idea, or you're just trying to give a new twist to one of the classics above, we recommend you turn to the famous Instagram influencers who have inspired and amazed countless others. Take what they did and build on it. Create something using proven and true principles, but put your own personal touch into it. Post Instagram photos that uniquely represent you. Always remember that the real reason people are following you is you. Tap Settings > Accounts > Original Photos and select Save Original Photos to On to save your photos to your device.You can mark other users' photos for next reference, but Instagram doesn't offer any in-app ways to download them.The best solution for a high-quality version of another user's photo is to contact them directly and request one. This article explains how to save your Instagram photos and bookmark those of other users. If you upload an existing photo to Instagram without using any in-app filters or editing features to make changes, of course you already have a copy on your device. But for those who take pictures directly through the app or upload existing ones with Instagram filters and editing effects applied, saving a copy of the finished product that is published can be done easily and automatically by activating a simple setting. Here's how to do it: From your profile tab, tap the menu button at the top. Tap Settings. Tap Account. Choose Original Photos on iOS or Original Messages on Android. If this setting is enabled, all your posts will be copied automatically when you publish them to a new photo album or folder labeled "Instagram" photo album of your mobile device. This applies to all posts including those that you click through the Instagram application, those that you upload from the device without changes made to them and those that you upload from the device with filter effects and andEffects applied to them. Instagram has a rescue function built directly in the app. While restricting to bookmark the bookmark, the photo or post video card and don't actually download anything on your device, it's even better than anything. Previously, the only way you could really book a photo or video for that matter, from another user within the Instagram app was sympathy and then accessing your favorite posts from the Settings tab. To save any post on the saved card, tap the bookmark icon in the lower right corner. To get to this tab, tap the Menu button from the profile page, then saved. No notification will be sent to the user who published it. The two great negatives for the Instagram save function are: an internet connection is required to be able to revisit the post saved inside the saved appthe will disappear if the user who has published will eliminate it. Remember, using the bookmark function is just a link to the photo. Nothing is saved on your account or on your device. On the other hand, if you want to follow comments on a popular post, you can save the post and go back to it later to read new comments, which is at least a very useful way to use it. If you have ever tried to right-click with the right mouse button on an Instagram photo on your computer or tried to do the equivalent on a mobile device by touching and holding on a photo while you are viewing In a mobile web browser, you probably wondered why nothing opens and allows you to download or save that image. Instagram is fine with you unless copies of your photos on your device or do bookmarks in the app because you have them, but it does not claim the property of any content published in the app, so it is up to you to get permission from other users if you want to use Their content. Your best solution, therefore, to download the photo of another user? Ask them a copy. Thank you for letting us know! Tell us because! Because!](#)
