In that case, you don't have to do anything at all, in fact. If you're collecting it from an agent location, though, it's best to have the MTCN. You'll certainly be asked for it, along with some ID. If you're collecting money and you don't have the MTCN. ask them for the MTCN once again. They'll be able to find it either on the receipt or in their online account. Still no luck? Best to give WU a call. Does the receiver need to register with Western Union? Not in general, but in some countries in question are Argentina, China, Colombia, and Jamaica, although the rules are slightly different in each case. It's important to act relatively fast in China, because if the receiver can't be contacted in three days then the money issues especially online - you should be very careful about possible scams or fraud. Don't give any details, including MTCNs, to anyone you don't trust. In fact, best to keep the MTCN only between sender and receiver. Nobody else should need it. If you're the receiver, tracking the transfer online can be a good way to ensure you've got a real MTCN and not a fake or expired one. But of course, do be sure you're tracking via the real WU website. Frequently asked questions Here are some answers to some of the things you might be wondering about the western Union money tracking process. How long do Western Union transfers take? However much money you're sending, this is the million-dollar question. But unfortunately, there's no simple answer. All sorts of factors can affect how long international money transfers take - including where you're sending the money to, and whether it's going to a bank account or for cash pickup. Plus there's the question of how long it takes for you to pay the money to Western Union, which may depend on whether you pay via bank transfer or credit or debit card. It can be a matter of days. You may be able to choose from a variety of service types, which can speed up (or slow down) your transfer. For instance, a "Money in Minutes" transfer will generally make cash available for pickup very fast, while a "Direct to Bank" transfer is often several days.<sup>5</sup> If you send money online via Western Union, they'll give you an estimate for how long it'll take, based on the specifics of your transfer, once you've input the key details. That's the best estimate to use. What if my money transfer is delayed? All sorts of factors might contribute to hold up an international money transfer. So if, when you check up on the transfer status, you find out it's been delayed, there might be any number of reasons. In some circumstances, Western Union will actually get in touch with them via phone or email.<sup>6</sup> Will the receiver get a notification when the money arrives? No, Western Union doesn't do that. It's best to use the MTCN to check the status of a transfer and see if it's ready for collection.<sup>6</sup> How many numbers are in a Western Union tracking number? The MTCN is printed on the receipt that the sender gets when they make the transfer.<sup>1 2</sup> It's also in your transfer history online.<sup>2</sup> How do I track my Western Union money order tracking service to track your Western Union? There are lots of different money transfer services out there, and any decent one will let you track your transfer just as easily as WU does. Here's a rundown of 14 alternatives can trace their history back to the 19th century, like Western Union can, but they could save you time and money. Founded in 1851 as the New York and Mississippi Valley Printing Telegraph Company in Rochester, New York,[3] the company changed its name to the Western Union Telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in
1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several other telegraph company in 1856 after merging with several o related services, including wire money transfer, in addition to its core business of transmitting and delivering telegram messages. After experiencing financial difficulties, it began to move its business away from communications in the 1980s and increasingly focused on its money-transfer services. It ceased its communications operations completely in 2006,[6][7] at which time The New York Times described it as "the world's largest money-transfer business" and added that the company would remain as such due to the large number of immigrants wiring money home.[8] From the perspective of the history of technology, Western Union notably completed the first transcontinental telegraph in 1861 being a part of U.S. industry's investments into developing American communications between the coasts of the Atlantic Ocean and the Pacific Ocean. The first messages went to then President of the U.S. Abraham Lincoln.[9] The New York and Mississippi Valley Printing Telegraph Company was founded in Rochester, New York by Samuel L. Selden, Hiram Sibley, and others in 1851.[10] In 1856 the company merged with its competitor the Erie and Michigan Telegraph Company, controlled by John James Speed, Francis Ormand Jonathan Smith and Ezra Cornell[11] and, at Cornell's insistence, changed its name to Western Union Telegraph Company.