Here are the french numbers from 21 to 30 with their correct pronunciation: vingt-et-un (vahn-tay-uhn), vingt-deux (vahn-doo), vingt-trois (vahn-twah), vingt-quatre (vahn-kah-truh), vingt-cinq (vahn-sangk), vingt-six (vahn-sees), vingt-sept (vahn-set), vingt-huit (vahn-wee), vingt-neuf (vahn-nurf), and trente (trawnt). Other french number resources include learning how to count from 0 to one billion, as well as a fun french number quiz. To learn the correct pronunciation of french numbers, it's essential to practice with native speakers and pay attention to regional differences in pronunciations. For example, Swiss French uses different number words compared to standard French. The founder of frenchnumbers.org.uk, Jeremie, documents all the most important french numbers with their spelling and pronunciation. His goal is to help people speak french fluently by providing high-quality audio recordings done by native french speakers. This guide covers numbers from 0 to one billion, including regional differences and tricky modern pronunciations. When learning french numbers, it's crucial to focus on the way natives think about them, rather than calculating or translating from english. For instance, vingt-cinq (twenty-five) is not thought of as "twenty" and "five" separately, but as one piece of information with a single sound. To master french numbers efficiently, learn them out of order, just like when drilling irregular verbs in french. This will help your brain prioritize the information and associate it with the correct sounds. Now, let's test our knowledge of french numbers with an audio drill at a slower pace. Answers to the drill include: 14, 12, 1, 3, 4, 0, 7, 18, 4, 14, 2, 19, 17, 16, 3, 6, 16, 19, 2, 5, 3, 15, 5, 8, 3, 18, 9, 16, 12, 16, 6, 13, 12, 2, 0, 1, 17. You can also take a fast and fun quiz to assess your current understanding of french numbers. The quiz consists of 10 questions and will take you about 8 minutes to complete. Lookin forward to seein you here! Please press play on the audioplayer to hear my recording Twenty21 Twenty et un vingt et une if feminine Thirty Trente Trente et un/une Forty Quarante Quarante et un/une Fifty Cinquante Cinquante et un/une These French numbers 20 to 59 seem easier and therefore are often overlooked by students Big mistake! You need to train with them as much as with the other numbers - they are part of telling the time in French, and are essential As with everything in French repetition is the key Take your time to go through these numbers: bookmark this page and come back often to train on your French numbers! Answers to the French number audio practice Twenty21 Twenty et un Forty Quarante Fifty Cinquante Now let's train with French numbers out of order at the faster speed. Please press play on the audioplayer to hear my recording Answers to the French numbers audio practice Thirty Trente Trente et un Fifty Cinquante Check out my French number audiobook. This 4+ hours audiobook goes in-depth on how to construct the numbers and how to pronounce them properly with all the modern glidings and elisions that can sometimes entirely change the number from its written form! Answers to the French number audio practice Sixty Soixante Sixty et un/une Eighty Quatre-vingts Sixty-six Seventy Septante Sixty-nine Soixante-dix Sixty-tens Soixante-dix-huit Sixty-eight Sixty-nine Ninety Quatre-vingt-onze Ninety-one Soixante-dix-neuf Sixty-nines Please press play on the audioplayer to hear my recording. Eighty Quatre-vingts One Hundred CentQuatre-cents Cinq-cents Six-cents Sept-cents Huit-cents Neuf-cents Since larger numbers will be grouped in three digits, you need to be comfortable with numbers in the hundreds to understand large French numbers fast.When talking about "one hundred" in French, we don't say the "one", so just "cent", not "un cent". However, we do say "deux-cents", "trois-cents" etc...When "cent" is not followed by any other number, you'll add an S starting at "deux-cents".Trois-cents, cinq-cents...However, if it is followed by