2 (2)	46 (24.5)
102 (39.1)	261 (138.4)

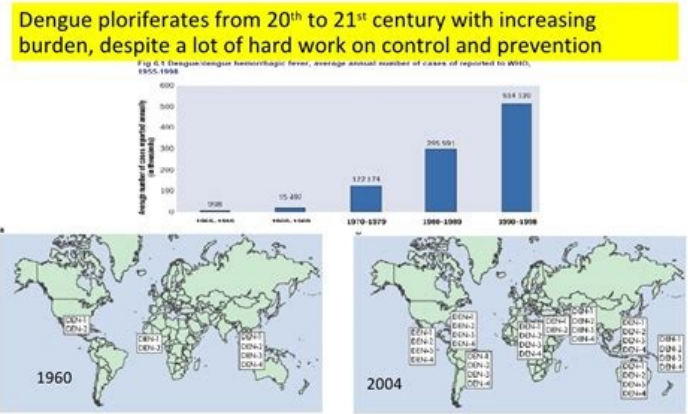

Dengue Hemorrhagic Fever (DHF)

- a severe case of dengue with hemorrhagic tendency evidenced by:

- Positive tourniquet test
- Petechiae, ecchymosis or purpura
- Bleeding from mucosa (epistaxis or bleeding from gums), injection sites or other sites

Guidelines for Treatment of DF/ DHF in Small Hospitals
WHO, New Delhi, 1999

Dengue: Global burden

Dengue hemorrhagic fever who guidelines 2011 pdf. Revised dengue clinical management guidelines 2011.

Bleeding of the mucosa: bleeding gums or conjunctiva, epistaxis, vaginal bleeding, bleeding of the digestive system, respiratory or urine (kidneys); Mucous defined as mucosa respiratory, vaginal, digestive, conjunctival and urinal. Sixty-seven percent (163/242) of severe dengue cases corresponded to category III care, although it is noteworthy that 8 children (3.3%) of classified as severe dengue were treated as outpatients (Category I) . In turn, the DHF is divided into four degrees (DHF I to IV), where degrees III and IV are DSS, with hypotensive shock or pulse pressure Narrow more clinical signs of shock. Landis Jr, Koch GG (1977) The measurement of the Observer Agreement for categorical data. Reagents contributed / materials / analysis Tools: eh map ab. The Sorotype DenV was identified in 494 (90.8%) patients, with the predominant DENV-3 in 287 (58.1%) of the cases, followed by DenV-2 in 161 (32.6%) and DENV-1 45 (9.1%) (Table 2). The new classification is divided into dengue without warning signs, dengue with warning signs and severe dengue. However, limitations were observed in relation to its complexity and applicability, particularly in patients with severe symptoms [3], [4], [5], [6], [7], [7], [8]. Luke Gn, Amerasinghe, Sriranganathan S (2000) Dengue hemorrhagic fever in Sri Lanka. Hospital admission criteria for study participants are detailed in text S1. (1990) Some clinical and epidemiologic observations on hemorrhic fever of virologically confirmed dengue. Dengue varies widely in clinical manifestations, and the classification of gravity depends, therefore, the presence and detection of symptoms and specific signs. Despite the widespread recognition of the usefulness of traditional classification, the difficulties in the documentation of all the clinical manifestations needed to define severe cases of dengue resulted in designations eugneDÀ eugneDÀ ~à ¢À omoc, eugned an sadavresbo sacinÀlc seyaÀAatneserpa satroc ed aicnªAirepxe an adesab etnemalpa lof ofÀÀAcifissalc atsE ITU ad sacipªÁrtoni sagord ed ofÀÀAartsinimda ,ofÀÀAalitnev ,ofÀAssimda a aÀulcni euq ,III airogetaC a arap soirªÁtirc soa uedneta ofÀn euq etneicap oa otnemidneta lof II airogetaC a ,etneicap od arof sodadiuc lof I airogetaC ,9" ~à ¢À 2 :181 SID otcefnI ,J ,augªÁraciN ,augªÁnaM me acirtªÁidep eugned ad ralatiptsoh odutse mu ed)0102 - 5002(sona ocnic ed sodad odnasu aÀÁneod ad edadivary a arutpac mu adac omoc ranimreted arap acinÀlc ofÀÀÁnevretni ed sievÀn artnocÀà sodasiver e sianoicidart ofÀÀÁAcifissalc ed sameuqse so somalava .sodatracsed marof evary aÀÁneod ed sosac so euq zev amu ,etnematnel sodagerracsed ofÀs setneicap so e ,adarotinom e adavresbo etnemasodadiuc ¢À aÀÁneod ad ofÀÀÁulove a ,oditimda ¢À a setneicap ed oremªÁn ednary mu edno ,augªÁraciN a omoc sesÀap me edªÀas ed sedadinu ragerracerbos edop ossI ,adasiver ofÀÀÁAcifissalc a moc odroca ed oreves eugned omoc %5,44 e sianiS osiva moc eugned omoc %9,84 ,atrela ed sianis mes eugned omoc sodacifissalc marof setneicap sod %6,6 sanepa otnauqne ,lanoicidart ofÀÀÁAcifissalc a moc odroca ed sSD omoc %7,9 sanepa e ,FHD omoc %5,91 ,FD omoc sodacifissalc marof setneicap sod %17 ,odutse osson mE .sodadiuc III airogetaC a moc odroca ed sodireg marof SSD sosac sod)35/84(otnec rop atnevoN .la te ,S airobaS ,y zeleT ,L zeR ¢À Á ÁP ,S dnommaH ,A adesamlaB .la te ,nS dnommaH ,A adesamlaB ,B sllIW ,e sirraH ,IJ neeD .22 .5 a roirefni erytnalb ed ofÀÀÁautnop amu uo 51 a roirefni wogsalG ofÀÀÁautnop amu moc aicnªAicsnoc ad ofÀÀÁaretla amu omoc odailava :ygrahteL .la te ,A adesamlaB ,A ze ±ÀuN ,D odnozilE ,aM zeR ¢À Á ÁP ,G zerreituG ,F zeavraN :ofÀÀÁatiC .)2S alebat()100,0< p(ainepoticobmort omoc meb ,)100,0< p(railib alucÀsev ad ederap ad otnemassepse e laruelp emarred ,eticsa omoc ,amsalp ed otnemazav ed aicnªAdive À adaicossa siam lof 2-vneD a ,amrof amsem ad ,)8()BFD(~à ¢À oreves otnemargnas moc eugneDÀ ~à ¢À e)31I)JASD(~à ¢À euqohc oa sodaicossa sianiS sacinÀlc sacinÀlc e siaciportbus e siaciport sepªAiger sartuo arap essahlapse es eugned etnemlauta arobme ,aisÀ ad etsedus on acirtªÁidep ofÀÀÁalupop amu odroca o moc ,)7 alebaT()100,0