[12] In 1857, Western Union participated in the 'Treaty of Six Nations', an attempt by six of the largest telegraph firms to create a system of regional telegraphy monopolies with a shared network of main lines.[13] After the creation of the 'Six Nations' system, Western Union continued to acquire both larger & smaller telegraph firms to create a system of regional monopoly into a national oligopolist with its only serious competitors being the American Telegraph Company and the United States Telegraph Company.[5] Western Union completed the first transcontinental telegraph in 1861. Notably, the first messages went to then President of the U.S. Abraham Lincoln.[9] The firm additionally formed the Russian-American Telegraph Company in an attempt to link America to Europe, via Alaska, into Siberia, to Moscow - a project abandoned in 1866. In 1866, Western Union acquired the American Telegraph Company, its two main competitors, for a time gaining a virtual monopoly over the American telegraphy industry.[5] The company also began to develop new telegraphy-related services beyond the transmission and delivery of telegrams, launching the first stock ticker in 1866,[14] a standardized time service in 1870 and wire money transfer in 1871.[15] In the 1870s, the company faced increased competition from newly formed rival telegraphy conglomerate Atlantic and Pacific Telegraph Company and from the nascent telephony system before settling a patent lawsuit with Bell and leaving the telephone business completely in 1879.[16] [17] Financier Jay Gould orchestrated a merger of the Atlantic and Pacific Telegraph Company with Western Union in 1881, giving him a controlling share of the merged company. [18][19][20] A Western Union telegram sent on September 7, 1896, to report on the positions of two comets A 12-year-old Western Union messenger boy in Tampa, Florida 1911 When the Dow Jones Railroad Average stock market index for the New York Stock Exchange (NYSE) was created in 1884, Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[21] By 1900, Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two international undersea cables.[22] AT&T gained control of Western Union operated a million miles of telegraph lines and two internatis and Union in 1909, acquiring a 30% stake in the company.[5] However, in 1913 AT&T, under indictment for violating the Sherman Antitrust Act of 1890, was forced to sell its shares in the company which once again became independent.[23] Advertisement for Western Union "Tourate" telegram service, 1939 60 Hudson Street, Manhattan, was WU's headquarters in the early and middle 20th century. Western Union Telegraph storefront seen in the Chamber of Commerce Building in Toledo, Ohio, 1895 Western Union acquired its only major competitor in the American telegraphy sector Postal Telegraphy sector Post the telegraphy industry began to experience a decline as the use of telephones increased, especially in the case of long-distance calls, with total telegraph messages almost halving from 1945 to 1960.[5] In 1958, Western Union began offering telex services to customers in New York City.[24] Teleprinter equipment for the telex network was originally provided by Siemens & Halske AG[25] and later by Teletype Corporation.[26] Direct international telex services commenced in the summer of 1960, with limited service to London and Paris.[27] In honor of Valentine's Day 1959, Western Union introduced the Candygram, a box of chocolates accompanying a telegram that was featured in a commercia with the famously rotund radio announcer Don Wilson. [28][29] In 1963, Western Union organized its international cable system properties and its right-of-way for connecting international telegraph lines into a separate company called Western Union International (WUI), which it sold that year to American Securities. In 1967, American Securities listed WUI as a publicly traded company on the New York Stock Exchange. WUI was acquired by Xerox for \$207 million in stock in 1979[30] and subsequently sold for \$185 million in cash to MCI Communications in 1981.[31] MCI renamed WUI to MCI International, ceasing the use of Western Union branding.[31] Logo, 1969 to 1990 Western Union purchased the TWX system from AT&T in January 1969, the only major competitor to its own telex network.[32] Western Union became the first American telecommunications satellites, starting in 1974. The fleet of satellites, called Westar, carried communications within the Western Union company for telegram and mailgram message data to Western Union bureaus nationwide. It also handled traffic for its telex and TWX services. The Westar fleet of satellites' transponders were also leased by other companies for relaying video, voice, data, and facsimile (fax) transmissions. The Westar fleet of satellites' transponders were also leased by other companies for relaying video, voice, data, and facsimile (fax) transmissions. sold to Hughes (who originally built all of the Westar satellites launched) in 1988 after Western Union suffered financial losses with their telecommunications assets starting in the early 1980s. In 1981, Western Union purchased a 50% interest in Airfone. It sold Airfone to GTE in 1986 for \$39 million in cash.[33] From 1982, as a result of financial services deregulation, Western Union began offering wire money transfer services globally.[4] In 1984, after years of declining profits and mounting debt restructuring was completed in 1987 when investor Bennett S. LeBow acquired control of Western Union through an outside of chapter 11 process that was a complex leveraged recapitalization.[34] The transaction was backed by a total of \$900 million in high-yield bonds and preferred stock underwritten by Michael Milken's group at Drexel Burnham Lambert as part of an exchange offer. LeBow installed Robert J. Amman as president and CEO who led a complete strategic, operational and balance sheet restructuring of the company over the next six years. Amman executed a