another number, then there is no S.Trois-cent-quarante-deux.The S would be silent, but pronounced Z in liaison if followed by a vowel or a mute h.Huit-cents ans,Just like I explained before, the French digits 5, 6, 8 and 10 drop their final consonant sound before another consonant. This rule applies to the pronunciation of French numbers in the hundreds, so with cent:500 - cinq-cents - the q is silent 600 - six-cents - the x is silent 800 - huit-cents - the t is silentWatch out. Do not mistake the English word "cent or cents" with the French word "cent". "Cent" means a hundred. "Un centime" means a cent.Let's test your understanding of French numbers in the hundreds with this French number audio exercise. First, let's drill at a slower speed. Answers to the French Numbers Audio Exercise103, 377, 836, 937, 820, 662, 192, 205, 199, 208, 193, 384, 782, 338, 284, 572, 740, 839, 439, 203, 835, 667, 982, 746, 485, 920, 933, 745, 234, 435, 937, 194. Answers to the French Numbers Audio Exercise197, 908, 385, 685, 115, 930, 385, 395, 997, 142, 653, 823, 972, 979, 295, 673, 456, 293, 837, 345, 657, 869, 887, 386, 904, 848, 264, 491.Mille Deux-mille Trois-mille Quatre-mille Cinq-mille Six-mille Sept-mille Huit-mille Neuf-mille Dix-mille Onze-mille Vingt-mille Quatre-vingt-dix-sept-mille Cent-mille Deux-cent-cinquante-trois mille-quatre-cent-vingt-cinq Un-million-quatre-cent-trente-trois mille-six-cent-quatre-vingt-deux.1000 - mille (remember, no "un" there...) 1 000 000 - un million 1 000 000 000 - un milliard (! one billion in US/CA English) 1 000 000 000 000 - un billion 1 000 000 000 000 000 - un milliard 1 000 000 000 000 000 000 - un trillionThe final d - if any - is silent.You have to be careful with the word "billion" that doesn't translate the same way in French, US/Canadian English and British/Australian English...Note that these numbers, although written "ill" which usually makes a Y sound in French, keep the "il" sound of the exceptions "mille villes tranquilles" (see Secrets of French Pronunciation)For even bigger numbers, I encourage you to check out wikipediaMost people have trouble reading a number over six digits, so it's normal to read it somewhat slowly.Let's see how to spell the numbers above a thousand in French.When talking about "one hundred" or "one thousand" in French, we don't say the "one", we only say "cent" and "mille".However, when talking about "one million", "one billion" we do say the one: "un million, un milliard".Mille never takes an S.Trois-mille. When spelling million, milliard, billion, milliard, trillion, trilliard in French, add a silent S when it's over 1.Deux-billions d'Euros.When "mille" is followed by a noun, there is not "de":Deux-mille Euros.Quatre-mille ans.When million, milliard etc... are followed by a noun, there is a "de" (or a d).Quatre-millions d'Euros.Six-millards d'années,Just like I explained before, the French digits 5, 6, 8 and 10 drop their final consonant sound before another consonant.This rule applies to larger French numbers: cent, mille, million, milliard, billion, milliard, trillion, trilliard...Cinq-mille-six-cents - No q sound at cinq Dix-millards d'Euros - No s sound at dixThe logic of big numbers is the same between French and English!You group your number by digits of 3, dividing your groups with the words mille, million, milliard... So you need to develop your ear to focus on these "separating" words so you can get the whole number.Trois-millards-deux-cent-vingt-cinq-millions-trois-cent-quatre-vingt-six-mille-sept-cent-huit = 3 225 386 708So, if you want to master very large French numbers, you need to drill a lot on numbers of three digits since these numbers will form the blocks for larger numbers. Answers to the French Large Numbers Audio test15 937, 2 737, 33 984, 82 755, 103 942, 1 813, 52 972, 93 484, 77 283, 69 487, 92 174, 86 931, 56 237, 3 372, 1 840, 87 669, 9 375, 28 159. Answers to the French Large Numbers Audio test90 385, 2 973, 6 837, 1 948, 1 704, 101 743, 3 846, 9 927, 774 388, 3 640, 82 839, 2 744, 3 049, 19 