If you are a new Android owner or a professional looking for new tools, these 10 large and free applications belong to your arsenal.photo by lwallenstein.we go to jump right on applications that are so common , universal and well replicated on iPhone or other mobile platforms that a user needed will probably go huit them down - Facebook, Yelp, Evernote, remember milk, and twitter endless customers, widgets and applications. Also we jumped on the own small Google applications such as Google Voice, Navigation and Protection Aços, which are (or will be) included standard on new Android phones. Instead, we intend to shine a little light on applications that quietly offer excellent functionality for those who download them: I moved the Taskiller for free for a lower classification and modified their entry description little after some additional, stimulated by some comments and emails and emails. 10. Logarin somehow, this is a vow for the potential of layar, as much as the practical application. Walking with your phone and watching wikip! already. One thing worth mentioning is that if you do not like the visualization of the 3-D camera, or as the appearance of yourself while the USA, Layar can only show you points of Interest on a Google map. In any case you use, it is an intriguing appearance in what is happening just around the corner. (Original Post) iPhone / Android: Layar, the mobile application that overcut data markers on what your telephone camera see: ! More9. Listening to the latest update, we could not have really attached to listen to a king among podcast applications - had some Irksome insects, one of them being the loss of episode and sometimes signatures. Now, however, the Google Proper application makes a great job not only in finding an audio content, but it exports your signatures to be managed in Google Reader, ensuring a complete feed backup and recovery easier of past episode !
