You must be a citizen of the United States between the ages of 18 and 35. Pilots seeking to be officers should request the position prior to their 29th birthday [source: military]. Education only those with university and universal degrees will be considered for the position As an officer of the Force A6 Rea. Although there are no necessary study areas, the application of the law, medicine and engineering are all desirable à € - Majors. Besides secondary education, candidates must have been trained by American Air Force in order to be an officer [source: military]. Official qualifications officers should be in excellent physical form. They will be required to pass a physical fitness test força and have a complete physical examination before applications [Source: Military]. Candidates must take and pass the Qualification Officer Qualification Test (AFOQT) before being able to participate in training. The test has 12 components - including verbal analogies, mathematics, reading, science and aviation information - which will evaluate if you are qualified to become an officer [Source: Force AA © Rea] .training If you have successfully passed on the physical exams and Afoqt, you will be required to participate in a 12-week official training program administered by the Aerial Force. This program is designed to test your dedication to position and train you to become an exemplary officer of the United States Aerial Force [Source: Air Force]. Air Force is a prominent symbol of the United States in general and in the position of the Presidency, in particular. Whenever the president travels abroad or throughout the country, he takes his high-tech jumbo jet with him. On September 11, the president's airplane showed that it was much more than an executive jet - became a mobile bunker when all soil positions seemed vulnerable à € - attack. In this article, we will see what establishes Air Force, in addition to other airplanes. And we will discover what is necessary to send the president around the world. With all the things that the AA © Rea is transports, it is not to admire that the media calls them the "Flying White House". Aerial force has 4,000 spor interior space. Much of this looks more like a hotel or executive office than a jetliner except for the seat belts in all chairs. The lowest level of the airplane serves mainly as cargo space. Most of the passenger room is on the middle level, and the upper level is largely dedicated to communication equipment. The president has rooms on board, with its own room, bathroom, training room and office space. Most of the furniture on the aircraft was handmade by the Master Carpenters. The staff lies in a large conference room, which doubles as the dining room of the president. Senior functioning have their own office area, and the rest of the president's team also has space to work and relax. There is a separate area for reporters traveling with the president, and there is a lot of space for the flight crew to do their job. All in all, the Aerial Force, can be comfortably contained 70 passengers and 26 crew members. Hollywood Versioning Force One has its Hollywood close-up in Harrison Ford of 1997 "Air Force One". While some of the details in the set are inspired by the real thing, the film requires great artistic freedoms. The force aim says the real plan It has an escape pod as described in the film, or even aboard parachutes. Of course, a leakage pod could be one of the many special features that the forces aim do not not about. At World War II, the president of the United States rarely traveled away from home. Visiting other countries simply took long, and cut the president of the main institutions of the government. The ascension of the trip aim made it viable for the president to move around the globe and return home soon. In 1943, Franklin Roosevelt became the first present president to take air when he set up a Boeing 314 "flying boat" for a war conference in Casablanca.roosevelt took the airplane because the German U-boats They made the seas too much betrayers, but the success of the mission established travels aerea as the standard mode of presidential transport. Soon, the government decided to assign a military aircraft for presidential use. The Aerial Force, originally, selected C-87A Liberator, basically a B-24 bomber configured for the civil operation, which was baptized the "guess where", after another C-87A fell under Mysterious circumstances, the secret service decided that it was not a secure plan for the president. They soon set up a Skymaster C-54 for Roosevelt, complete with sleeping rooms, a radio telephone and a retractable lift for Roosevelt wheelchair. The airplane, dubbed "sacred cow", carried Roosevelt in several important missions, including the historic conference Yalta.Present Truman took over the sacred cow, and then replaced it by a modified DC-6, which he nicknamed "Independence". Contrary to the Sacred Cow, independence was covered with patriotic decoration, including a head of water painted on the nose. President Eisenhower introduced two similar hospital plans with up-to-date equipment, including an air-to-mouth telephone and a teletype air-to-earth. In 1958, the presidential journey led a giant jump forward when the aerque force introduced two boeing jets 707 to the fleet. Aerial force began to use the "Air Force One" radio call designation during the Eisenhower administration, and the public led after Kennedy took the Office.at The beginning of your mandate, Kennedy added a more advanced, long reach 707 and supervised a sterile redesign - the blue and white decoration still used today. This plan and a gource added to the fleet in 1972 played a role in some of the most important historical events of the last 50 years. The 707 flew Kennedy to Dallas on November 22, 1963 and brought his body later that day. In the vain back, Lyndon Johnson was sworn out as the next president. The Gammer was flew President Nixon from D.C. to California after his renewal. Mid-Flight, the crew received the confirmation that Gerald Ford had been put to the next president, and they changed his name Call Name of the Force Aerate one for Sam (Special Mission) 27000. Twin 707s served President Reagan throughout his two terms and George Bush Mr. Through the first part of his term. In 1990, the Aerial Force replaced the airplanes with the 747s in use today. Plans can be replaced again in 2010 when they reached their 20-year mark. For more information about the forces aim, one of the past plans à € à € and gifts, check out the links in the next Section. Connection HowStuffWorks Articles, no matter the next day %, the president of the United States must always be ready to travel. Fortunately, the modern age allowed a variety of reliably transport, including vehicles. This plane, specifically designated to fly the president throughout the country and the world, is called the force aech roa. Despite its popularity as the official commander-chief airplane, the forces aim is a mystery for many people. To learn some of the most fascinating facts about Air Force One, read! A radio call sign Aeria is actually a radio call signal used to refer to the plan that transports the president. Nowadays the Pattern is usually using the term for airplanes specifically flying the president. Louloupotos / shutterstock.com A ~ à € ⇨ "Name à € ⇨ ⇨ to prevent future Mothers, you knew Becoming the official sign of the president, another airplane had a similar name? In 1953, a commercial airplane, Aerial Lines Eastern flight 8610 by mistake, erroneously entered the space of President Eisenhower when he was the Beiral on his aircraft, Air Force 8610. After the incident, the term "Forces of Air. To refer to the aircraft, the chief commander travels. This is to avoid confusion similar and avoid future travel setbacks. Derek Beattie Images / Shutterstock.com Air Force One Plane An ironically, the forces aim is not the only À € à € œ. The military designated two aircraft under the signal of connection, the forces A ... They also serve as official airplanes for presidential travel. These two planes have been in service since 1990, and one of them is always ready to fly. 1000 words / Shutterstock.com Boeing made the current plans while Various types of plans were used - à €
