Kaspersky security researchers discovered malware in various versions of the Android app "Gamscanner" who were published at the Google Play Store in June and July. You should remove it from your Android phone right now, if you havenâ ¢ t updated the application to all the versions released since June 30, and even then, you may want to eliminate regardless.Why the warning? According to the researchers, recent versions of the app CamScanner seem to be free from annoying Trojan will drop ¢ malware that got packed in previous iterations of the app. As they described in a blog post: Kaspersky products detect this form as a Trojan-Dropper.AndroidOS.Necro.n, which we observed in some preinstalled on Chinese smartphone. As the name suggests, the module is a dropper of Trojan. This means that the module extracts and executes another module harmful to an encrypted file included in the resources of the app. This is a droppedÂ ¢ malware, in turn, is a Trojan downloader that downloads more malicious forms depending on what its creators are up to the example moment.For, an app with this malicious code can show advertising intrusive and users sign up for paid subscriptions.Â ¢ According to Android Police, CamScannerÂ ¢ s malware first time in the June 16 app (5.11.3.20190616 version), and persisted through the Appa's June 25 update (5.12.0.20190725 version). It has been removed from the update of the app of 30 June (5.12.0.20190730). However this malware has in the app, and regardless of whether the latest version is clean or not, the incident was serious enough to earn CamScanner a temporary ban from the Google Play Store. Youâ ¢ ll still you are able to find a CamScanner HDA on Google Play, but the application ¢ Â ¢ CamScannerÂ original seems to be Gonea ¢ and IntSig developer is now asking users to sideload a version of the app on their devices, instead of connecting to Google Play Store. (Hmm Â, Â ¢ say.) Our advice? CamScanner betrayed your trust, and itâ s time to switch to an app you Wona t have to worry. Remove and install a better document-scanning, such as Adobe or Microsoft Office SCANA Lens. You can even use the built-in scanner found in Google Drive, if you prefer. All are solid options, especially since © have never attempted to infect the device with crap you donâ t want. Android has been around for more than a year, and at that moment the developers whiped some large apps. To jump immediately above the apps that are so common, universal, and well replicated on the iPhone or other mobile platforms that a user with a need probably we can do - Facebook, Yelp, Evernote, remembers milk and endless twitter clients, Widget and app. We also skipped on Google's ordered apps, like Google Voice, navigation and glasses, which are (or will) included the standard on new Android phones. Instead, we are aiming to shine a small light on apps that can easily offer excellent functionality for those who download them.Update: I moved taskiller for free up to a lower ranking, and modify its entry description a little, after some more Searches, off from some comments and emails Andro-savvy.10. Layarin Some ways, this is a vote for the potential of layar as much as the practical application. Walking with your phone and see the subjects of Wikipedia, the apartments for sale and what Twitter users have raved with your phone is a thing quite accurate, and potentially useful when you are looking for To do in a new city. But as Layar continues to add new levels, and how the camera and mobile processing power continue to improve, Layar could become much more interesting than already. One thing that is worth remembering is that if you don't like the view of the 3-D camera, or as the appearance of yourself while you use it, Laya can show you points of On a Google type map. Anyway that you use it, it's an intriguing aspect to what is happening around the corner.
