Application android tv samsung

Warning: Can only detect less than 5000 charactersWith main players like Samsung, LG, Android TV TV Apple TV. In this list you will find official resources and third parties for the development of smart TV app and communicate with the TV by remote devices. The contents are the following platforms are the most popular platforms for Smart TV. The full list is here. official Samsung Tizen Remote Control Libraries SAMSUNGCTL third parties - Library Resources and control tool for the remote control TVs Samsung via a TCP / IP connection. It currently supports both TVs pre-2016, the most modern TV Tizen OS-connectivity with Ethernet or Wi-Fi (Python). Samsung-TV-remote - node.js Module for remotely control Samsung Smart TV from 2016 (JavaScript). Homebridge-Samsungtv2016 - A plugin for Homebridge that lets you control your Samsung TV in 2016 with HomeKit and Siri (JavaScript). Homebridge-Samsung-Tizen - A plugin for Homebridge that lets you control your TV with Samsung Tizen HomeKit and Siri (JavaScript). Samsung-remote-models-2014-and-newer - Encrypted communication with the internal Web service of the Samsung TV models 2014+. SmartCrypto - smartview2 API Implementation handshake encrypted in C / Python. Samsung-Messagebox - Python Script to show notifications on Samsung TVs. SAMSUNG-TV-CONTROL - Library for the Samsung TV remote control in your node.js Other official resources LG WebOS WebOS Developers TV Resourcenti official website - WebOS TV Apps Development Principles, tutorials, API documentation and packaging tools. WebOS SDK + TV IDE - IDE for the development of the app included emulator interface and command line. Connect SDK - Open Source Framework developed by LG that connects your mobile apps with more multimedia platforms. It currently supports 8 platforms. But it seems abandoned. Forum for TV WebOS developers - Ask questions, share information and learn about the development of Smart TV app with other developers. Remote Control Libraries LGTV2 third parties - Node.js module for the remote control of LG WebOS TV using the WebSocket messages (JavaScript). Node-Red-contrib-LGTV - Form-red knot that allows the remote control of WebOS LG Smart TVs (JavaScript). Node-webOS - Node.js module to discover and control the webos TVs (JavaScript). LGTV2MQTT - WebOS interface between LG Smart TVs and MQTT (JavaScript). ARES-WebOS-SDK - WebOS CLI as a separate NPM (JavaScript). PYLGTV - Library for controlling the TV LG devices based on WebOS (Python). LGWebosremote - Command line tool for WebOS TV Remote Control LG (Python). Homebridge-webOS-TV - A plugin for Homebridge that lets you control your TV WebOS. Pywebostv - A library generic client and interesidabile WebOS 3.0 (python2, python3). Go-webOS - Go A small library for interacting with webos TVs (Golang). Videos More OpenLGTv.org.ru - A non-commercial project for reverse engineering and legal research on LG television firmware. It seems a bit 'outdated but it contains a lot of information. Identifying the TV LG 2011-2017 models - How to get the screen size, the type of matrix, the type of development, the series and the parameters of the series and ohter by the name of LG TV model. Android TV official resources ARTICLES ARTICLES APPLE TVOS STATILE SVILUPPERS RESOURCES OFFICIAL SITE - SDK, documentation and tutorials for developing apps TVOS. TVML - Apple TV markup language for creating app TVOS. Google Chromecasts officers Resources Framework platform React-TV - React Development for TV: renderer for low-memory applications and packager for WebOS, Tizen, Orsay. Toast - Samsung Framework open source app for TV multi-platform development. Enyo - LG Framework for app development for all major platforms, from phones and tablet PCs and TV. Smartbox - Smart TV Universal Library for Samsung, LG, Philips, SmartTV Ailancio, May STB App Development. Mautilus Smart TV - A agnostic platform-panel for the development of television apps. Supports Samsung, LG, Philips, Sony, Panasonic and Vestal Smart TVs. BBC TAL - An Open Source library for the construction of smart TV applications developed by BBC Engineers. PureQML TV - A declarative front-end framework for Web-based SMARTTV / STB platforms. Experimental experimental of Android TV. Zombiebox - an open source intelligent television picture. Navigation management D -Avascript Strongly typed, based on component, D-Pad management, Abstract Video API with DRM for all platforms. Supports many platforms such as Tizen, Webos, Android TV, etc. DLNA Remote Control Protocols - Standard at the sector level to share data on a home network. Depending on the devices compatible with DLNA you have, you may be able to flows movies from your laptop to your TV, play a MP3 stored on your phone via your Hi-Fi system or print a photo from the tablet on the home printer. Dial - Developed by Netflix and Google, this protocol amounts to client devices (such as smartphones, tablets or computer) to find out the apps on server devices (such as a smart TV or a streaming box) and start content on them. Wi-Fi Direct: Standard enabling devices to easily connect to each other without requiring a wireless access point. Miracast - Standard for wireless connections from devices (such as laptop, tablet or smartphone) to display (such as TV, monitor or projectors). Work on Wi-Fi Direct. Suitest navigation libraries test - Smart TV test automation solution, game console, streaming sticks etc. STB-Tester - Automatic user interface test for set-top boxes and Smart TV (Python). MISC LICC - A package that allows you to decode and send many infrared signals (but not all) with commonly used remote control. AWESOME-SMARTTV - Another list of smart TV resources. Discovered after this was already done Â ° Â¿ â "¢". Docker-Tizen-Webos-SDK - Docker Image with Samsung Tizen CLI and LG Webos CLI. It allows you to develop, build, launch and debug apps Smart TV without installing Tizen Studio and WebOS SDK. Community helps to feel free to share your experience and contribute with useful extension resources by creating new problems or shooting requests. Please read the contribution guidelines first.
