How to remove headphone mode from android. How do i get my android off headphone mode. How to turn headphone mode off android.

by Santosh Das | Last updated on 27 July 2021 If the headphone symbol or icon is not going and is locked in your Android phone notification bar, use these suggestions to solve the problem. Headphone symbol that does not go from the Android mobile phone notification bar or the headphone icon not to be missed from the notification bar is a very common problem. This article will explain the 100% safe solution on how to remove the headphone icon from any Android phone phone if the phone is locked in the headphone mode. Ps Å ÅžÅšÅ ¢; This headset symbol does not go away from the notification bar is the most common problem in redmi note 3, redmi note 4, some models of oppo, nokia, samsung duos and lg. These suggestions to fix the headphone icon problem is applicable to all brands of Android phones, including Å ¢ Å, ~ "Xiaomi (Redmi), Realme, Gionee, Alcatel, Blue, Celkon, Coolpad, Hitech, Fly, Huawei, lava, Lenovo, Micromax, Oppo, Samsung, Vivo, Panasonic, ZTE etc. Causable problems when the head phone icon blocked in the notification bar The phone goes into a headset mode even when the headset is not connected. When increases or Decrease the volume of any multimedia player, including the YouTube app, won't work. The phone is actually increasing or decreasing the volume of the headset and not your phone speaker. During incoming calls, it is not able to Listen to any ringtone Because the phone thinks the headset is connected and it is played in the headphone. The phone's operating system will do everything as if the headset is also connected if it is actually connected. You may have a headache due to this to ° Åž. Headphone symbol does not go Å ¢ Å, ~ "How to remove the headphone icon from the notification bar: step solution by step 1. Clean the 3.5 mm headphone jack in many cases, this problem of the headphones icon It is caused by a little dirt or unwanted thing in the 3,5 mm headphone jack of the Android phone. Remove the headphone and clean the jack hole. Do not use any appointment as a pointed tweezer. Use a screwdriver of Accuracy or a SIM ejector tool or anything that does not cause damage to the audio jack. After cleaning correctly, insert the headset and check. In 20 to 30% of cases this will solve and solve the problem. 2. Audio setting for improvement if The above solution does not resolve or solve the problem of the icon / headphone symbol, then do: Go to the setting >> Sound and Vibration or Additional Settings >> Headphones and Audio Effects. Plugin The Headset and enables the AU enhancer God / audio improvement. Here you will see different types of headphones like I Aurbuds, I'm in-ear, MI Piston, Basic Edition, General, General In-Ear, Standard Edition, etc. Choose the type of headphone. Here you select a different headset other than the default. Now remove the headphone and see if the icon went or not. If the headphone icon is still present, plugin the headphone and select another headset and remove the time remove the headphone. Repeat the Å ¢
