In this day and age there should be boy options for dress up that allow young boys to be creative and explore positive body image and taking care of themselves same as girls. We have made a note of this internally and will pass on the feedback to the product team to make the user experience better. I highly recommend the developers to consider adding additional options like male gender, additional skin complexions, and cultural options to the salon to allow young boys and girls of all nationality and ethnic groups the ability to explore, learn, play freely and have fun. He enjoys making avatars and creating fun outfits but there is no option for boys. Both boys and girls should have the freedom to explore virtual cosplay that encourage positive body image and celebrate the diversity of style and culture with characters that reflect themselves of different skin complexions and hair textures.
