Android missed call notification not showing samsung. How to fix missed call notification not showing in android. Android phone missed call notification not showing. Why aren't i getting missed call notifications. Why is my missed call notification not showing up. How do i fix missed call notifications.

The notification drop-down list on your Android smartphone simplifies your daily life. You can see all notifications sent through apps at a glance. This is especially beneficial for calling and messaging apps. You want to fix a missed call. The warning is not displayed. This issue can occur due to UI glitches or an app bug that doesn't trigger notifications. If this is your problem, don't worry, we have a solution. The golden rule applies to all methods if they are flawed. Just reboot and fix minor bugs and issues. Rebooting your phone will make your smartphone UI work again, removing temporary glitches and solving UI-related issues. This will also restart the dialer application, ultimately forcing the application to start from scratch. Most minor errors are fixed by a simple restart. A bad cache file can cause notification issues. To fix this issue, all you need to do is remove the trick and try using the app again. To do this, first press and hold the app and go to app details, inside go to cache and storage and then tap on Clear cache. Try using the app, if that doesn't work, follow the same steps and click on clear data instead of clearing cache. This will most likely solve the problem. Also Read: Apple approves TRAI's DND app to avoid iPhone ban in India. A great example of this is Truecaller, which is used by many people. The app often asks to be the default dialer app. If you do, you will not receive notifications from the phone app. Follow these steps to review and cancel. Step 1. Open Settings and go to Apps & Notifications. Step 2 ✓ In the Advanced section, go to the default application. Step 3 Check the Phone app. After making the changes, check if the problem is solved, if not, don't worry, try the next step. The expandable notification option on your Android smartphone makes everyday life easier. At a glance, you can see all the notifications sent through the app. This is very useful especially for calling and messaging apps. You want to fix the missed call notification not showing up. This problem can occur if the interface crashes or the application starts with an error and no notification is requested. If this is the problem you are facing, don't despair because we have a solution. The golden rule applies to all technology, if it doesn't work. Just reboot and fix minor bugs and issues. After restarting the phone, the smartphone user interface will start working again, removing temporary glitches and solving user interface related problems. This will also restart the caller, which will eventually cause the program to start from scratch. Most minor errors are fixed by a simple restart. A bad cache file can cause notification issues. To fix this, just remove the hook and try using the app again. To do this, first press and hold the app and go to app details, inside open cache and memory, then press clear cache. Try using the app, if that doesn't work, follow the same steps and press clear data instead of clearing cache. This will most likely solve the problem. Also Read: Apple approves TRAI's DND app to avoid iPhone ban in India Best example is Truecaller which is used by many people. The app often asks you to set it as the default dialer app. If you do so, you will not receive notifications from the phone app. Follow these steps to review and cancel. Step 1. Open Settings and go to Apps & Notifications. Step 2 In advanced mode, switch to default app. Step 3 Check the Phone app. After replacing, check if the problem is solved. If not, don't worry, try the next step. There is a high chance that the notification option will cause an error, and if it is turned off for some reason, it is very easy to turn it back on. Step 1. Press and hold an app to learn about the app. Step 2 - Inside, go to Notifications. Step 3 - Turn it on, especially check the missed call notification. Also Read: How to Join Missed WhatsApp Video Calls? Do Not Disturb prevents apps from showing you notifications and keeps pop-ups in the background. If DND is enabled, the phone will not display the missed call notification. To check this, turn off the notification center and look for the Do Not Disturb option and make sure it is disabled. How to fix missed call notification not showing on Android. If none of them work for you, try checking for system updates or factory reset your smartphone, which will surely fix the problem. Problems with your Android 12 or other Android device will be solved successfully. Shruti is a BSC Computer Alumnus, Writer and Editor at A Savvy Web, has experience providing solutions and tips for troubleshooting and solutions for iPhone, iPad, MacBook and Windows PC. , Android, Smart TV expert, she is very enthusiastic about this field and is a real-time expert. Are you trying to check missed call notifications but they don't appear? You've checked the notification bar and nothing is showing. The token counter doesn't show anything, and some missed call notifications don't show up even after checking the call logs. It's restless! However, after reading this article, you will know how to solve and fix the missed calls problem. Let us begin! Reasons Why Android Won't Show Missed Call Notifications Before we start troubleshooting, let's take a look at why missed call notifications disappeared. Disabled phone notifications The phone app does not have the required permissions. Do Not Disturb (DND) is on. Corrupt cache and accumulated data. Switch to a third-party dialer app Check: Top 25 in Play Store waiting for download. solve the problem How to fix missed call notifications not showing on Android. 