938, 2 940, 38 098, 980 283. Now let's train with French numbers over one million! Answers to the French huge numbers audio test16 458 35010 845 858895 456 123 12745 000 13589 145 68716 789 456 698103 000 000456 128 137758 168 23878 456 128 684794 135 498 75932 124 138Use my audio recordings to memorize the numbers in French. First, play the recording in order. Repeat WITHOUT READING, so the letters do not fool you into a wrong pronunciation. Repeat until the numbers don't feel foreign to you, and you can count in order on your own. Then, if you'd like to memorize ##ARTICLELooking forward to seain everyone at the meeting tomorrow and discuss our strategies. To improve your spelling of numbers in French, try playin the audio again and readin out loud as you memorize. Use th same recording but instead of repeatin, say the number and then use it to check your pronunciation. Use it as a dictation to write the numbers in letters, and check your spelling. So, you can write hyphens between all the digits of one number, although both spellings are still accepted (source Now you don't have to worry about the rule anymore. A period was used to separate the digits of larger French numbers. Example: 300.000.000 But we changed it, now we use a space: 300 000 000. However, we still use a comma where a period is used in English, like for prices.5.25 in English = 5.25 in French French numbers are written using lowercase, unless the first letter starts the sentence. Soixante-dix-neuf-mille-quatre-cent-vingt-huit.Voilà, I hope this lesson helped you. Check out my to count up to 1,000,000 in French. Remember that the word for 100 in French is cent, but it never uses the indefinite article "un". One million cats un millon de chats is a serious cat lady. When it comes to counting large numbers, there are a few things to watch out for. One billion un milliard is one thing, but another billion un billion is something entirely different. It's a false friend because it looks the same as our English word but means a trillion. There are two ways to pronounce six six six, huit eight eight, and dix ten ten in French. The pronunciation depends on the word that follows them in a sentence. When counting, we use this pronunciation, and also when the number comes at the end of a sentence. However, if six is followed by a word starting with a consonant like chiens dogs, it's pronounced see. Ordinal numbers are another story altogether. They explain a noun's place in a sequence, like the first runner to cross the finish line or the second house on the right. The most important ordinal numbers include premier premier premeire elevenh onzième second deuxième twelfth douzième third troisième fourth quatrième fourth quatre-vingt-dix-quart fourteenth quatorze fifth cinquième fifteenth quinzième sixth sixième sixteenth dix-septième seventeenth septième twenty-first vingt-et-un Our tip is that adjectives must agree with the gender of the noun they're describing. To count from one to infinity in French, it's recommended to watch a few pronunciation videos and repeat the phrases while practicing mindless tasks. Habit stacking is also essential to make learning more efficient. You can find inspiration stories of French learners on the Language Hacking podcast, especially Melanie's episode about learning French with her seven children. Many students struggle with counting from 1 to 100 due to the complexity of numbers 60-99. However, there are five useful tips to learn them faster. Firstly, you can memorize 1-10 by counting in either even or odd numbers separately. Another trick is to count backwards from ten to zero. When it comes to teens (15-19), a simple trick is to repeat "You can say quinze seize" (the C and S sounds repeat). Numbers above 10 end in the -z sound, such as onze (eleven), douze (twelve) and treize (thirteen). You can remember these numbers by thinking of them as "teenz". The numbers 20-59 are relatively straightforward. To say twenty, simply say vingt (pronounced vè, the same pronunciation as the word for