strategy of redirecting Western Union from being a provider of consumer-based money transfer financial services. Thus, Amman ran the company as two separate companies. One business consisted of the money transfer business, which was funded and operated to take advantage of the significant growth opportunity. The second unit consisted of all the non-strategic communications assets such as the long-distance analog voice network, satellite business and undersea cable assets. In the three-year period through 1990 Amman was supported by Robert A. Schriesheim, also installed by LeBow, as a special advisor who oversaw the divestiture of the four non-strategic telecommunications assets for about \$280 million. Most of the company's business services unit including the Easylink electronic mail and Telex businesses were sold to AT&T for \$180 million in Dec 1990. Western Union's telecommunications carrier business. [35] The official name of the corporation was changed to New Valley Corporation in 1991, as part of the company's move to seek bankruptcy protection to eliminate the firm's overleveraged balance sheet while continuing to grow the money transfer business. The name change was used to shield the Western Union name from being dragged through the proceedings (and the resulting bad PR) [36] Under the day to day leadership of Amman and the backing of LeBow, the company's value increased dramatically through its years operating under chapter 11. Following various restructurings, including negotiations with Carl Icahn who became a large bond holder, New Valley Corporation was sold in a bankruptcy auction to First Financial Management Corporation in 1994 for \$1.2 billion. In 1995, First Financial merged with First Data Corporation in a \$6 billion transaction.[37] Western Union European Regional Operations Office in Vilnius On January 26, 2006, First Data announced its intention to spin off Western Union into independent publicly traded financial services company focused on money transfers through a tax-free spin-off to First Data shareholders. The spin off occurred as planned on September 29, 2006.[38] The next day Western Union announced its plan to acquire Canada-based Custom House from Peter Gustavson.[40] The deal closed in September 2009 for a purchase price of US\$371 million.[41] This acquisition led the company to be re-branded as Western Union Business Solutions.[42] In January 2011, Western Union acquired Angelo Costa, a group active in money transfer and services to immigrants. Angelo Costa has a network of 7,500 points of sale throughout Europe. The agreement was signed for US\$200 million.[citation needed] In July 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Union acquired Travelex's Global Business Payments division for £606 million.[43] In October 2011, Western Un Europe, with more than 10,000 subagent locations across Italy, Spain, and the United Kingdom.[44] In May 2015, rumors emerged over a proposed merger of Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union and competitor MoneyGram, at a time when both companies' revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's revenue were declining.[45] Western Union denied this was the case.[46] In January 2017, Ant Financial, Alibaba's financial technology firm instead unsuccessfully attempted to acquire MoneyGram for \$880 million, [47] but this was blocked by the U.S. government citing national security concerns. [48] In 2018, the company moved its headquarters from Englewood, Colorado to the Denver Tech Center. The Englewood office complex was sold in 2020 for \$40 million.[49] In November 2020, Western Union acquired a 15% stake in the digital payments unit of Saudi Telecom Company for \$200 million.[51] A Western Union outlet in Angeles City, Philippines Money can be sent online or in-persor at Western Union agent locations. Cash can be collected in person at any other Western Union agent location worldwide by providing the 10-digit MTCN (Money Transfer Control Number) and identification. In some cases, a secret question and answer can be used instead of identification. In October 2007, Western Union announced plans to introduce a mobile money-transfer service with the GSM Association, a global trade association representing more than 700 mobile operators in 218 countries and covering 2.5 billion mobile subscribers. The proliferation of mobile operators in 218 countries and covering 2.5 billion mobile subscribers. mobile financial services ranging from text notifications associated with Western Union cash delivery services to phone-based remittance options. Western Union's mobile operators and/or locally regulated financial institutions. The company launched the Western Union Connect service in October 2015, following partnership agreements with major instant messaging apps WeChat and Viber.