1. Restart your phone. Have you tried restarting your phone? Try restarting your phone. This can help solve the problem. 2. Turn on phone notifications. Missed call notifications will not appear because you may have disabled notifications on the phone. Disabling phone notifications prevents the Phone app from displaying missed call notifications. To turn on phone notifications, follow these steps: Go to Settings. Tap Apps/Apps & notifications. Select the phone app from the list. Click Notifications to show notifications, and enable "Allow notifications" problem with missing call notifications not showing up. You may also be interested in: Common Mobile Phone Keyboard Problems and How to Fix Them 3. Turn on Do Not Disturb (DND) mode. This may be the reason why missed calls are not displayed. Turn off Do Not Disturb and see if the issue is resolved. disable DND mode: Go to Settings>Tap Sound>Tap Do Not Disturb>Tap Turn Off Now However, if you want DND mode to be on all the time, you can turn on Calls only to view missed calls. Tap Calls and select Allow Calls. You have options like "Allow from any contact" or "Only starred contacts". 4. Grant the required permissions to the phone app Make sure the phone app has the required permissions. They include; Call logs and phone. Grant the necessary permissions to the phone app; In the app drawer, press and hold the phone app. Tap App Details. Select Permissions. Enable necessary permissions like call logs, phone and contacts. This helps to solve the problem. 5. Give the phone app special access If you don't see the missed call notification even after granting the necessary permissions, give the phone app special access. Special app access allows your phone apps to run smoothly in addition to other permissions. Give your phone app special access to apps; Go to Settings > Apps/Apps & notifications Tap Special app access Select Show in other apps Select a phone app from the list Tick Enable browsing through other apps Check if the issue is resolved. 6. Restore Default Phone App Have you recently installed a third-party dialer app? This may be the reason why missed call notifications do not appear. To resolve the issue, restore the default phone call application. How to restore the default phone call application; Go to Settings > Choose apps Default apps In the app, tap Phone 7. Clear app data and cache. When the app cache builds up, it can cause apps to crash. You may experience performance issues that require clearing the cache from time to time. Clearing the cache will remove temporary files stored in the phone app and your apps won't lose any data. How to clear the application cache; Go to settings. Tap Applications. From the All Apps list, select the Phone app. Click Storage & Cache. If the same issue persists, clear the data. Follow the same procedure as above, but this time select Clear Storage instead of Clear Cache. When clearing storage or data, all settings and history of the app will be deleted and the app will be restarted. Read also: How to disable Google Smart Lock in Chrome and Android 8. Reset app settings. If the problem persists, reset the app settings. Resetting app preferences will return all apps to their original state. You must grant new permissions. Resetting app preferences restores disabled apps and removes restrictions on permissions, notifications, and background data. Resetting app preferences will not delete data from your apps. reset application settings; Go to "Settings". Click All Apps. Click the three dots icon in the top right corner. Click Reset App Settings. Confirm step 9. Disable caller ID and anti-spam. Sometimes the anti-spam feature may activate your notifications. Temporarily turn off the anti-spam feature and see if that helps. How to disable caller ID and spam protection; Open the Phone app. Tap the three-dot icon in the top right corner and select Settings. Click Caller ID and Spam. To disable this feature, turn off the Caller ID and Spam button. 10. Disable third-party management applications. Third party management applications such as Antivirus, Phone Master, Phone Cleaner, unwanted programs.etc. may trigger missed call notifications. You may confuse your phone notifications with spam, which will make your missed call notifications disappear. Deny permission to these device management apps and disable or uninstall them. Try to see if missed calls are showing up. Conclusion I have discussed the top 10 ways to troubleshoot and fix missed call notifications not showing issue on Android. I hope this article was helpful to you. Still having issues? Let me know in the comments section. I'm happy to register. Don't miss the latest updates! Follow us on Twitter and join our Telegram channel. Join our Telegram channel Go to Settings > Apps & notifications > Scroll to find the Phone app > tap Missed calls > Enable required options like Sound, Vibrate, Show notification dot. When DND (Do Not Disturb) mode is enabled, all notification sounds will be turned off and you will not receive notifications of incoming calls or messages. Only by opening the phone and checking the log will you see missed calls. Open the Phone app > Tap on Recents > You can see the icons next to the numbers in the call log. A red incoming call icon will be displayed for missed calls. Symbol.