wine, vin!). For twenty-one, add "et un" or one. This pattern works for all the numbers through 59. Some students may struggle to distinguish teens from higher numbers. A helpful tip is to think of a phrase like "I have a lot of aunties" (for 30) or "I have forty aunties" (for 40). The numbers 60-79 can be challenging, but there are some key tips to help you. To count from 60-69, simply say soixante and then follow the pattern for 20-59. When counting beyond 70, remember that seventy is soixante-dix (sixty ten), while seventy-one is soixante et onze (sixty and eleven). One final tip is to practice saying "soixante" quickly before adding the corresponding teen number. This will help you avoid stumbling when counting. The numbers 80-99 become more complicated due to the need to say quatre-vingts for eighty and four twenties for each subsequent number. However, by following a similar pattern, you can master these numbers as well. Lastly, note that Switzerland and Belgium have their own specific words for seventy, eighty, and ninety: Septante (70) and huitante (80) and nonante (90). For example, 75 in these countries is septante-cinq. 0 zéro zay-ro 6 six sees 11 onze ohnz 20 vingt van 3 trois twah 15 quinze kanz 21 vingt et un 4 quatre kat 16 seize seh 5 cinq sank 17 dix-sept deez-set 6 six sees 18 dix-huit deez-weet 7 sept set 19 dix-neuf deez-nuhf 22 vingt-deux 8 huit weet 23 vingt-trois 9 neuf nuhf 24 vingt-quatre 10 dix dees 25 vingt-cinq 26 vingt-six 11 onze ohnz 27 vingt-sept 28 vingt-huit 12 douze dooz 30 trente 31 trente et un 13 treize trehz 32 trente-deux 33 trente-trois 14 quatorze katorz 34 trente-quatre 35 trente-cinq 15 quinze kanz 36 trente-six 37 trente-sept 16 seize seh 38 trente-huit 39 trente-neuf 40 quarante 17 dix-sept deez-set 41 quarante et un 42 quarante-deux 43 quarante-trois 18 dix-huit deez-weet 44 quarante-quatre 45 quarante-cinq 46 quarante-six 19 dix-neuf deez-nuhf 47 quarante-sept 48 quarante-huit 49 quarante-neuf 50 cinquante 61 soixante et un 52 cinquante-deux 53 cinquante-trois 54 cinquante-quatre 55 cinquante-cinq 62 soixante-deux 56 cinquante-six 57 cinquante-sept 58 cinquante-huit 59 cinquante-neuf 60 soixante 63 soixante-trois 64 soixante-quatre 65 soixante-cinq 66 soixante-six 67 soixante-sept 68 soixante-huit 69 soixante-neuf 70 soixante-dix 71 soixante et onze 72 soixante-douze 73 soixante-treize 74 soixante-quatre 75 soixante-quinze 76 soixante-seize 77 soixante-dix-sept 78 soixante-dix-huit 79 soixante-dix-neuf 80 quatre-vingt 81 quatre-vingt-deux 83 quatre-vingt-trois 84 quatre-vingt-quatre 85 quatre-vingt-cinq 86 quatre-vingt-six 87 quatre-vingt-sept 88 quatre-vingt-huit 89 quatre-vingt-neuf 90 quatre-vingt-dix 91 quatre-vingt-onze 92 quatre-vingt-douze 93 quatre-vingt-treize 94 quatre-vingt-quatre 95 quatre-vingt-quinze 96 quatre-vingt-seize 97 quatre-vingt-dix-sept 98 quatre-vingt-dix-huit 99 quatre-vingt-dix-neuf 100 centBy setting your mind to it, learning French numbers is as easy as counting in French: un, deux, trois. Practice makes perfect, and with bite-sized lessons designed by experts, you can learn a lot more in just a few minutes a day. Welcome to French Numbers! French numbers feature unique nasal sounds such as "un," "cinq," and "vingt." Focus on mastering the French "r" sound in words like "trois" and "quatre." Practical examples include: stating time as "Il est dix heures vingt" (It's 10:20), mentioning age with "J'ai dix-huit ans" (I'm 18), and counting objects like "J'ai acheté douze pommes" (I bought 12 apples). Consistent practice is vital to fluency. Engage with everyday items or switch your phone's language to French for frequent exposure. Visit FrenchNumbers.org.uk, a dedicated platform for learning French numerals. French numbers are surprisingly simple—memorizing around 30 terms covers all essentials. We've organized the numbers into manageable sections, each paired with instructional videos for accurate pronunciation. Explore links like [\[\]](#) French Numbers 1-10 or scroll down to view all numbers listed below.
