You can download the map by clicking on the button above. domain: \mathbb{R} range: $[-1,\infty)$ The domain of the function is all values of x for which we have a value y (for which the function exists). Since the function is a polynomial and there are no points excluded from the x axis, so the domain is \mathbb{R} (all real numbers). The range of the function consists of all the y values (functional values) corresponding to the points of the domain. That is, all values of $1 + x^2$ across all real numbers $x \in \mathbb{R}$. Now, $x^2 \geq 0$, and so $1 + x^2 \geq 1$. So, the gamma is $[-1,\infty)$. You can help us by reviewing, improving and updating this response.