[52][53] The partnership allows users of WeChat to send up to \$100 to China, the US and 200 other countries,[53] while Viber users can send up to \$100 for \$3.99 plus exchange rate fees, with that fixed fee increasing the more money is sent up a limit of \$499.[52] WU phone parlors near Times Square, 2008 Along with satellite telecommunications, Western Union was also active in other forms of telecommunications networks such as Telex and TWX, which was acquired from AT&T Corporation and renamed Telex II by Western Union Landline-based leased voice and data communication circuits Long-distance telephone service from 1981 to 1986 (the phones were made by twoway radio manufacturer E. F. Johnson Company's divisions providing said services being divested and sold to other companies, such as the 1988 sale of WU's satellite fleet and services to Hughes Space and Communications. and the sale of WU's Airfone service to GTE in 1986. In 1914, Western Union was the first to issue a charge card.[54][55] As the Internet became an arena for commerce at the turn of the millennium, Western Union started its online services. BidPay was renamed "Western Union Auction Payments" in 2004 before being renamed back to BidPay. BidPay ceased operations on December 31, 2005, and was purchased for US\$1.8 million in March 2006 by CyberSource effective December 31, 2007.[56] Western Union was a major shirt-sponsor of the Sydney Roosters NRL team from 2002 to 2003. The company still sponsors the team, but not as a shirt-sponsor. Globally Western Union sponsors numerous communities that help support the diaspora communities that help support the diaspora community events that help support the diaspora communities that use the global Money Transfer
service. They also sponsored numerous WWE and WCW pay-per-view events such as No Way Out 1998 and Slamboree 2000. They sponsored UEFA Europa League from 2012 until 2015.[57][58] During the 2003-04 season, Western Union served as the title sponsor for the Premier Division Football League in Dhaka, Bangladesh.[59] The First Data Western Union served as the title sponsor for the Premier Division Football League in Dhaka, Bangladesh.[59] The First Data Western Union served as the title sponsor for the Premier Division Football League in Dhaka, Bangladesh.[59] The First Data Western Union served as the title sponsor for the Premier Division Football League in Dhaka, Bangladesh.[59] The First Data Western Union served as the title sponsor for the Premier Division Football League in Dhaka, Bangladesh.[59] The First Data Western donated US\$1,000,000 to the relief effort.[60] The Denver Nuggets of the National Basketball Association announced a three-year deal making Western Union the team's jersey sponsor, beginning with the 2017-18 NBA Season.[citation needed] Liverpool F.C. announced on August 9 2017, that Western Union would become their first ever sleeve sponsors, from the start of the 2017-18 season.[61] They signed a £25m deal for 5 years as Liverpool's sleeve sponsor.[62] Western Union telegrams were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[63] Early versions were transmitted through a store and forward message switching system.[64] Early versions were transmitted through a store and forward message switching system.[65] Early versions were transmitted through a store and forward message switching system.[65] Early versions were transmitted through a store and forward message switching system.[65] Early versions were transmitted through a store and forward tape to receive, store, and retransmit messages. Plan 55-A, Western Union's last paper tape based switching system (1948-1976), was fully automatic routing.[64][65] Western Union was first developed in the 1960s, but was dismantled in favor of the ARPANET, the precursor to the modern Internet in the 1990s. The Defense Message System (DMS) replaced AUTODIN, originally named "ComLogNet", was a reliable service that operated at 99.99% availability, using mechanical punched card readers and tab machines to send and receive data over leased lines.[67] During the peak operation of AUTODIN, the US portion of the network handled 20 million messages a month.[citation needed] Western Union failed in its attempts to engineer a replacement (AUTODIN II), leading to the development of an acceptable packet-switched network by BBN (the developer of the ARPANET) which became the foundation of today's Internet. AUTODIN service ceased in 2000, years after it had become obsolete.[68] A related innovation that came from AUTODIN was Western Union's computer based EasyLink service.[69] This system allowed one of the first marketable email systems for non-government users. The system allowed the same message to be sent simultaneously to multiple recipients via email, fax, mailgram, or telex services as well as allowing messages to be sent from the integrated formats. With the service, users could also perform research utilizing its InfoLink application. EasyLink was spun off as a separate company and is now part of OpenText.