How to set mx player as default video player in android. How to play video in default player in android programmatically. How to change default video player on android tv box. How to change default video player android box.

Are you satisfied with the default video player on your Android device? In most cases, the default video player does not have enough functionality to satisfy users. This is because the maximum number of Android users want to change the default video player. Let me guess, I think it's also thinking of changing your default video player. Not at? You landed on the right page. Through this article, you intend to learn how to change the Android default video player. Not only that, but also what you will be presented at the first 3 Android video players. Being enthusiastic about learning more? Allow me to start. Allow me to present you two effective ways to modify the Android default video player.â

Method 1: Changing the default media player from the setting option of step 1: Go to **À ¢ à,~ À "Applications"** First of all, open The setting option. After that, scroll down and find **À ¢ à,~ à "appsÀ ¢ à,~ or À ¢ à,~ À" applications "**. Let you show you the option **À ¢ à,~ À ¢ à,~ À À, À, À, À, À, À, À, à ¢ œIm** my Android device. Step 2: Select Manage Apps Tap on the application and you will find this interface on your Android device. Tap on **À ¢ à,~ À "Manage Apps ...** from that list. After that, you will find the list of installed applications of the device like this screen. Step 3: Open the default apps It is up to the upper part of the right side and you will find those options. Select **À ¢ à,~ À "Default AppsÀ ¢ à,~ à ¢** from that list and you will find the list of predefined applications on your Android. Here is my default device app. Step 4: Change the default video player Touch the video **À ¢ à,~ À "Play Video à,~** from the default application list. Later, you will see the lists of alternative multimedia readers available. Take a look here. At this stage, it touches the application you want to set as a predefined video player. After doing it, your predefined video player of your Android device will be changed. Now, MX Player has been set as the default video player. This to. Following this method you will be able to change the default video player in Android Marshmallow. Or other versions. If there are no default application options available on the device, I have another method for you. Will you know how to know? Allow me to narrate the 2nd method of how to change the Default video player Android.â

Method 2: Changing the default video player from file manager, many people ask how to change the Android default video player from the file manager. This method is especially for those, Through this method, you will also learn how to set up MX Player as default in Android devices. Step 1: Go to file manager and open any video in first place, you have to go to the file manager and open any video. So touch and hold onto the video. After that, you will see this type of interface on your mobile screen. Step 2: Select Open in another touch on **À ¢ à,~ À "more ¢ à,~ À,** from right under your screen. Subsequently, you will find an option as "brings to another app" or **À ¢ à,~ "Aunto with ...** Touch this option and you will see various multimedia that choose the options installed on your mobile Android device. Step 3: Set as Default allows you to set up MX Player as a default video player. Touch the **À ¢ à,~ À "Remember my choice"** or "all the time and select MX Player. From now on, the videos will be played on the MX reader for Default setting. Isn't it easy? I think so. The first 3 videos readers for Android as I said before, we know of the first 3 Android video players. These players will improve your experience to watch the video. The final thinking is so , you learned how to change the Android default video player. You can also set or remove the default video player on Android. If Found problems related to Android, feel free to comment. We will provide you with the solution. That's all for today. Thanks for being here. How can I change the default video player? At this time it's set to open and play video in predefined default Android Player, but I want to use a better video video, more recently from the market. I tried to use app that changed the default values, but they didn't have options for videos, only which default app would open the photos. Published using my Sprint HTC Evo3D Using Tapataalk - 12-05-2011 06:45 it likes 0 12-06-2011 08:07 AM Like 3 Go to Settings> Applications> Manage Application> Find the video player that is predefined right now, Click on it and find the default clean button. Thanks! I understood it to work. It was easier so I thought it would be. Published using my Sprint HTC Evo3D Using Tapataalk - 12-23-2011 05:22 It likes 0 Hello everything, there They are 100 seconds of app on my phone and I have no idea what the app for default video player. I've never set any apps as default for video playback so someone knows which app is - we call it factory tax - default app for video playback (Samsung Galaxy Note)? I would really appreciate any help. Thank Freddy 09-03-2013 02:31 am Like 0 If you are not sure, You should be able to delete all the default settings. Go to settings / apps, then tap the Menu button and select "Restore app preferences or something in which this effect (the formulation may differ between devices. Hoai Phuong Nguyen and Boudicca00 like this. 09-03-2013 02:12 PM Like 2 = 1#post3426781 Thank you very much for your information. I tried it and worked it. Thanks again 01-30 -2014 09:11 PM Like 1 Thank you very much for your information. I felt very happy again to have Helped, and welcome to Android Central! 01-30-2014 09:25 PM as 0 He was able to choose the player in Facebook, but now it opens automatically The player "a little". I want to be able to choose because I can use Allcast and watch on my TV. Well, now I can't. Tested to reset app preferences and this didn't work. I'm not sure what Heck happened ... it worked well yesterday !! 02-15-2014 02:13 PM Like 0 same here ... I rest soft, hard reset, n. changes. I went to Bestbuy and played with a demo phone (note 3) it worked well, I'm wondering if Facebook has changed something that we can't use our player now, love KNW as solving it. I used yo be able to lower the video but I can't now. 02-18-2014 01:25 I like 0 same here ... I resting soft, hard reset, n. changes. I went to Bestbuy and played with a demo phone (note 3) worked well, I'm wondering if Facebook has changed something we can't use the Player, love KNW as solving it. I used yo be able to lower the video but I can't now. It really is a facebook problem. I tried to uninstall, then reinstall and worked for a while ... then it's back to use "some" video players. It does it on both of my S4 and Tab II, so I know it's not the phone. 02-20-2014 04:41 like 0 0 I have a Droid Razr Maxx and I have the same problem. I don't care about the standard player you get from the gallery. Can it be changed? 04-16-2014 04:21 am Like 0 How can I change the default video player? At this time it's set to open and play videos in the predefined Android video player, but I want to use a better video player, more familiar from the market. I tried to use app that changed the default values, but they didn't have options for videos, only which default app would open the photos. Published using my Sprint HTC Evo3D using Tapataalk - This is due to the last Facebook update ... Most phones and cards automatically updates their apps on WiFi ... so you don't realize that there is ~` A change between yesterday and today ... Suddenly the videos start opening in-app by default ... Go to Settings> Apps> Facebook. Uninstall the updates ... will ask you "Do you want to go back to the factory version?" DÃ~ of yes ". Once done, open the app FB, give your user credentials and log in ... touch any video and you have more options available as old ... Enjoy !!! Siva Kumar 2014/04 / 22 05:48 as 0 Thanx man 2014/11/07 06:55 Like 0 https: // Forums. androidcentral.com/showthread.php?t=138690&s=75a2aba2dcd71e70650e385604771cb1&p=5962430&viewfull=1#post5962430 Baseballfanz Go to Settings> Applications> Manage applications> Find the video player that is by default at this time, click on it and discover the Delete default button. Thanks YAA !! Reallt worked Thanks to feel relax 09-07-2017 02:39 likes 0 6013953 & viewfull = 1 # post6013953 options dÃ~ no predefined set? I can't see a way to set u no. When I play the videos, it doesn't require me to set the default. Even my videos I registered I'm playing playing but not the image? Help!! 10-10-2017 02:45 like 0 0