[70] Western Union advises its customers not to send money to someone that they have never met in person. Despite its efforts in increasing customers [72] Western Union has been required to maintain records of payout locations of the individuals who may be laundering the money, though this information may be obtained only through the use of a subpoena. Hence advance-fee fraud and romance scammers is almost always unrecoverable.[73] For this reason, it is banned as a medium of payment through eBay,[74] and discouraged on other online auction websites.[75] Western Union admitted to allowing wire fraud in January 2017 and agreed to pay \$586 million, for turning a blind eye as criminals used its service for advance fee fraud. Scammers engaging in various 419 advance fee scams including offering fake job offers and lottery prizes, were able to process transactions using Western Union money transfer, mainly by giving the agents a share of the earnings from their scams. Western Union failed to investigate hundreds of thousands of complaints that were filed by victims.[76] The Central Bank of Ireland reprimanded and fined Western Union failed to investigate hundreds of thousands of complaints that were filed by victims.[76] The Central Bank of Ireland reprimanded and fined Western Union failed to investigate hundreds of thousands of complaints that were filed by victims.[76] The Central Bank of Ireland reprimanded and fined Western Union failed to investigate hundreds of thousands of complaints that were filed by victims.[76] The Central Bank of Ireland reprimanded and fined Western Union failed to investigate hundreds of the earnings from their scams. failures in anti money laundering practices which could have left the firm's payment services open to being used for money laundering and/or terrorist financing saying that they were concerned that Western Union "failed to have in place sufficiently robust systems and procedures to train agents, to monitor and identify suspicious activity in respect of smaller transactions, and to maintain appropriate records" and "the splitting of payments into many separate smaller payments is a common method used to launder money. Similarly, terrorist financing is often carried out by small payment transfers."[77][78] Western Union agents in the US also allowed Chinese immigrants to pay hundreds of millions of dollars to human smugglers through the service, evading the transfer reporting requirements by sending the amounts in smaller increments. [76] In 2017, Western Union admitted to money laundering and consumer fraud violations and agreed to pay \$586 million in a settlement with the Department of Justice. [79] Among other charges, the Justice Department showed that Western Union was complicit in creating an ecosystem where criminals were able to engage in consumer fraud and human trafficking. The charges were dismissed in March 2020.[80] In 2018, Western Union was fined \$60 million by the New York State Department of Financial Services.[81] The press release accompanying the fine stated that, "Western Union executives put profits ahead of the company's responsibilities to detect and prevent money laundering and fraud, by choosing to maintain relationships with and failing to discipline obviously suspect, but highly profitable, agents." On May 29, 2019, Western Union announced the departure of a company executive, Odilon Almeida, who had served as executive vice president and president of Global Money Transfer.[82] In 2012, Stewart Stockdale, who had the same position as Almeida, left the company under similar circumstances. The book The One Percent Doctrine: Deep Inside America's Pursuit of Its Enemies Since 9/11 alleged that Western Union provided United States military intelligence with personal information.[83] Western Union has been accused of engaging in anti-competitive behavior in Africa as a result of a lack of competition on the continent.[45] According to a report by the Overseas Development Institute, this allows Western Union to artificially inflate its fees for money transfers, charging what has been called an "Africa charge" of 8% consistently "applied across countries regardless of the size of the market, regulatory costs or market risk." [84] However, the fees can be as high as 10% or more, depending on the region. [85] Africa's remittance market remains the most expensive in the world, [86] and the region is estimated to incur excess costs of \$1.4 billion to \$2.3 billion per year as a result of these high remittance fees.[84] The company has also been criticized for its use of exclusivity agreements with banks in countries that receive remittances, restricting competition and harming the consumer to conduct transactions via nominated banks.[84] This also allows for the imposition of above-average transaction fees.[84] In February 2016, Harada Ltd filed a complaint with the EU antitrust regulator claiming that Western Union colluded that the allegations via nominated banks. were insufficient and found in favor of Western Union.[89] Colorado portalCompanies portalTechnology portalUnited States Pangram - Used by WU to test teleprinters.
